# Supplemental Labeling

Dow AgroSciences LLC

9330 Zionsville Road

Indianapolis, IN 46268-1054 USA

## Success\*

EPA Reg. No. 62719-292

### For Foliar Insect Control in Tree Nuts and Pistachios

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Success\* Naturalyte\* insect control before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Success according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Success.

#### Directions for Use

Tree Nuts, Including but not Limited to: Almond, Cashew, Chestnut, Filbert or Hazelnut, Macadamia nut, Pecan, Pistachio and Walnut

Pests and Application Rates:†

NOTIFICATION

FEB 25 2002

Pests	Rate of Success †		
	Active Ingredient (lb/acre)	(fl oz/acre)	Dilute Spray** (fl oz/100 gal)
peach twig borer navel orange worm redhumped caterpillar oblique banded leafroller pecan nut casebearer fall webworm hickory shuck worm walnut caterpillar walnut husk fly filbert worm	0.062 - 0.156	4 - 10	1 - 2.5

† Crop oils labeled for agricultural use may be added to the dormant spray solution for suppression of overwintering mites and scale insects. Consult specific oil labels and University recommendations for precautions and restrictions regarding the use of oils in nut and fruit trees.

\*\* The amount of Success per acre will depend on tree size and volume of foliage present and pest pressure. Choose a lower rate for light infestations and/or small trees and the higher rate for heavy infestations and/or larger trees.

\*\*\* Dilute sprays are sprayed to runoff. The rate per 100 gallons is based on 400 gallons providing coverage to runoff. Gallonage of dilute sprays will vary depending on tree size, density of canopy and stage of growth of the trees.

#### Specific Use Directions:

**Application Timing:** Use Success at the dosages indicated by application as either a dormant or a foliar spray to control peach twig borer and or navel orange worm in almonds. Mix the required dosage in sufficient water to ensure thorough and complete coverage of the foliage and tree and apply as a concentrate or dilute spray using conventional, power operated spray equipment. For dilute sprays applied to almonds, mix the required dosage in sufficient water to allow for spray to runoff. For

3/4

concentrate sprays, apply an equivalent amount of Success. Treat when pests appear or in accordance with local conditions. Consult your Dow AgroSciences representative, extension service specialist, certified crop advisor or your state agricultural experiment station for any additional local use recommendations for your area.

**Restrictions:** Although peach twig borer and navel orange worm have not had major resistance problems it is recommended to avoid applying Success against more than 2 generations of peach twig borer per year.

- Do not apply more than a total of 29 ounces of Success (0.45 lb of spinosad) per acre per crop.
- **Treatment Interval:** Do not apply treatments less than 14 days apart.
- **Preharvest Interval:** Do not apply within 14 days of harvest.

**Note:** This product is toxic to bees exposed to treatment for 3 hours following treatment and toxic to aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.

Dow AgroSciences LLC      9330 Zionsville Road      Indianapolis, IN 46268-1054 USA

## Success\*

EPA Reg. No. 62719-292

### For Foliar Insect Control in Asparagus (Post Harvest Protection of Ferns Only)

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Success\* Naturalyte\* insect control before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Success according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Success.

#### Directions for Use

Refer to product label for Success for General Use Precautions, Mixing and Application instructions.

#### Pests and Application Rates:

**NOTIFICATION**

FEB 25 2002

Pests	Application Rate †	
	Active Ingredient (lb/acre)	Product (fl oz/acre)
Asparagus beetle	0.062 - 0.094	4 - 6

† Use a higher rate in the rate range for heavy infestations or advanced growth stages of the beetle.

#### Specific Use Directions:

**Application Timing:** For determining when to treat, scout with enough regularity to monitor the population size of the labeled pest. Make applications only to asparagus ferns. Treat when pests appear, targeting eggs at hatch or small larvae. Consult your Dow AgroSciences representative, extension specialist, certified crop advisor or your state agricultural experiment station for any additional local use recommendations for your area.

**Application Rate:** Apply Success as a foliar spray at the rate indicated to control asparagus beetle in asparagus fern. Heavy infestations may require repeat applications, but follow resistance management guidelines.

**Resistance Management:** For resistance management purposes, do not apply more than 3 times in any 30-day period. Rotate to a different class of insect control products or use no treatment for the next 30 days. Do not make more than 3 applications per crop.

#### Restrictions:

- Do not apply more than a total of 18 ounces (0.28 lb ai of spinosad) of Success per acre per crop.
- **Pre-harvest Interval:** This use is only for asparagus ferns; do not apply within 60 days of spear harvest.
- Do not feed treated ferns to meat or dairy animals.

**Note:** This product is toxic to bees exposed to treatment for 3 hours following treatment and toxic to aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.

### For Foliar Insect Control in Artichoke

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Success\* Naturalyte\* insect control before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Success according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Success.

#### Directions for Use

Refer to product label for Success for General Use Precautions, Mixing and Application instructions.

#### Pests and Application Rates:

Pests	Application Rate †	
	Active Ingredient (lb/acre)	Product (fl oz/acre)
artichoke plume moth armyworms cutworms	0.062 – 0.094	4 - 6

NOTIFICATION

FEB 25 2002

† Use the higher end of the rate range for larger larvae or high infestations.

#### Specific Use Directions:

**Application Timing:** For determining when to treat, scout with enough regularity to monitor the population size of each of the labeled pests. Treat when pests appear, targeting eggs at hatch or small larvae. Consult your Dow AgroSciences representative, extension specialist, certified crop advisor or your state agricultural experiment station for any additional local use recommendations for your area.

**Application Rate:** Apply Success as a foliar spray at the rate indicated to control plume moth larvae, armyworms, and cutworms in artichokes. Heavy infestations may require repeat applications, but follow resistance management guidelines.

**Resistance Management:** For resistance management purposes, do not apply more than 3 times in any 30-day period. Rotate to a different class of insect control products or use no treatment for the next 30 days. Do not make more than 4 applications per crop.

#### Restrictions:

- Do not apply more than a total of 22.5 ounces (0.35 lb ai of spinosad) of Success per acre per crop.
- **Pre-harvest Interval:** Do not apply within 2 days of harvest.

**Note:** This product is toxic to bees exposed to treatment for 3 hours following treatment and toxic to aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.

**NOTIFICATION**

FEB 25 2002

#### Specific Use Directions:

**Application Timing:** For determining when to treat, scout with enough regularity to monitor the population size of each of the labeled pests. Treat when pests appear, targeting eggs at hatch or small larvae. Consult your Dow AgroSciences representative, extension specialist, certified crop advisor or your state agricultural experiment station for any additional local use recommendations for your area.

**Application Rate:** Use a higher rate in specified rate range for larger larvae or moderate to severe infestations.

#### Restrictions:

- Do not apply more than a total of 29 ounces of Success (0.55 lb ai of spinosad) per acre per crop or make more than 6 applications per calendar year.
- **Minimum Treatment Interval:** Do not make applications less than 7 days apart.
- **Pre-harvest Interval:** Do not apply within 3 days of harvest.

**Note:** This product is toxic to bees exposed to treatment for 3 hours following treatment and toxic to aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.

SUCCESS (A.I. SPINOSAD)  
EPA REGISTRATION NUMBER: 62719-292  
NOTIFICATION OF MINOR SUPPLEMENTAL LABEL CHANGE PER PR NOTICE 98-10

Enclosed please find supplemental labeling of notification action for Success\* Naturalyte\* insect control in sugar beet and garden beet based on EPA accepted copy dated January 22, 2002. The changes to the supplemental label via this notification are as follows:

1. Changed the "Note" text as follows: "This product is toxic to bees exposed to treatment for 3 hours following treatment and toxic to aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures." This text was agreed upon in a February 12, 2002 meeting between Sterett Robertson (Dow AgroSciences) and George LaRocca and Bill Sproat (EPA).

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

**Contents of Submission**

- Transmittal document (this letter)
- Application for Pesticide, EPA Form 8570-1 (OPP No. 286860)
- Supplemental label entitled Success (T6P/Success/Notif Suppl IR-4 Sugar & Garden Beet/02-14-02)  
(1 Page plus Registration Notes) (1 Copy)

If you require further information, please contact Cindy Loy, Registration Specialist at (317) 337-4655 or Amy Hudson, Registration Assistant for this product, at (317) 337-4655.

Sincerely,

A handwritten signature in cursive script that reads "A. Sterett Robertson".

# Supplemental Labeling

Dow AgroSciences LLC 9330 Zionsville Road Indianapolis, IN 46268-1054 USA

## Success\*

EPA Reg. No. 62719-292

### For Foliar Insect Suppression In Bushberries, Juneberry, Salal, and Lingonberry

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Success\* Naturalyte\* insect control before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Success according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Success.

#### Directions for Use

Success\* Naturalyte\* insect control may be used to suppress the listed pests infesting bushberries (including but not limited to blueberry, currant, gooseberry, huckleberry, and elderberry), juneberry, salal, and lingonberry.

Refer to product label for Success Naturalyte insect control for General Use Precautions, Mixing and Application instructions.

#### Pests and Application Rates:

Pests	Application Rate <sup>†</sup>	
	Active Ingred. (lb/acre)	Product (fl oz/acre)
armyworms cherry fruitworm cranberry fruitworm currant fruitfly fireworms leafrollers loopers thrips	0.062 – 0.094	4 - 6

**NOTIFICATION**

FEB 25 2002

<sup>†</sup> The amount of Success per acre will depend on plant size and volume of foliage present and pest pressure. Choose a lower rate for light infestations and/or small plants and a higher rate for heavy infestations and/or larger plants.

#### Specific Use Directions:

**Application Timing:** Treat when pests appear, targeting eggs at hatch or small larvae. Heavy infestations may require repeat applications but follow resistance management guidelines. Consult your Dow AgroSciences representative, extension service specialist, certified crop advisor or your state agricultural experiment station for any additional local use recommendations for your area.

**Resistance Management:** Do not apply Success more than 3 times in any 30 day period. Whenever Success is applied three times in succession, this should be followed by no use of Success for a 30 day period or rotation to another insecticide class.

**Restrictions:**

- Do not apply more than a total of 29 ounces of Success (0.45 lb ai of spinosad) per acre per crop or make more than 6 applications per calendar year.
- **Minimum Treatment Interval:** Do not make applications less than 6 days apart.
- **Pre-harvest Interval:** Do not apply within 3 days of harvest.

**Note:** This product is toxic to bees exposed to treatment for 3 hours following treatment and toxic to aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.
