Subject: Final Printed Labels
Conserve Fire Ant Bait (A.I. SPINOSAD)
EPA Registration No. 62719-304
Your Submission Dated March 21, 2000

Dear Dr. Jachetta:

The amendment referred to above, submitted in connection with registration under section 3 (c)(5) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable. A stamped copy of the label is enclosed for your records.

If you have any questions regarding this action, please contact Dr. William Sproat of my team at (703) 308-8587.

Sincerely,

A handwritten signature in black ink, appearing to read "George T. LaRocca".

Conserve* Fire Ant Bait

[icon] OUTDOOR USE ONLY
 READY TO USE
 Easy to Use
 No Mixing Required/Necessary
 Use Straight from the Bag (Bottle, Container)

Mound or Broadcast Treatments
 No Watering Necessary

Kills Fire Ants
 Kills the Queen(s)
 Kills the Mound
 Controls the Mound
 Controls the Colony
 Plus Helps Stop New Mounds from Forming
 No Mound Movement
 Controls Mounds You See *plus* Those You Don't
 Effective Kill of Fire Ants

Dead Ants in 24 Hours
 Controls Fire Ants for up to 2 Months
 Fire Ants Find/Pick Up Bait in Minutes
 Long Lasting Control

Treats (depends on package size) Mounds

No Odor
 Odor-Free
 Contains Conserve*

Active Ingredient	
spinosad [†]	0.015%
Other Ingredients	99.985%
Total	100.000%

[†] A mixture of Spinosyn A & Spinosyn D

U.S. Patent No. 5,362,634 and 5,496,931

KEEP OUT OF REACH OF CHILDREN
CAUTION PRECAUCION

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Harmful if swallowed.

Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Wash thoroughly with soap and water after handling.

FIRST AID

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor.

Have the product container or label with you when calling a poison control center or doctor or going for treatment

ENVIRONMENTAL HAZARDS

This product is toxic to aquatic invertebrates. Do not apply directly to any body of water. Do not put product or rinse water down any drain.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

AMOUNT TO USE
<ul style="list-style-type: none"> • Mounds: 4 Tbs for each mound † • Broadcast Application: 1/2 - 3/4 cup for each 1,000 sq ft

Tbs = Tablespoon

† For mounds greater than 15 inches in diameter use 6 Tbs per mound.

Do not use kitchen utensils for measuring. Keep measuring utensils with pest control products and away from children.

FOR BEST RESULTS	
HOW TO APPLY [optional illustration]	<ul style="list-style-type: none"> • Mounds: Sprinkle bait evenly over and around each mound in a 4-ft diameter circle. Apply gently to avoid disturbing ants. • Broadcast Application: Use a hand held or ground driven rotary broadcast spreader. [Editor's note: subregistrant can specify spreaders and settings.]
MOW [optional illustration /mower]	<ul style="list-style-type: none"> • Avoid mowing 1 day before and after application.
WATER/RAINFALL [optional illustration /hose]	<ul style="list-style-type: none"> • Do not water-in bait. • Do not water within 6 hours of a mound or 24 hours of a broadcast application. • If rain occurs within 6 hours of mound application or 24 hours of broadcast application, adequate foraging of the bait may not occur and retreatment may be necessary.
WHEN TO APPLY [optional illustration]	<ul style="list-style-type: none"> • Apply when ants are active (usually when temperatures are greater than 60° F). • The best time to apply is in the cooler morning and late evening when fire ant foraging is at its peak. • Mounds will usually be eliminated/destroyed in 3 to 14 days. Extremely large mounds may require a repeat application. • Make a broadcast application every other month during the warm months to keep fire ants from establishing/starting/forming new mounds.

HOW IT WORKS

Conserve* fire ant bait is attractive and deadly to fire ants. Fire ants quickly find/pick up this bait, take it back to the mound, and feed it to the entire colony including the queen(s). Ants start dying in 24-36 hours with mound/colony destruction in 3 to 14 days. Broadcast applications may take longer.

Fire ant colonies are started by newly mated queen(s) that fly into an area, burrow into the ground and begin laying eggs. Several flights are common during the summer, often shortly after rain. It takes several weeks for new mounds to appear. Combining mound and broadcast applications eliminates/controls visible mounds and helps prevent new mounds from forming.

<p>STORAGE AND DISPOSAL</p> <p>STORAGE: Store in a cool dry place out of the reach of children and domestic animals. Store in original container only.</p> <p>DISPOSAL: Do not reuse container. Wrap container in newspaper and put in trash.</p>
