## Treflan\* HFP

EPA Reg. No. 62719-250

### Weed Control in Seedling Alfalfa During Establishment

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Treflan HFP before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Treflan HFP according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Treflan HFP

#### Directions For Use

Treflan\* HFP herbicide may be applied as a preplant incorporated treatment for preemergence control of many annual grasses and broadleaf weeds in direct seeded alfalfa. Apply and incorporate prior to weed emergence according to product label directions. Alfalfa can be seeded immediately following incorporation of Treflan HFP

#### Broadcast Application Rates:

Soil Texture	Treflan HFP (pt/acre)
Coarse	1.0
Medium	1.0 - 1.5†
Fine	1.5

†Use lower rate in rate range in areas receiving less than 20 inches of rainfall and irrigation.

**Precautions:** Some crop stand reduction and stunting may occur with this use of Treflan HFP, however, reduced weed competition will allow establishment of a quality stand. Apply only if the risk of crop injury is acceptable.
