ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Intrepid* 2F insecticide before applying. Carefully follow all
 precautionary statements and applicable use directions.
- Use of Intrepid 2F according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Intrepid 2F.

Directions for Use

Refer to product label for General Use Precautions, Mixing and Application instructions.

Pests, Application Rates, Application Timing and Restrictions:

	Intrepid 2F		
Target Pests	(fl oz/acre)	Application Timing	Restrictions
alfalfa looper beet armyworm cabbage looper European corn borer fall armyworm southern armyworm tomato hornworm true armyworm	4 – 8 (0.06 – 0.12 lb ai/acre)	For early season applications only to young crops and small plants. Apply at first sign of feeding damage or when infestations reach threshold levels as defined by a cooperative extension service or other qualified professional authorities.	Do not apply more than 16 floz per acre per application or 64 floz of Intrepid 2F (1.0 lb ai) per acre per season. Pre-harvest Interval: Do not harvest within 1 day of application.
yellowstriped armyworm western yellowstriped armyworm	8 - 16 (0.12 – 0.25 lb ai/acre)	For mid- to late-season applications, heavier infestations, and under conditions in which thorough coverage is more difficult. For heavy infestations, continuous	See Rotational Crop Restrictions below.
		moth flights, and/or egg masses and larvae in all stages of development, a 7-14 retreatment interval is required to protect new growth until moth flights and/or larval infestations subside.	
tomato fruitworm	10 - 16 (0.16 - 0.25 lb ai/acre)	Apply at first sign of feeding damage or when infestations reach threshold levels as defined by a cooperative extension service or other qualified professional authorities. May provide partial control when infestations reach high levels.	
Tomato pinworm (suppression only)		Leafmining and infestations of leafmining phase are reduced when applied at initiation of egg laying.	

Ground Application: Apply a minimum of 10 gallons per acre by conventional ground equipment to young crop or small plants. Apply a minimum of 20 gallons per acre to densely foliated or difficult to cover crops to ensure thorough coverage. Equipment and spray volume should be calibrated to assure uniform coverage of infested parts of the crop.

Aerial Application: Apply a minimum of 10 gallons per acre.

Spray Adjuvants: The addition of agricultural adjuvants to Intrepid 2F sprays will improve initial spray deposits, redistribution and weatherability. Select adjuvants that are recommended and registered for your specific use pattern and follow their use directions. Always add adjuvants last in the mixing process.

Rotational Crop Restrictions: Crops with registered uses may be replanted at any time. All other crops grown for food or feed may be replanted after 7 days. **Note:** These rotational crop restrictions supercede prior restrictions of 356 days for leafy vegetables and root and tuber vegetables and the prohibition for all other crops.

Note: This product may be hazardous to aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.

INTREPID 2F (A.I. METHOXYFENOZIDE) EPA REGISTRATION NUMBER: 62719-442 NOTIFICATION OF MINOR LABEL CHANGE PER PR NOTICE 98-10

Enclosed please find labeling of notification action for Intrepid* 2F insecticide for control of lepidoptera larvae infesting okra based on EPA accepted labeling dated June 5, 2003. The following changes are being made via this notification action:

1. At the request of California DPR, added following text to Rotational Crop Restrictions – "Note: These rotational crop restrictions supercede prior restrictions of 356 days for leafy vegetables and root and tuber vegetables and the prohibition for all other crops."

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

For Control of Lepidoptera Larvae Infesting Corn (Field, Sweet, Seed)

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Intrepid* 2F insecticide before applying. Carefully follow all
 precautionary statements and applicable use directions.
- Use of Intrepid 2F according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Intrepid 2F.

Directions for Use

Refer to product label for General Use Precautions, Mixing and Application instructions.

Pests, Application Rates, Application Timing and Restrictions:

Pests	Application Rate (fl oz/acre)	Application Timing	Restrictions
European corn borer southwestern corn borer true armyworm western bean cutworm	4 - 8 (0.06 - 0.12 lb ai/acre)	Apply at first sign of egg hatch or when infestations reach threshold levels as defined by a cooperative extension service or other qualified professional authorities. Direct application at the whorl for early season (first generation) infestations. Apply as broadcast or multi-nozzle over the row application to mid- and late-season infestations. Apply at first sign of egg hatch (field corn), feeding damage (sweet corn), or when infestations reach threshold levels as defined by a cooperative extension service or other qualified professional authorities. Under heavy infestations, continuous moth flights, or rapid crop growth and development, reapply at 5-10 day re-treatment interval.	Do not apply more than 16 floz per acre per application or 64 floz of Intrepid 2F (1.0 lb ai) per acre per season. Pre-harvest Interval-Field Corn: Do not harvest within 21 days of application. Pre-harvest Interval-Sweet Corn: Do not harvest within 3 days of application for ears and/or green chop (forage) and within 21 days of application for dry fodder. See Rotational Crop Restrictions below.

Specific Use Directions-Field Corn:

Ground Application: Apply a minimum of 5 gallons per acre by conventional ground equipment to young crop or small plants. Higher carrier volumes may be required to provide thorough coverage to larger, more mature crop. Equipment and spray volume should be calibrated to assure uniform coverage of infested parts of the crop.

Aerial Application: Apply a minimum of 5 gallons per acre. Use sufficient carrier volume to provide thorough, uniform coverage.

4-5

Spray Adjuvants: The use of Latron CS-7* spreader/binder or similar spreader/binder is recommended to maximize coverage and retention of the spray material.

Specific Use Directions-Sweet Corn:

Ground Application: Apply a minimum of 10 gallons per acre by conventional ground equipment to young crop or small plants. Apply a minimum of 20 gallons per acre after initiation of tasseling. Equipment and spray volume should be calibrated to assure uniform coverage of infested parts of the crop.

Aerial Application: Apply a minimum of 10 gallons per acre.

Spray Adjuvants: The use of Latron CS-7 spreader/binder or similar spreader/binder is recommended to maximize coverage and retention of the spray material.

Rotational Crop Restrictions: Crops with registered uses may be replanted at any time. All other crops grown for food or feed may be replanted after 7 days. **Note:** These rotational crop restrictions supercede prior restrictions of 356 days for leafy vegetables and root and tuber vegetables and the prohibition for all other crops.

Note: This product is toxic to aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.

alfalfa looper beet armyworm cabbage looper European corn borer fall armyworm southern armyworm tomato hornworm true armyworm yellowstriped armyworm	4 - 8 (0.06 - 0.12 lb ai/acre)	For early season applications only to young crops and small plants. Apply at first sign of feeding damage or when infestations reach threshold levels as defined by a cooperative extension service or other qualified professional authorities. For mid- to late-season	Do not apply more than 16 floz per acre per application or 64 floz of Intrepid 2F (1.0 lb ai) per acre per season. Do not make more than 4 applications per acre per season. Pre-harvest Interval: Do
western yellowstriped armyworm	(0.12 – 0.25 lb ai/acre)	applications, heavier infestations, and under conditions in which thorough coverage is more difficult. For heavy infestations, continuous moth flights, and/or egg masses and larvae in all stages of development, a 7-14 retreatment interval is required to protect new growth until moth flights and/or larval infestations subside.	not harvest within 7 days of application. Re-treatment interval: 7 days See Rotational Crop Restrictions.
corn earworm (heliocoverpa/heli othis) (suppression only)	10 - 16 (0.16 – 0.25 lb ai/acre)	Apply at first sign of feeding damage or when infestations reach threshold levels as defined by a cooperative extension service or other qualified professional authorities. May provide partial control when infestations reach high levels.	
tomato pinworm (suppression only)		Leafmining and infestations of leafmining phase are reduced when applied at initiation of egg laying.	

4-5

Ground Application: Apply a minimum of 10 gallons per acre by conventional ground equipment to young crop or small plants. Apply a minimum of 20 gallons per acre to densely foliated or difficult to cover crops to ensure thorough coverage. Equipment and spray volume should be calibrated to assure uniform coverage of infested parts of the crop.

Aerial Application: Apply a minimum of 10 gallons per acre.

Spray Adjuvants: The addition of agricultural adjuvants to Intrepid 2F sprays will improve initial spray deposits, redistribution and weatherability. Select adjuvants that are recommended and registered for your specific use pattern and follow their use directions. Always add adjuvants last in the mixing process.

Rotational Crop Restrictions: Crops with registered uses may be replanted at any time. All other crops grown for food or feed may be replanted after 7 days. **Note:** These rotational crop restrictions supercede prior restrictions of 356 days for leafy vegetables and root and tuber vegetables and the prohibition for all other crops.

Note: This product may be hazardous to aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.

NOTIFICATION NOV 2 1 2003

INTREPID 2F (A.I. METHOXYFENOZIDE)
EPA REGISTRATION NUMBER: 62719-442
NOTIFICATION OF MINOR LABEL CHANGE PER PR NOTICE 98-10

Enclosed please find labeling of notification action for Intrepid* 2F insecticide for control of lepidoptera larvae infesting blackeyed pea and southern pea based on EPA accepted labeling dated September 23, 2003. The following changes are being made via this notification action:

At the request of California DPR, added following text to Rotational Crop Restrictions – "Note: These rotational
crop restrictions supercede prior restrictions of 356 days for leafy vegetables and root and tuber vegetables and
the prohibition for all other crops."

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.
