NOTIFICATION

SEP 1 6 2002

For Control of Take-all Patch in Turf

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Eagle* 40WP fungicide or Rohm and Haas labeled product for Eagle WSP (EPA Reg. No. 707-232) before applying. Carefully follow all precautionary statements and applicable use directions.
- Use allowed by this supplemental labeling is subject to all precautions and limitations imposed by the label affixed to the product container.

Directions for Use

- Eagle 40WP should be used in conjunction with turf management practices that promote good plant health and optimum disease control. The key to selecting a fungicide is the proper diagnosis of the organism causing the disease. Diagnostic kits, extension experts, or other identification methods should be used when developing disease control strategies.
- Optimum disease control is achieved when Eagle 40WP is applied in a preventative disease control program at a rate of 0.5 to 1.2 ounces per 1000 square feet. See the following table for specific application rates for various diseases.
- Eagle 40WP should be applied in sufficient water to ensure thorough coverage. For foliar diseases, use approximately one
 gallon of water per 1,000 square feet. Two to three gallons of spray solution per 1,000 square feet should be used to
 control diseases causing root and crown rots.
- Under conditions optimum for high disease development, the spray interval between applications of Eagle 40WP should be reduced.
- Unless otherwise specified, when disease pressure is high or when used as a curative, use higher rates of Eagle 40WP and shorter intervals. Under light to moderate disease pressure, apply Eagle 40WP at the low use rate and/or longer application intervals.

	Eagle 40WP (oz/1000 sq ft)	Application Rate [†]		
Disease		Area Covered per water- soluble pouch (sq ft)	Application Interval / Timing	Instructions
Take-All Patch	1.2	2500	Fall: 28 days	Make 1 to 2 applications in the spring and fall before turf goes dormant. Water-in to reach roots. May repeat application in the spring.

Restrictions (For all Turfgrass Diseases):

- Do not apply more than 36 ounces of Eagle 40WP per 5,000 sq ft. per year (tweive, 3 oz packets per year).
- For Nassau and Suffolk Counties in New York State, use is limited to 9 ounces of Eagle 40WP per 5000 sq ft per year (1.95 lb active ingredient per acre).
