DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

AMOUNT TO USE
<ul style="list-style-type: none"> • Mounds: 4 Tbs for each mound † • Broadcast Application: 1/2 - 3/4 cup for each 1,000 sq ft

Tbs = Tablespoon

† For mounds greater than 15 inches in diameter use 6 Tbs per mound.

Do not use kitchen utensils for measuring. Keep measuring utensils with pest control products and away from children.

FOR BEST RESULTS	
HOW TO APPLY [optional illustration]	<ul style="list-style-type: none"> • Mounds: Sprinkle bait evenly over and around each mound in a 4-ft diameter circle. Apply gently to avoid disturbing ants. • Broadcast Application: Use a hand held or ground driven rotary broadcast spreader. [Editor's note: subregistrant can specify spreaders and settings.]
MOW [optional illustration /mower]	<ul style="list-style-type: none"> • Avoid mowing 1 day before and after application.
WATER/RAINFALL [optional illustration /hose]	<ul style="list-style-type: none"> • Do not water-in bait. • Do not water within 6 hours of a mound or 24 hours of a broadcast application. • If rain occurs within 6 hours of mound application or 24 hours of broadcast application, adequate foraging of the bait may not occur and retreatment may be necessary.
WHEN TO APPLY [optional illustration]	<ul style="list-style-type: none"> • Apply when ants are active (usually when temperatures are greater than 60° F). • The best time to apply is in the cooler morning and late evening when fire ant foraging is at its peak. • Mounds will usually be eliminated/destroyed in 3 to 14 days. Extremely large mounds may require a repeat application. • Make a broadcast application every other month during the warm months to keep fire ants from establishing/starting/forming new mounds.

HOW IT WORKS

Conserve fire ant bait* is attractive and deadly to fire ants. Fire ants quickly find/pick up this bait, take it back to the mound, and feed it to the entire colony including the queen(s). Ants start dying in 24-36 hours with mound/colony destruction in 3 to 14 days. Broadcast applications may take longer.

Fire ant colonies are started by newly mated queen(s) that fly into an area, burrow into the ground and begin laying eggs. Several flights are common during the summer, often shortly after rain. It takes several weeks for new mounds to appear. Combining mound and broadcast applications eliminates/controls visible mounds and helps prevent new mounds from forming.

STORAGE AND DISPOSAL

STORAGE: Store in a cool dry place out of the reach of children and domestic animals. Store in original container only.

DISPOSAL: Do not reuse container. Wrap container in newspaper and put in trash.

Terms and Conditions of Use

If terms of the following Warranty Disclaimer and Inherent Risks of Use are not acceptable, return unopened package at once to the seller for a full refund of purchase price paid. Otherwise, use by the buyer or any other user constitutes acceptance of the terms under Warranty Disclaimer and Inherent Risks of Use.

Warranty Disclaimer

Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below. SELLER MAKES NO EXPRESS NOR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

Inherent Risks of Use

It is impossible to eliminate all risks associated with use of this product. Lack of performance, or other unintended consequences may occur due to such factors as use of the product contrary to label instructions (including adverse conditions noted on the label, such as unfavorable temperature, soil conditions, etc.), abnormal conditions (such as extreme weather conditions), presence of other materials, the manner of application, or other factors, all of which are beyond the control of Seller. All such risks shall be assumed by Buyer.
