Subject: Entrust, EPA Reg. No. 62719-282 Supplemental Label for control of  
armyworms and suppression of alfalfa weevil in crop group 18  
Date of Registrant Submission: February 14, 2011  
Decisions: 446040

Dear Dr. Racke:

The labeling referred to above, submitted in connection with registration under the Federal insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable.

At your next label printing, or within eighteen (18) months, whichever comes first, you must incorporate the supplemental labeling into the main product labeling. Stamped copies of the supplemental label are enclosed for your records.

Two (2) copies of the finished labeling must be submitted prior to releasing each product for shipment. If you have any questions regarding this letter, please contact Samantha Hulkower at (703) 603-0683.

Sincerely,

A handwritten signature in black ink, appearing to read "Mark Suarez", written over a circular stamp.

Mark Suarez  
Product Manager 13  
Insecticide Branch  
Registration Division (7505P)

Enclosure: Copy of Labels Stamped "Accepted"

## Entrust<sup>®</sup>

EPA Reg. No. 62719-282

### Control of Armyworms and Suppression of Alfalfa Weevil in Nongrass Animal Feeds (Forage, Fodder, Straw, and Hay) (Crop Group 18)<sup>1</sup>

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Entrust<sup>®</sup> Naturalyte<sup>®</sup> insect control before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Entrust according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Entrust.

#### Directions for Use

<sup>1</sup>Nongrass animal feeds (forage, fodder, straw, and hay) (crop group 18) including alfalfa, clover, crown vetch, kudzu, lespedeza, lupin, milk vetch, sainfoin, trefoil, vetch, velvet bean

Refer to product label for Entrust for General Use Precautions, Mixing and Application information.

#### Pests and Application Rates:

Pests	Entrust (oz/acre)
alfalfa weevil (suppression)	0.63 – 1.25
beet armyworm	
fall armyworm	
southern armyworm	
true armyworm	

**Application Timing:** Scout at least weekly and consider the impact of both pests and beneficials. Treat when economic thresholds are exceeded, targeting eggs at hatch or small larvae. Heavy infestations may require repeat applications, but follow resistance management guidelines on the product label. Consult your Dow AgroSciences representative, extension service specialist, certified crop advisor or your state agricultural experiment station for any additional recommendations applicable to your area.

**Application Rate:** Use a higher rate in the rate range for heavy infestations or advanced growth stages of target pests.

**Resistance Management:** Do not apply more than three times in any 21-day period. Whenever Entrust is applied up to three times in succession, this should be followed by no use of Entrust for a 21-day period or rotation to another insecticide class.

#### Restrictions:

- **Preharvest Interval:** Do not apply within 3 days of harvest for hay or fodder. There is no preharvest interval for forage.
- Do not apply more than a total of 3.75 oz of Entrust (0.186 lb ai spinosad) per acre per season.
- **Maximum Number of Applications:** Do not make more than six applications per season.
- Do not allow cattle to graze from treated area until spray has dried.

**Note:** This product is toxic to bees exposed to treatment for 3 hours following treatment and toxic to aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.

Expiration Date: December 31, 2014
