Subject: Supplemental Label (Weed Control in Commercial and Residential Landscapes)  
Pathfinder II  
EPA Reg. No. 62719-176  
Application Dated July 1, 2009

Dear Dr. Jachetta:

The supplemental labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable, provided you make the following changes:

1. Remove the word "General" from "General Use Precautions and Restrictions" in both the supplemental label and on the main product label.
2. Remove the phrase "at a maximum use rate of 10.7 gallons of Pathfinder II (8 lb ae of triclopyr) per acre" from the directions so it reads "For control of small trees and woody plants growing in and around landscaped areas, apply Pathfinder II as a cut stump or low volume basal bark treatment only. Spray to wet but not to runoff..."
3. Add the following restrictions to the Specific Use Precautions and Restrictions section:
  - a. "Do not apply more than 10.7 gallons (8 lb ae) of Pathfinder II per acre per year."
  - b. "Do not use on or around edible food or food crops."
  - c. "Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application."
  - d. "Avoid contact with eyes, skin, or clothing during and after application."

At your next label printing, or within eighteen (18) months of the date of this letter, whichever comes first, you must incorporate this supplemental labeling into the main product labeling.

EPA Reg. No. 62719-176

A stamped copy of your label is enclosed for your records. You must submit one (1) copy of the final printed label before you release the product for shipment. Products shipped after 12 months from the date of this letter or the next printing of the label, whichever occurs first, must bear the new revised label. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA §6(e). Your release for shipment of the product constitutes acceptance of these conditions.

If you have any questions, please contact Mindy Ondish by phone at (703)605-0723 or by email at [ondish.mindy@epa.gov](mailto:ondish.mindy@epa.gov).

Sincerely,

Jim Tompkins

## Pathfinder® II

EPA Reg. No. 62719-176

(For Use and Distribution in the State of California Only)

### Weed Control in Commercial and Residential Landscapes

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Pathfinder® II specialty herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Pathfinder II according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Pathfinder II.

#### Directions for Use

Refer to product label for General Use Precautions and Restrictions and Application instructions.

Pathfinder II may be used as an individual plant treatment for the control of small brush, trees and woody plants in mixed commercial and residential landscapes. This treatment is intended for use on smooth-barked stems less than 4 inches in diameter.

For control of small trees and woody plants growing in and around landscaped or turfgrass areas, apply Pathfinder II as a cut stump or low volume basal bark treatment only at a maximum use rate of 10.7 gallons of Pathfinder II (8 lb ae of triclopyr) per acre. Spray to wet but not to runoff. Always keep spray pressure low and directed at close range toward the target plant.

#### Specific Use Precautions and Restrictions:

- Do not apply Pathfinder II to foliage or stems of desirable plants.
- Do not allow spray drift to contact desirable plants.
- Do not spray when wind is blowing toward desirable herbaceous ornamentals, flowers and gardens near enough to be injured.
- Pathfinder II is a ready to use product. Do not mix Pathfinder II in water.
- Pathfinder II is formulated as a low volatile ester. However, the combination of spray contact with impervious surfaces, such as roads and rocks, and increasing ambient air temperatures, may result in an increase in the volatility potential for this herbicide, increasing a risk for off-target injury to sensitive crops such as grapes, tomatoes, or other sensitive broadleaf plants.

**Note:** This pesticide is toxic to fish. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.
