

# Supplemental Labeling

Proposed Suppl. Labeling 06/19/95

MAR 06 1996

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 62719-131

DowElanco 9330 Zionsville Road Indianapolis, Indiana 46268-1054 USA

## Treflan\* TR-10\* EPA Reg. No. 62719-131

For Distribution and Use Only in Minnesota, North Dakota and South Dakota

### Fall or Spring Application to Ground with Standing Crop Stubble or Crop Residue for Weed Control in Following Crop -- Special Use Directions for Minimum Tillage Situations --

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Treflan TR-10 before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Treflan TR-10 according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Treflan TR-10.

#### Directions for Use

Treflan\* TR-10\* herbicide is a preemergence incorporated product that controls weeds as they germinate. Treflan TR-10 will not control established weeds.

#### Application Timing

Treflan TR-10 may be applied in fall or spring to ground with standing crop stubble or crop residue for weed control in the following crop. When applied in this manner, the first incorporation of Treflan TR-10 must occur within 72 hours after application. The second incorporation must be delayed a minimum of 5 days after the first and may occur any time up to planting. This application is limited to use on ground that has not had a primary tillage treatment following crop harvest. Following application, plant only crops to which Treflan TR-10 may be applied as a preplant incorporated treatment.

#### Broadcast Application Rates

Refer to the product label for Treflan TR-10 for use directions for specific crops, including application rates and other use information. Apply at the recommended broadcast application rate for the crop, soil texture, and target weed species. When fall applied, use the highest rate in the rate range allowed for the soil texture to be treated.

#### Incorporation

Incorporate using minimum tillage equipment such as the rotary harrow, field cultivator, under-cutter chisel plow or other suitable tillage implement. It is desirable to loosen and mix surface soil sufficiently to trap Treflan TR-10, but maintain a surface cover of stubble and crop residue sufficient for erosion protection. The second incorporation may occur any time prior to or in conjunction with tillage operations associated with planting.
