NOTIFICATION

MAR 29 2006

Supplemental Labeling

Dow AgroSciences LLC 9330 Zionsville Road Indianapolis, IN 46268-1054 USA

CleanWave™ EPA Reg. No. 62719-525

For Control Of Annual And Perennial Broadleaf Weeds In Wheat (Including Durum)

(For Distribution and Use in the States of Colorado, Kansas, Nebraska, Washington and the following counties in South Dakota: Hughes, Sully, Potter, Faulk, Hyde, Buffalo, Brule and Hand)

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for CleanWave™ herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of CleanWave according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for CleanWave.

Directions for Use

CleanWave may be used in the states listed above with possession of this supplemental label. Refer to product package label for further use directions including Use Precautions and Restrictions, Crop Rotation Intervals, Precautions for Avoiding Spray Drift, Mixing instructions, Application Directions, and Broadleaf Weeds Controlled.

Wheat (Including Durum)

Application Timing: Apply as a broadcast postemergence spray to actively growing wheat from the 3 leaf crop growth stage up to early jointing stage (Zadoks scale 30) for control of listed broadleaf weeds. Apply when weeds are actively growing and at recommended growth stages. For best activity on perennial weeds such as Canada thistle, apply when the majority of the basal leaves have emerged from the soil up to bud stage. Only weeds which have emerged at the time of application will be controlled. Extreme growing conditions such as drought or near freezing temperatures prior to, at, and following time of application may reduce weed control and increase the risk of crop injury at all stages of growth. **Do not use this product if the cereal crop is underseeded with a legume.**

Spot Application: Spot applications may be made; however, to prevent over-application spot treatments should be applied at rates and spray volumes equivalent to broadcast application. See instructions for Spot Treatments in Application Directions section.

Broadcast Application Rates:

Numbers in parentheses (-) refer to footnotes following table.

Weed Size or Kochia Biotype (1)	Application Rate (fl oz/acre)
broadleaf weed seedlings less than 8 inches tall or vining	14

1. See Weeds Controlled or Suppressed section for a complete listing of weeds controlled or suppressed.

Crop Rotation Intervals

Residues of CleanWave in treated plant tissues, including the treated crop or weeds, which have not completely decayed may affect succeeding crops. The intervals in the table below are based on average annual precipitation, regardless of irrigation practices. Observance of recommended crop rotation intervals should result in adequate safety to rotational crops. However, CleanWave is dissipated in the soil by microbial activity and the rate of microbial activity is dependent upon several interrelating factors including soil moisture, temperature and organic matter. Therefore, accurate prediction of rotational crop safety is not possible. In areas of low organic matter (<2.0%) and less than 15 inches average annual precipitation, potential for crop injury may be reduced by burning or removal of plant residues, supplemental fall irrigation and deep moldboard plowing prior to planting the sensitive crop.

Note: Numbers in parenthesis (-) refer to footnotes below.

Rotation Crops	Rotation Interval (Months)
grasses, wheat (including durum)	0
barley, field corn, grain sorghum, millet, oats, rye, sweet corn, triticale	4
canola (rapeseed), flax, mustard, popcorn	9
alfalfa, chickpea, dry bean, field pea, lentil, soybean, safflower, sunflower, sugarbeet, potato	18
crops not listed	24 (1)

1. A field bioassay is recommended prior to planting any broadleaf crop that is not listed in the table above under Rotation Crops. Do not rotate to unlisted crops for at least 24 months after application.

Field Bioassay Instructions: In a representative section of a field previously treated with this product, plant short test rows of the intended rotational crop across the original direction of application in a manner to sample variability in field conditions such as soil texture, soil organic matter, soil pH, or drainage. The field bioassay can be initiated at any time between harvest of the treated crop and before the planting of the intended rotational crop. Observe the test crop for herbicidal activity, such as poor stand (effect on seed germination), chlorosis (yellowing), and necrosis (dead leaves or shoots), or stunting (reduced growth). If herbicidal symptoms do not occur, the test crop may be planted. If herbicidal activity is observed, do not plant the field to the test rotational crop; plant only a labeled crop or crop listed in the table below for which the rotational interval has clearly been met.

Restrictions:

- **Preharvest Interval:** Do not apply within 14 days of harvest for hay or within 50 days of harvest for grain and straw.

CLEANWAVE (A.I. AMINOPYRALID)
EPA REGISTRATION NUMBER: 62719-525
NOTIFICATION OF MINOR LABEL CHANGE PER PR NOTICE 98-10

Enclosed please find labeling for the notification action of CleanWave™ herbicide. A supplemental label is being created for use only in the following states: Colorado, Kansas, Nebraska, Washington, and South Dakota. This supplemental label contains use directions taken from the EPA-accepted copy of the main label dated December 2, 2005.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Contents of Submission

- Transmittal document (this letter)
- Application for Pesticide, EPA Form 8570-1
- Label entitled CleanWave (P5F / CleanWave / Sec 3 Suppl CO KS NE WA SD / Notif / 03-17-06)
(2 Pages plus Registration Notes) (5 Copies)

If you require further information, please contact Amy Hudson, Regulatory Specialist at (317) 337-3967 or Alice Watters, Registration Assistant for this product, at (317) 337-5364.

Sincerely,

A handwritten signature in cursive script that reads "Amy Hudson".
