

U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Registration Division (7505C)
401 "M" St., S.W.
Washington, D.C. 20460

EPA Reg. Number:
62719-174

Date of Issuance:
NOV 4 1999

NOTICE OF PESTICIDE:
Registration
 Reregistration

Term of Issuance:
Unconditional

Name of Pesticide Product:
Snapshot 80
Dry Flowable

(Under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Dow AgroSciences LLC
9330 Zionsville Road
Indianapolis, IN 46268

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the product listed above. The following revisions must be incorporated into the labeling before the product is released for shipment:

- 1) Add the statements "Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them" to the instructions for cleaning/maintaining personal protective equipment.
- 2) Add the statements "Users should remove PPE immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing. Wash the outside of gloves before removing" to the User Safety Recommendations box.
- 3) Within the application chart for noncroplands, revise the minimum time between applications for the 5 pound per acre rate to 4 months. In addition, in order for the total amounts per year to be mathematically correct, revise the total amount allowed per year for the 3.75 pound per acre rate to 13.75 pounds per acre, and revise the total amount allowed per year for the 5 pound per acre rate to 15 pounds per acre.

EPA Reg. No. 62719-174

Enclosed is a copy of your label stamped "Accepted with Comments". This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain registration of your product.

80 Dry Flowable

A selective preemergence herbicide for control of certain annual grasses and broadleaf weeds in:

- Landscape Ornamentals
- Container Grown Ornamentals
- Field Grown Ornamentals
- Ground Covers/Perennials
- Ornamental Bulbs
- Non-Bearing Fruit and Nut Trees and Non-Bearing Vineyards
- Christmas Tree Plantations
- Non-Cropland

Active Ingredients:

isoxaben: N-[3-(1-ethyl-1-methylpropyl)-5-isoxazolyl]-2,6-dimethoxybenzamide and isomer	20.0%
oryzalin: 3,5-dinitro-N ⁴ ,N ⁴ -dipropylsulfanilamide	60.0%
Inert Ingredients	20.0%
Total	100.0%

**ACCEPTED
with COMMENTS
In EPA Letter Dated**

NOV 4 1999

**Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.
62719-174**

Contains 0.80 pounds active ingredient per pound.

U.S. Patents 4,436,243 and 5,086,184

Keep Out of Reach of Children

CAUTION PRECAUCION

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

Precautionary Statements

Hazards to Humans and Domestic Animals

Causes Moderate Eye Irritation • Prolonged or frequently repeated contact may cause allergic reactions in some individuals.

Avoid contact with eyes or clothing.

Personal Protective Equipment (PPE)

Applicators and other handlers must wear:

- Long-sleeved shirt and long pants
- Chemical-resistant gloves
- Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Controls Statements

When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) (4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

User Safety Recommendations

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

First Aid

If in eyes: Flush eyes with plenty of water. Call a physician if irritation persists.

Environmental Hazards

This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate. Drift may result in reduced germination or emergence of non-target plants adjacent to treated area.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. Refer to label booklet under "Agricultural Use Requirements" in the Directions for Use section for information about this standard.

Refer to label booklet for Directions for Use, including Storage and Disposal.

Notice: Read the entire label. Use only according to label directions. **Before buying or using this product, read "Warranty Disclaimer" and "Limitation of Remedies" inside label booklet.**

In case of emergency endangering health or the environment involving this product, call collect 517-636-4400.

Agricultural Chemical: Do not ship or store with food, feeds, drugs or clothing.

Precautionary Statements

Hazards to Humans and Domestic Animals**CAUTION**

Causes Moderate Eye Irritation • Prolonged or frequently repeated contact may cause allergic reactions in some individuals.

Avoid contact with eyes or clothing.

Personal Protective Equipment (PPE)

Applicators and other handlers must wear:

- Long-sleeved shirt and long pants
- Chemical-resistant gloves
- Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Controls Statements

When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) (4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

User Safety Recommendations

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

First Aid

If in eyes: Flush eyes with plenty of water. Call a physician if irritation persists.

Environmental Hazards

This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate. Drift may result in reduced germination or emergence of non-target plants adjacent to treated area.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read all Directions for Use carefully before applying.

NOTICE: The container cap for Snapshot 80 Dry Flowable herbicide may be used to measure the amount of product required to treat small areas. Use 2 to 4 measured container caps per 1000 sq ft. Please refer to Application Rates and Weeds Controlled section of label booklet for complete use directions.

When filled to this level, container cap contains approximately 1/2 oz of Snapshot 80 Dry Flowable.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical-resistant gloves
- Shoes plus socks

Non-Agricultural Use Requirements

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for Agricultural Pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Entry Restrictions for Non-WPS Uses: Keep all persons, children and pets out of treated area until sprays have dried.

Storage and Disposal

Do not contaminate water, food, or feed by storage or disposal.

Storage: Store in original container. Do not store in direct sunlight. Do not store at temperatures above 120°F. In case of leak or spill, contain material and dispose as waste.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Dispose of in a sanitary landfill, or by incineration, in accordance with applicable regulations, or by burning if allowed by state and local authorities. If burned, stay out of smoke.

General Information

Snapshot* 80 Dry Flowable herbicide is a preemergence herbicide for control of certain annual grasses and broadleaf weeds in:

Landscape Ornamentals
 Container Grown Ornamentals
 Field Grown Ornamentals
 Ground Covers / Perennials
 Ornamental Bulbs

Non-Bearing Fruit and Nut Trees and
 Non-Bearing Vineyards
 Christmas Tree Plantations
 Non-cropland

Apply Snapshot 80 Dry Flowable anytime prior to germination of target weeds, or immediately after cultivation.

General Use Precautions

Snapshot 80 Dry Flowable controls weeds growing from seed. Snapshot 80 Dry Flowable does not control established weeds, weeds growing from stolens, rhizomes, or root pieces. Poor weed control may result if directions are not followed. Over-application may result in crop injury or excessive soil residue. Existing weeds should be controlled by cultivation or with postemergence herbicides. Weed residues, prunings and trash should be removed or thoroughly mixed into soil prior to treatment. Soil should be in good condition and free of clods at the time of application. A single rainfall or sprinkler irrigation of 0.5 inches or more, or flood irrigation is required to activate Snapshot 80 Dry Flowable. Optimum weed control is obtained when Snapshot 80 Dry Flowable is activated within 21 days of application. If rainfall or irrigation does not occur within 21 days of application and tillage is possible, Snapshot 80 Dry Flowable may be activated using cultivation equipment capable of uniformly mixing the herbicide into the upper 1 to 2 inches of soil.

Snapshot 80 Dry Flowable is orange in color and may cause temporary discoloration of sprayed surfaces. If this discoloration is undesirable, it may be altered by using a commercially available colorant such as Blazon or removed by spraying surface with water or washing with an industrial cleaner immediately after application. Snapshot 80 Dry Flowable may also be applied with mulch colorants, such as Mulch Magic or Nu-Mulch.

Treatment of Plant Species Not Listed on the Label for Snapshot 80 Dry Flowable

Users who wish to use Snapshot 80 Dry Flowable on plant species not recommended on this label may determine the suitability for such uses by making a trial application of Snapshot 80 Dry Flowable at a recommended rate to a small number of plants. Prior to using Snapshot 80 Dry Flowable on a larger number of plants, the treated plants should be observed for any sign of herbicidal injury during 30 to 60 days of normal growing conditions to determine if the treatment is non-injurious to the target plant species. **The user assumes responsibility for any plant damage or other liability resulting from use of Snapshot 80 Dry Flowable on plant species not recommended on this label.**

Apply Snapshot 80 Dry Flowable only to established plantings. **Do not apply** Snapshot 80 Dry Flowable to newly transplanted ornamentals, nursery stock, ground covers, ornamental bulbs, non-bearing fruit† and nut trees and non-bearing vineyards or Christmas trees until soil or potting media has been settled by packing and irrigation or rainfall and no cracks are present or plant injury may occur.

†**Note:** Non-bearing fruit and nut trees and non-bearing vineyards are defined as plants which will not bear fruit for at least one year after treatment.

Do not apply Snapshot 80 Dry Flowable to turf.

Do not aerially apply this product.

Do not graze or feed forage from treated areas to livestock.

In Arizona: The state of Arizona has not approved Snapshot 80 Dry Flowable for use on plants grown for commercial production such as: turf sod farms, ornamentals and nursery stock grown for resale, and non-bearing fruit and nut trees and vineyards.

Application Directions

Apply Snapshot 80 Dry Flowable as a directed spray to the soil surface or otop of plants using a properly calibrated low pressure herbicide sprayer that provides a uniform distribution. Spray tip screens should be no finer than 50 mesh. In-line screens and strainers should be no finer than 16 mesh (50 mesh is finer than 16 mesh). Apply Snapshot 80 Dry Flowable in 10 to 200 gallons of water carrier per acre (0.25 to 5 gallons per 1000 sq ft). As spray volume decreases, the importance of accurate calibration and uniform application increases. Calibrate application equipment prior to use, according to manufacturer's directions to ensure proper calibration and uniform application. Maintain continuous agitation from mixing through application. Take precautions to avoid spray drift when applying Snapshot 80 Dry Flowable. Drift may result in reduced germination or emergence of non-target plants adjacent to the treated area. Avoid spray pattern skips and overlaps that may result in incomplete coverage or over application.

Chemigation: Do not apply Snapshot 80 Dry Flowable through any type of irrigation system.

Snapshot 80 Dry Flowable - Alone

Check to be sure spray equipment is clean and not contaminated. Using clean water, fill spray tank to 1/2 the final volume required and start agitation. Slowly add the correct quantity of Snapshot 80 Dry Flowable to the spray tank, continue agitation and complete filling the tank. Maintain agitation during filling and through application. Agitation should be sufficient to create a rippling or rolling action on the liquid surface. A sparger pipe generally provides the best agitation. If spraying and agitation is interrupted, Snapshot 80 Dry Flowable may settle to the bottom of the spray tank. If settling occurs, material must be resuspended before spraying continues. Clean spray tank, lines, screens and nozzles thoroughly after use.

Tank Mixes with Snapshot 80 Dry Flowable

Tank mix combinations of Snapshot 80 Dry Flowable plus Roundup or other labeled herbicides may be used to control undesirable vegetation. Applied as directed, these tank mixes will provide control of susceptible weed species listed on the respective labels. Refer to tank mix product labels for specific use directions, precautions and limitations before use.

Tank Mixing

Add Snapshot 80 Dry Flowable to the spray tank as described above and fill the spray tank to 3/4 of final volume required. Add other product formulations in the following order: (1) dry flowables, (2) wettable powders, (3) aqueous suspensions, (4) flowables, (5) liquids, (6) solutions and emulsifiable or liquid concentrates. To insure proper mixing, allow two to three minutes agitation between the addition of each product, and agitate continuously until the product(s) are completely dispersed in water. Maintain agitation during filling and through application. If a buildup of material is observed on the walls of the spray tank, wash the tank with soapy water between fillings, rinse and then continue the spraying operation. Clean spray tank, lines, screens and nozzles thoroughly after use. Follow label directions for each material added to the tank.

Snapshot 80 Dry Flowable Plus Roundup: Tank mix combinations of Snapshot 80 Dry Flowable plus Roundup are recommended to control existing undesirable vegetation. Applied as directed, Snapshot 80 Dry Flowable plus Roundup will provide postemergence control of susceptible weed species listed on the label for Roundup and residual preemergence control of susceptible weed species listed on the label for

Snapshot 80 Dry Flowable. Refer to the label for Roundup for specific use directions, precautions and limitations before use.

Precautions:

Do not apply sprays containing Roundup over the top of ornamental plants.

Extreme care must be exercised to prevent contact of sprays containing Roundup with foliage and stems of trees, shrubs, or other desirable vegetation since severe damage or death may result.

Note: If spraying with Roundup in areas adjacent to desirable plants, use a shield to prevent spray from contacting foliage and stems of desirable plants.

Application Rates and Weeds Controlled or Suppressed by Snapshot 80 Dry Flowable

Snapshot 80 Dry Flowable Broadcast Rates				
per acre		per 1,000 sq ft		
Pounds	Bottles	Ounces	Measured Caps	Tablespoons
2.5	2	1.0	2	4
3.75	3	1.5	3	6
5.0	4	2.0	4	8

Weeds controlled when applied at 2.5 pounds (2 bottles) per acre (1.0 oz or 2 measured container caps per 1000 sq ft).

Common Name	Scientific Name
aster, slender	<i>Aster exilis</i>
barnyardgrass	<i>Echinochloa crus-galli</i>

Triticum spp.

Approved Uses

Ornamentals

Snapshot 80 Dry Flowable herbicide is a preemergence herbicide for control of certain annual grasses and broadleaf weeds in: landscape ornamentals; container grown ornamentals; field grown ornamentals; ground covers/perennials; non-bearing fruit and nut trees and non-bearing vineyards.

Refer to the "General Information" section of this label for general use precautions, mixing and application directions, and information on application rates and weeds controlled.

Special Use Precautions

To avoid possible injury, do not apply Snapshot 80 Dry Flowable to:

- Nursery, forest, or Christmas tree; seedling beds, cutting beds, or transplant beds.
- Unrooted liners or cuttings that have been planted in pots for the first time.
- Rooted liners until they have been removed from their original growing containers and placed in new containers at least two weeks prior to treatment.
- Pots less than four inches wide.
- Bedding plants or areas where bedding plants will be planted or transplanted within one year following application.
- Ground covers until they are established and well rooted.
- Ornamental plantings where the likelihood of runoff onto turf areas exists.

Application of Snapshot 80 Dry Flowable over the top of plants with newly forming buds may cause injury. In this situation a directed spray application is recommended.

Where loss of stand has occurred in field grown ornamentals, use untreated soil as fill around roots when replacing plants or injury may occur.

Labeled Use Site	Snapshot 80 Dry Flowable (lb/acre)	Minimum Time Between Applications (months)	Total Amount Allowed Per Year (lb/acre)
• Landscape Ornamentals	2.5	2	13.3
• Field-grown and container-grown ornamentals	3.75	3	15
	5	4	15

Note: Injury on the following plant species has been observed following applications of Snapshot 80 Dry Flowable and use is not recommended.

- Ajuga* spp. (bugle)
- Brassica* spp. (mustard)
- Deutzia gracilis* (slender deutzia)
- Euonymus alatus 'compacta'* (dwarf burning bush)
- Euphorbia* spp. (spurge)
- Hydrangea* spp. (hydrangea)
- Iberis* spp. (candytuft)
- Juniperus horizontalis 'Prince of Wales'* (Prince of Wales Juniper)
- Melaleuca quinquenervia* (cajeput tree)

Pseudotsuga menziesii (Douglas-fir)
Rhododendron carolinianum (Carolina rhododendron)
Rhododendron catawbiense 'Roseum elegans' (Roseum elegans rhododendron)
Sedum spp. (stonecrop)
Thuja occidentalis 'Techny' (Techny arborvitae)
Tsuga canadensis (eastern hemlock)
Yucca recurvifolia (green yucca)

Ice Plant: When establishing unrooted ice plant on coarse textured soils, do not exceed the 3.75 pound per acre rate of Snapshot 80 Dry Flowable or injury may occur.

Snapshot 80 Dry Flowable may be used on the following established ornamental plant species:

(Note: Limitations on recommended treatment methods).

Trees

Recommended Treatment Method:

C = Container Grown

F = Field Grown

† Non-bearing fruit and nut trees and non-bearing vineyards are defined as plants which will not bear fruit for at least one year after treatment.

Ornamental Bulbs

Do not use Snapshot 80 Dry Flowable in bulb production fields. For use in landscape settings only.

Snapshot 80 Dry Flowable may be applied for control of susceptible annual weeds in ornamental bulbs such as bulbous iris, daffodil (narcissus), gladiolus, hyacinth, and tulip. Apply Snapshot 80 Dry Flowable to the soil surface 2 to 4 weeks after planting, but prior to the emergence of annual weeds. Snapshot 80 Dry Flowable may also be applied following emergence but prior to and after flowering. For fall planted bulbs, apply Snapshot 80 Dry Flowable again in late winter or early spring to weed-free soil surfaces.

Special Use Precautions:

Do not apply to tulip plants that have emerged to a height greater than 3/4 inch.

Do not apply to gladioli prior to emergence or to plants less than one inch in diameter.

Do not apply to bulbous plants during flowering.

Application Rates

Time of Application	Soil Texture	Snapshot 80 Dry Flowable (oz/1000 sq ft)	Minimum Time Between Applications (months)	Total Amount Allowed Per Year (oz/1000 sq ft)
Fall	Coarse	0.46	3	0.92
Fall	Medium and Fine	0.92	3	1.38
Feb. - March	All Soil Textures	0.46	3	1.38

Shade House Areas

Snapshot 80 Dry Flowable may be applied in open shadehouse-type structures where the natural flow of air is unimpeded. Do not apply in enclosed greenhouses or in enclosed shadehouse-type structures. Do not apply within three weeks prior to enclosing greenhouse or poly-type structures.

Christmas Tree Plantations

Snapshot 80 Dry Flowable Alone

Apply Snapshot 80 Dry Flowable as a directed spray to the soil surface or as an overtop spray to established plantings of field grown Christmas tree species listed in this label. Do not apply to Douglas-fir (*Pseudotsuga menziesii*) or eastern hemlock (*Tsuga canadensis*). Do not apply to seedbeds or seedling transplant beds. Apply only to established plantings. Established plants are defined as those that have been transplanted into their final growing location for a sufficient period of time to allow the soil to be firmly settled around the roots from packing and rainfall or irrigation. Follow all instructions provided in the "General Information" section of this label.

Application Rates and Application Frequency

Snapshot 80 Dry Flowable (lb/acre)	Minimum Time Between Applications (months)	Total Amount Allowed Per Year (lb/acre)
2.5	2	13.3
3.75	3	13.3
5	3	13.3

Tank Mix Combinations

Tank mix combinations of Snapshot 80 Dry Flowable plus other labeled herbicides may be used as directed or overtop sprays in established Christmas tree plantings. When applied according to use directions, these tank mixes will provide control of susceptible weed species listed on the respective product labels. Refer to tank mix product labels for specific use directions, precautions and limitations before use.

Snapshot 80 Dry Flowable Plus Roundup: Apply tank mix combinations of Snapshot 80 Dry Flowable plus Roundup only as directed sprays in Christmas tree plantings. When applied according to use directions, Snapshot 80 Dry Flowable plus Roundup will provide postemergence control of susceptible weed species listed on the label for Roundup and residual preemergence control of susceptible weed species listed on the label for Snapshot 80 Dry Flowable. Refer to the label for Roundup for specific use directions, precautions and limitations before use.

Special Use Precautions:

Do not apply sprays containing Roundup over the top of Christmas tree plantings.

Extreme care must be exercised to avoid contact of spray containing Roundup with foliage and stems of Christmas trees or severe damage or death may result.

Noncropland Areas: Industrial Sites, Utility Substations, Highway Guardrails, Sign Posts, and Delineators

Snapshot 80 Dry Flowable is recommended as a preemergence treatment for control of certain annual grasses and broadleaf weeds in non-cropland areas, including industrial sites, utility substations, highway guardrails, sign posts and delineators. Apply Snapshot 80 Dry Flowable anytime prior to germination of target weeds. Areas to be treated should be free of established weeds or existing weeds should be controlled with postemergence herbicides. Refer to the general use precautions, mixing and application directions, and information on application rates and weeds controlled. Snapshot 80 Dry Flowable is compatible and may be tank mixed with other herbicides registered for use on noncropland. Applied as directed, tank mixes containing Snapshot 80 Dry Flowable will provide control of susceptible weed species

listed on the respective labels. All directions, precautions and limitations on the respective product labels apply to the tank mix use.

Application Rates and Application Frequency

Snapshot 80 Dry Flowable (lb/acre)	Minimum Time Between Applications (months)	Total Amount Allowed Per Year (lb/acre)
2.5	2	10
3.75	4	15
5	3	20

Inherent Risks of Use

It is impossible to eliminate all risks associated with use of this product. Plant injury, lack of performance, or other unintended consequences may result because of such factors as use of the product contrary to label instructions (including conditions noted on the label, such as unfavorable temperature, soil conditions, etc.), abnormal conditions (such as excessive rainfall, drought, tornadoes, hurricanes), presence of other materials, the manner of application, or other factors, all of which are beyond the control of Dow AgroSciences or the seller. All such risks shall be assumed by buyer.

Limitation of Remedies

The exclusive remedy for losses or damages resulting from this product (including claims based on contract, negligence, strict liability, or other legal theories), shall be limited to, at Dow AgroSciences' election, one of the following:

1. Refund of purchase price paid by buyer or user for product bought, or
2. Replacement of amount of product used

Dow AgroSciences shall not be liable for losses or damages resulting from handling or use of this product unless Dow AgroSciences is promptly notified of such loss or damage in writing. In no case shall Dow AgroSciences be liable for consequential or incidental damages or losses.

The terms of the "Warranty Disclaimer" above and this "Limitation of Remedies" cannot be varied by any written or verbal statements or agreements. No employee or sales agent of Dow AgroSciences or the seller is authorized to vary or exceed the terms of the "Warranty Disclaimer" or this "Limitation of Remedies" in any manner.
