Subject: Amendment Add New Use- Supplemental Labeling for Insect Control in Tobacco
Tracer (A. I. Spinosad)
EPA Registration No. 62719-267
Your submissions dated September 20, and October 17, 2000

Dear: Dr. Jachetta:

The amendment referred to above, submitted in connection with registration under FIFRA, section 3(c)(7)(A)(B), as amended, is acceptable provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) or 4(a) when the Agency requires all registrants of similar products to submit such data.
2. Submit two (2) copies of your final printed labeling before you release the product for shipment.

You should note that if you fail to satisfy any of the conditions imposed on this registration. e.g., you fail to submit the required data by the specified guidelines or the data submitted were not generated in accordance with the applicable test guidelines, EPA may issue a notice to cancel these uses under FIFRA section 6(e)

You should also note that regardless of whether you satisfy all applicable conditions, this conditional registration will expire automatically on September 23, 2002. Sale and distribution of the subject product bearing labeling for use on tobacco will be illegal.

Tracer*

EPA Reg. No. 62719-267

For Insect Control in Tobacco

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Tracer* Naturalyte* insect control before applying. Carefully follow precautionary statements and applicable use directions.
- Use of Tracer according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Tracer.

Directions for Use

Pests, Application Rates and Restrictions:

Pests Controlled	Rate (fl oz/acre)	Recommendations and Restrictions
tobacco budworm tobacco hornworm	1.4 - 2.9	General: Use a higher rate in rate range for heavy infestations and/or difficult spray coverage situations. Maximum Use Rate: Do not apply more than 14.4 fl oz of Tracer (0.45 lb spinosad) per acre per year. Preharvest Interval: Do not apply within 3 days of harvest.

Specific Use Directions

Application Timing: For tracking **lepidopterous larvae**, scout with enough regularity to monitor the population size of each of the labeled pests. Heavy infestations may require repeat applications but make no more than 3 applications per 30 days or 6 applications per crop. The minimal time period between applications must be 7 days. To delay resistance selection, do not treat sequential generations with the same class of insect control products. Treat when pests appear, targeting eggs at hatch or small larvae. Consult your DowElanco representative, extension service specialist, certified crop advisor or your state agricultural experiment station for any additional area use recommendations for your area.

Spray Volume: Use a minimum of 20 gallons of water per acre to obtain full coverage of foliage, increasing volume and nozzles per row as necessary with crop maturity.

Chemigation: Do not apply through any type of irrigation equipment.
