Weed Control in Spearmint and Peppermint

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Treflan TR-10 before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Treflan TR-10 according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Treflan TR-10.

Directions for Use

Treflan* TR-10* herbicide may be applied to established spearmint and peppermint as a soil incorporated treatment to control weeds listed on the product label. Apply during dormancy or semi-dormancy in late winter or early spring or in the fall. Because Treflan TR-10 does not control established weeds, application must be made prior to the time of germination of target weeds. Late winter or early spring application will control susceptible weeds that germinate from early spring onward into the growing season and fall application will control susceptible fall germinating winter annuals. Use incorporation equipment that will ensure thorough soil mixing with minimal damage to the crop stand. Follow incorporation procedures in the product label for Treflan TR-10.

Surface Applications Activated by Rainfall or Irrigation: Surface applications of Treflan TR-10 may be activated by rainfall, sprinkler irrigation, or flood irrigation. Rainfall or a single overhead sprinkler irrigation of 0.5 acre inch or more is required to activate Treflan TR-10. If rainfall or irrigation has not occurred within 3 days after application, mechanical incorporation is recommended to activate the treatment.

Broadcast Application Rates:

Soil Texture	Treflan TR-10 (lb/acre)
Coarse	5.0
Medium	6.25
Fine	7.5

(EPA Reg. No. 62719-131)

Proposed Section 3 labeling for use of Treflan TR-10 on spearmint and peppermint. This use was previously deleted at the request of the registrant (see EPA-accepted copy dated 06-25-92). Prior to FQPA reregistration of this use could not be supported. Dow AgroSciences now requests that this use be reinstated.
