U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Registration Division (H7505C)
401 "M" St., S.W.
Washington, D.C. 20460

EPA Reg. Number:
62719-511

Date of Issuance:
February 23, 2005

NOTICE OF PESTICIDE:
 Registration
 Reregistration

Term of Issuance:
Unconditional

Name of Pesticide Product:
Garlon EV Herbicide

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Dow AgroSciences
9330 Zionsville Road
Indianapolis, IN 46268

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is registered in accordance with FIFRA sec. 3(c)(5) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product when the Agency requires all registrants of similar products to submit such data.

2. Make the following changes to your labeling:

a. Change the registration number to "62719-511"

b. In the "Storage and Disposal" section, change the subheading "Storage" to "Pesticide Storage".

c. In the "Environmental Hazards" section, change "This product" to "Fluroxypyr" in "This product is toxic to fish."

d. In the Agricultural Use Requirements, change the REI for WPS uses to 48 hours.

e. In the "Avoiding Injurious Spray Drift" section, add "Do not apply by aerial application" or add the aerial spray drift advisory information from the triclopyr RED.

Signature of Approving Official:

Date:

2/23/05

f. In the "Use precautions and restrictions" section, add the following:

- Chemigation: Do not apply this product through any type of irrigation system.
- The combination of Garlon EV with any other product containing fluroxypyr or triclopyr cannot exceed the maximum of 0.5 lb a.e. fluroxypyr or 2.0 lb a.e. triclopyr per acre per annual growing season.
- Grazing and Haying Restrictions

Grazing or harvesting green forage:

- 1) Lactating dairy animals: Do not allow grazing or harvest green forage for lactating dairy animals from treated areas during the same growing season following application.
- 2) Other Livestock: No grazing restrictions.

Haying (harvesting of dried forage):

- 1) Do not harvest hay within 14 days after application.

Slaughter Restrictions: Withdraw livestock from grazing treated grass or consumption of treated hay at least 3 days before slaughter. This restriction is applicable to grazing or harvest of hay from treated areas during the same growing season following application.

3. Submit a storage stability and corrosion characteristics study within 1 year of the date of this notice.
4. Submit revised final labeling for this product before releasing product for shipment.

A stamped copy of the label is enclosed for your records.

If you have any questions about this letter, please contact Tobi Colvin-Snyder at 703-305-7801.

Jim Tompkins
Product Manager (25)
Herbicide Branch
Registration Division (7505C)

(Base Label):

(Logo) Dow AgroSciences

Garlon* EV

For the control of annual and perennial broadleaf weeds in established cool season turf, and industrial non-crop areas, including manufacturing and storage sites, rights-of-way such as electrical power lines, communication lines, pipelines, roadsides, railroads, fence rows, non-irrigation ditch banks, including application to grazed areas, and maintenance of wildlife openings on these sites.

Active Ingredients:

fluroxypyr 1-methylheptyl ester: ((4-amino-3,5-dichloro-6-fluoro-2-pyridinyl)oxy) acetic acid, 1-methylheptyl ester	5.6%
triclopyr: 3,5,6-trichloro-2-pyridinyloxyacetic acid, triethylamine salt	16.1%
Inert Ingredients	78.3%
Total	100.0%

ACCEPTED
with COMMENTS
In EPA Letter Dated

FEB 23 2005

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No.

62719-511

Contains petroleum distillates.

Acid Equivalent: fluroxypyr 3.87% = 0.33 lb/gal
triclopyr 11.62% = 1.0 lb/gal

Keep Out of Reach of Children

WARNING AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

Precautionary Statements

Hazards to Humans and Domestic Animals

Causes Substantial But Temporary Eye Injury • Harmful If Swallowed

Do not get in eyes or on clothing.

Personal Protective Equipment (PPE)

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category F or G on an EPA chemical resistance category selection chart.

Applicators and other handlers must wear:

- Long-sleeved shirt and long pants
- Chemical-resistant gloves such as Barrier Laminate or Viton
- Shoes plus socks
- Protective eyewear (goggles face shield or safety glasses)

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

4/15

Engineering Controls Statements

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protections Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d) (4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

User Safety Recommendations

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

First Aid

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If swallowed: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

Note to Physician: Contains aromatic petroleum distillate. Vomiting and aspiration may cause chemical pneumonitis.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-992-5994 for emergency medical treatment information.

Environmental Hazards

This product is toxic to fish. Drift or runoff from treated areas may be hazardous to aquatic organisms and non-target plants. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

Triclopyr has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. Refer to the label booklet under "Agricultural Use Requirements" in the Directions for Use section for information about this standard.

Refer to label booklet for Directions for Use, including Storage and Disposal.

Notice: Read the entire label. Use only according to label directions. **Before using this product, read Warranty Disclaimer, Inherent Risks of Use, and Limitation of Remedies at end of label booklet. If terms are unacceptable, return at once unopened.**

In case of emergency endangering health or the environment involving this product, call 1-800-992-5994. If you wish to obtain additional product information, visit our web site at www.dowagro.com.

Agricultural Chemical: Do not ship or store with food, feeds, drugs or clothing.

9/15

Environmental Hazards

This product is toxic to fish. Drift or runoff from treated areas may be hazardous to aquatic organisms and non-target plants. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

Triclopyr has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying.

This product is not intended for manufacturing or formulating use.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical-resistant gloves such as Barrier Laminate or Viton
- Shoes plus socks
- Protective eyewear

Non-Agricultural Use Requirements

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for Agricultural Pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Entry Restrictions for Non-WPS Uses: Do not allow people (other than applicator) or pets on treatment area during application. Do not enter into treated areas until sprays have dried.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

Storage: Store above 32°F. Shake well before use.

Pesticide Disposal: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your state pesticide or environmental control agency, or the hazardous waste representative at the nearest EPA regional office for guidance.

Container Disposal (Plastic): Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local

10/15

authorities. Plastic containers, after triple rinsing, may be incinerated if allowed by state and local authorities. If burned, stay out of smoke.

Container Disposal (Metal): Do not reuse container. Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

General: Consult federal, state, or local disposal authorities for approved alternative procedures.

General Use Directions

Shake Well Before Use - Protect From Freezing.

Garlon* EV specialty herbicide is a broad-spectrum weed killer for control of broadleaf weeds in established cool season turfgrasses and industrial non-crop areas, including manufacturing and storage sites, rights-of-way such as electrical power lines, communication lines, pipelines, roadsides, railroads, fence rows, non-irrigation ditch banks, including application to grazed areas, and maintenance of wildlife openings on these sites.

Weeds Controlled and Use Rate Recommendations [†]

Weeds Controlled	Suggested Use Rate		
	pt/acre	fl oz/1000 sq ft	Tbs [†] /1000 sq ft
black medic common purslane common ragweed curly dock hop clover lambquarters lespedeza red clover stichwort western ragweed white clover	3.0	1.1	2
catchweed bedstraw common chickweed common cocklebur common yellow woodsorrel dogfennel ground ivy henbit horseweed morningglory musk thistle plumeless thistle prickly lettuce purple deadnettle rock speedwell tall goldenrod velvetleaf vetch spp.	4.5	1.65	3 1/3
broadleaf plantain common dandelion healall	6.0	2.2	4 1/2

11/15

kochia narrowleaf plantain (buckhorn) tropical soda apple Virginia buttonweed western iron weed wild mustard			
(Repeat Treatment May Be Necessary) †† creeping woodsorrel wild violet English lawn daisy veronica spp.	6.0	2.2	4 1/2

† 1 fl oz = 30 ml = 2 Tbs = 6 tsp

†† Repeat applications may be necessary to maintain control of these weeds.

Mixing Directions

Use only clean water suitable for spraying. Add one-half the required amount of water to spray tank. Add Garlon EV and complete addition of water with agitation running. Mix thoroughly and continue agitation while spraying.

Tank Mixing: The recommended order of addition to the spray tank is water, spray thickening agent (if used), additional herbicide (if used), and Garlon EV. If combined with emulsifiable concentrate herbicides, moderate continuous agitation is required. Surfactant at the manufacturer's recommended rate should be added to the spray tank last.

Tank Mixing Precautions: When tank mixing, follow applicable use directions, precautions and limitations on the labels of the respective tank mix products. Use in accordance with the most restrictive of label limitations and precautions on each label. No label dosages should be exceeded. Do not tank mix this product with any product containing a label prohibition against tank mixing with fluroxypyr or triclopyr. Do not exceed recommended application rates. If applying this product in combination with another pesticide containing the same active ingredient, do not exceed the maximum active ingredient use rate specified by either product.

Tank Mix Compatibility Testing: A jar test is recommended prior to tank mixing to ensure compatibility of this product and other pesticides. Use a clear glass quart jar with lid and mix the tank mix ingredients in their relative proportions. Invert the jar containing the mixture several times and observe the mixture for approximately 1/2 hour. If the mixture balls-up, forms flakes, sludges, jels, oily films or layers, or other precipitates, it is not compatible and the tank mix combination should not be used.

12/15

Application Directions

Use application equipment that will insure uniform spray coverage. Apply Garlon EV when broadleaf weeds are actively growing. Application under conditions of plant moisture stress (drought) may provide less than desirable results. Broadleaf weed species germinate at different times. Only emerged weeds present at time of application are controlled. Refer to specific use directions for site-specific precautions and limitations.

Standard Volume Application

Apply 3 to 6 pints of Garlon EV in 20 gallons or more of spray volume per acre (0.5 gallon or more of spray volume per 1,000 square feet). Use low-pressure application equipment capable of delivering a uniform droplet size and spray distribution. Up to 200 gallons of spray volume per acre may be used if applying Garlon EV with liquid fertilizers.

Low Volume Application

Apply 3 to 6 pints of Garlon EV in 5 to 20 gallons of spray volume per acre (1/8 to 1/2 gallon spray per 1,000 square feet). Use low-pressure application equipment capable of delivering a uniform droplet size and spray distribution. Spray coverage may be improved by addition of a non-ionic surfactant at the manufacturer's recommended rate. Use the higher recommended rates of surfactant for lower rates of product and lower spray volumes.

The use of Garlon EV in ultra low volume (ULV) equipment is not recommended.

Spot Treatments

Spot treatments may be applied with a calibrated boom or with hand sprayers according to directions provided below.

Hand-Held Sprayers: Hand-held or backpack sprayers may be used for spot applications of Garlon EV. Care should be taken to apply the spray uniformly and at a rate equivalent to a broadcast application. Application rates in the table are based on an area of 1,000 sq ft. The amount of Garlon EV (fl oz or ml) in the table should be mixed with 1 gallon or more of water and applied to an area of 1,000 sq ft. An area of 1000 sq ft is approximately 10.5 X 10.5 yards (strides) in size.

Amount of Garlon EV to Equal Specified Broadcast Rate (Mix with 1 Gallon or More of Water and Apply to 1,000 sq ft)			
3 pt/acre	4 pt/acre	5 pt/acre	6 pt/acre
1.1 fl oz (33 ml)	1.5 fl oz (44 ml)	1.8 fl oz (54 ml)	<u>2.2 fl oz</u> <u>(65 ml)</u>

†1 fl oz = 29.6 (30) ml

Avoiding Injurious Spray Drift

Do not allow sprays of Garlon EV to contact nearby susceptible broadleaf crops or other desirable broadleaf plants. Very small quantities of spray, which may not be visible, may seriously injure susceptible plants including ornamental trees and shrubs. Do not apply under conditions that would allow the wind to carry spray mist toward susceptible crops or ornamental plants.

With ground broadcast equipment, drift can be reduced by keeping the spray boom as low as possible, by applying no less than 20 gallons of spray per acre (except under "Low Volume Applications"); by keeping the operating spray pressures at the lower end of the manufacturer's recommended pressures for the specific nozzle type used, and by spraying when the wind velocity is low (2 - 10 mph). For application with hand-held sprayers, select the minimum spray pressure that will provide adequate plant coverage (without forming a mist). **Do not** apply with a mist blower.

13/15

Use Directions for Turf

Cool season turfgrass have good tolerance to Garlon EV. On some fine-leaved turfgrasses slight transitory discoloration may occur following application. Do not apply during adverse conditions such as drought, very hot or cold weather, or when the crop or weeds are under stress.

Use of Garlon EV can cause significant injury to perennial warm season turfgrass species such as St. Augustinegrass, bermudagrass, zoysiagrass, centipedegrass, bahiagrass, kikuyugrass or seashore paspalum and is not recommended.

Garlon EV is recommended for use on the following cool season turfgrass species:

Common Name	Scientific Name
bentgrass †	<i>Agrostis</i> species
bluegrass, Kentucky	<i>Poa pratensis</i>
fescue, chewing	<i>Festuca rubra</i> var. <i>commutata</i>
fescue, creeping red	<i>Festuca rubra</i>
fescue, sheeps	<i>Festuca ovina</i>
fescue, tall	<i>Festuca arundinaceae</i>
ryegrass, perennial	<i>Lolium perenne</i>

† Do not apply to bentgrass unless injury can be tolerated. Do not apply more than 3 pt/acre (1.1 fl oz/1000 sq. ft) per application. Additional applications, if required, should be made at least 4 weeks apart. Avoid swath overlaps.

Use Precautions and Restrictions

- **Do not** apply to exposed roots of shallow rooted trees and shrubs.
- **Do not** allow sprays of Garlon EV to contact exposed suckers and/or roots of trees and shrubs or injury may occur.
- **Do not** apply Garlon EV directly to, or otherwise permit it to come into direct contact with cotton, grapes, tobacco, vegetable crops, flowers, fruit or ornamental trees, or other nontarget desirable broadleaf plants and do not permit spray mists to drift onto them.
- **Do not** reseed for three weeks after application.
- **Do not** use Garlon EV on golf course putting greens or tees.
- **Do not** apply on ditches used to transport irrigation water.
- **Do not** apply where runoff or irrigation water may flow onto susceptible crops as injury may result.
- **Maximum Use Rates:** **Do not** apply more than 6 pints of Garlon EV per application or more than 12 pints per acre per year.

Application Rates and Timing

Apply 3 to 6 pints of Garlon EV per acre to control broadleaf weeds. Refer to the "Weeds Controlled and Use Rate Recommendations" section for application rates for specific weeds. Spray coverage may be improved by addition of a non-ionic surfactant at the manufacturer's recommended rate. Additional applications, if required, should be made at least four weeks apart to minimize the potential for grass injury. Newly seeded turf should be mowed two or three times before being treated. Do not water for 6 hours after application.

Broadcast Application: Garlon EV may be applied as a standard (20 or more gallons per acre) or low volume (5 to 20 gallons per acre) broadcast application. Refer to the "General Use Directions" section for detailed instructions for Mixing and Application.

Spot Application: See instructions for Spot Application under Application Directions.

Use of rates above those recommended on this label could result in turf injury. Avoid overlapping of the spray swaths which could result in higher than recommended application rates.

14/15

Treatment of Turf Species Not Listed on the label for Garlon EV

Users who wish to use Garlon EV on a turf species not recommended on this label may determine the suitability for such uses by treating a small area at a recommended rate. Prior to treatment of larger areas, the treated area should be observed for any sign of herbicidal injury during 30 days of normal growing conditions to determine if the treatment is safe to the target species. **The user assumes the responsibility for any plant damage or other liability resulting from use of Garlon EV on species not recommended on this label.**

Use Directions for Industrial Sites

Use Garlon EV at rates of 3 to 6 pints per acre to control broadleaf weeds. If multiple applications are needed do not apply more than 12 pints per acre per growing season. Use sufficient spray volume to provide uniform and complete coverage of the plants to be controlled. Use of an agriculturally labeled non-ionic surfactant is recommended for all applications. When using surfactants, follow the use directions and precautions on the surfactant manufacturer's label. Use the higher recommended concentrations of surfactant in the spray mixture when applying lower spray volumes per acre.

Garlon EV may injure perennial warm season turfgrass species such as St. Augustinegrass, bermudagrass, zoysiagrass, centipedegrass, bahiagrass, kikuyugrass or seashore paspalum. Use of this product is not recommended in areas where the vegetation management goal is maintenance of warm season perennial turf.

Apply any time during the growing season when broadleaf weeds are actively growing. Refer to the "Weeds Controlled and Use Rate Recommendations" section for application rates for specific weeds.

Broadcast Application: Garlon EV may be applied as a standard (20 or more gallons per acre) or low volume (5 to 20 gallons per acre) broadcast application. Refer to the "General Use Directions" section for detailed instructions for Mixing and Application.

High Volume Foliar Application: Use Garlon EV at the rate of 3 to 6 pints per acre in a total volume of 20 to 100 gallons of water per acre using high volume hand-held equipment.

Spot Application: See instructions for Spot Application under Application Directions.

Note: Garlon EV can be applied using the Brown Brush Monitor™ or Brown Turf Monitor™ application systems.

For Broader Spectrum Weed Control

For broader spectrum broadleaf weed control, Garlon EV at 2 - 4 pints per acre may be tank mixed with 1 to 4 pints per acre of Tordon* 22K herbicide, 1/2 to 1 gallon per acre of Tordon 101 Mixture herbicide, or a 2,4-D 3.8 lb/gallon amine formulation, such as DMA* 4 IVM herbicide or Escort herbicide.

Terms and Conditions of Use

If terms of the following Warranty Disclaimer, Inherent Risks of Use, and Limitation of Remedies are not acceptable, return unopened package at once to the seller for a full refund of purchase price paid. Otherwise, use by the buyer or any other user constitutes acceptance of the terms under Warranty Disclaimer, Inherent Risks of Use and Limitations of Remedies.

15/15

Warranty Disclaimer

Dow AgroSciences warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below. Dow AgroSciences MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

Inherent Risks of Use

It is impossible to eliminate all risks associated with use of this product. Crop injury, lack of performance, or other unintended consequences may result because of such factors as use of the product contrary to label instructions (including conditions noted on the label, such as unfavorable temperatures, soil conditions, etc.), abnormal conditions (such as excessive rainfall, drought, tornadoes, hurricanes), presence of other materials, the manner of application, or other factors, all of which are beyond the control of Dow AgroSciences or the seller. All such risks shall be assumed by buyer.

Limitation of Remedies

The exclusive remedy for losses or damages resulting from this product (including claims based on contract, negligence, strict liability, or other legal theories), shall be limited to, at Dow AgroSciences' election, one of the following:

- (1) Refund of purchase price paid by buyer or user for product bought, or
- (2) Replacement of amount of product used

Dow AgroSciences shall not be liable for losses or damages resulting from handling or use of this product unless Dow AgroSciences is promptly notified of such loss or damage in writing. In no case shall Dow AgroSciences be liable for consequential or incidental damages or losses.

The terms of the Warranty Disclaimer and Inherent Risks of Use above and this Limitation of Remedies cannot be varied by any written or verbal statements or agreements. No employee or sales agent of Dow AgroSciences or the seller is authorized to vary or exceed the terms of the Warranty Disclaimer or this Limitation of Remedies in any manner.
