## Grasp™ SC EPA Reg. No. 62719-500

(For Distribution and Use Only in the States of Arkansas, Louisiana, Mississippi, Missouri and Texas Under the Direct Supervision of a Dow AgroSciences Representative)

### Control or Suppression of Grass and Weeds as a Postflood Treatment in Rice

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Grasp™ SC herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
- Except as described in this supplemental labeling, use of Grasp SC is subject to all use precautions and limitations imposed by the label affixed to the product container.

#### Directions for Use

Refer to product label for General Use Precautions and Restrictions, Mixing and Application instructions.

Grasp SC may be applied to rice from rice emergence (drill seeded rice) or rice pegging with 1 leaf (water seeded rice) up to 60 days before harvest. Within this application window, application timing is dependent on cultural practices and optimum timing for weed species present. (See Application Rates and Weeds Controlled table.) Do not apply if crop or weeds are under drought stress.

Prior to application, the flood water must be lowered to expose at least 70% of the weed foliage. A shallow flood depth in the field (1 to 2 inches deep) will not adversely affect weed control. For best results, re-establishment of normal flood depth should begin within 1 to 2 days after application to prevent germination of new weeds.

If Grasp SC is applied as a postflood salvage treatment (e.g., heavy weed infestations, headed weeds and/or previously untreated areas), it should be considered an emergency salvage treatment. Good control of labeled weeds should not be expected. Regrowth of treated weeds may occur.

#### Application Rates and Weeds Controlled

Weeds Controlled Postflood Common name (scientific name)	Application Rates and Stage of Weed Development
