Dursban* 50DF Insecticide

EPA Reg. No. 62719-163

For Control of Mole Crickets in Turfgrass

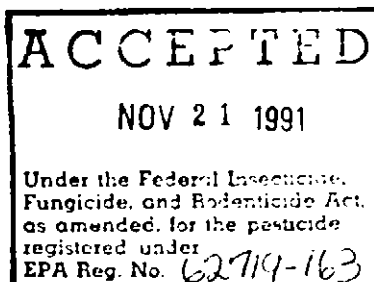

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Dursban 50DF before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Dursban 50DF according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Dursban 50DF.

Directions for Use

To control mole crickets in turfgrasses apply Dursban 50DF at a rate of 1.5 to 2.2 ounces per 1000 sq ft (4 to 6 pounds per acre) using broadcast or suitable hand held application equipment. Apply in a minimum spray volume of 50 gallons of water per acre. Apply when early stage nymphs are active.

Effectiveness may be enhanced by spraying late in the afternoon or early evening and irrigating the turf within 24 hours prior to and following application to move mole crickets near the soil surface and wash the insecticide into the zone of insect activity.
