## Rally® 40WSP EPA Reg. No. 62719-410

### Control of Powdery Mildew on Hops

**ATTENTION**

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Rally® 40WSP fungicide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Rally 40WSP according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Rally 40WSP.

### Directions for Use

Refer to product label for General Use Directions, Mixing and Application instructions.

Growth Stage	Rally 40WSP (oz/acre)	Spray Interval (days)	Use Precautions
emergence to training	2 - 4	7 - 10	Do not apply less than 2 oz of Rally 40WSP per acre or adequate efficacy may not be achieved.
training to wire (prior to beginning of bloom when vines are rapidly growing)	4 - 6	5 - 10	Do not apply less than 4 oz of Rally 40WSP per acre or adequate efficacy may not be achieved.
wire to 14 day pre-harvest	6 - 10	7 - 10	Do not apply less than 6 oz of Rally 40WSP per acre or adequate efficacy may not be achieved.

Apply Rally 40WSP in sufficient water for thorough coverage using ground equipment or by air in a minimum spray volume of 10 gallons of water per acre. Thorough coverage is essential. Use the shorter spray interval on susceptible varieties or under heavy disease pressure.

#### Specific Use Restrictions:

- **Do not** make more than four applications of Rally 40WSP per acre per season.
- **Do not** apply more than 2.5 lb of Rally 40WSP (1 lb active ingredient) per acre per season.
- **Pre-harvest Interval: Do not** apply within 14 days of harvest.
- **Do not** graze livestock in treated areas or harvest crops grown in treated areas for silage or hay.
- **Chemigation: Do not** apply Rally 40WSP through any type of irrigation system.
- **Resistance Management:** Rally 40WSP is in fungicide mode of action group 3. Alternation with other modes of action is recommended after each application of Rally 40WSP. Do not make more than 2 consecutive applications of Rally 40WSP before rotating to a product that is effective on powdery mildew and has a mode of action different from Rally 40WSP. In either case, the alternate product should be applied within 14 days of an application of Rally 40WSP to ensure optimum control.
