Ms. Barbara J. Kaminski  
Dow AgroSciences, LLC  
9330 Zionsville Road  
Indianapolis, IN 46268

Dear Ms. Kaminski:

Subject: SureStart Herbicide (Fall and Spring Early Preplant Application)  
EPA Registration No. 62719-570  
Application Dated December 5, 2007

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended is acceptable. A stamped copy of labeling is enclosed for your records.

Supplemental labeling must be incorporated into master labeling and copies of master labeling submitted to the Agency for our files at your next printing or within two years from the date of acceptance of supplemental labeling whichever comes first. The Agency will consider a convincing argument as to why a supplemental label should not appear on a master label on a case by case basis.

Sincerely,

*Victoria K. Walters for*

Dow AgroSciences LLC 9330 Zionsville Road Indianapolis, IN 46268-1054 USA

## SureStart™ EPA Reg. No. 62719-570

### Fall and Spring Early Preplant Applications

- ATTENTION**
- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
  - This label must be in the possession of the user at the time of pesticide application.
  - Read the label affixed to the container for SureStart™ herbicide before applying. Follow all applicable use directions and precautions on the EPA-registered label.
  - Use of SureStart according to this supplemental labeling is subject to all restrictions and limitations imposed by the label affixed to the product container.

### Directions for Use

Refer to product label for General Use Precautions, Mixing and Application instructions.

SureStart™ herbicide may be applied in the fall or early spring at 2 – 3 pints per acre.

**Spring Early Preplant Applications:** On medium and fine textured soils, SureStart may be applied 21 or more days prior to planting. If the application is made less than 21 days prior to planting, please refer to product label for specific use rate recommendations.

**Fall Applications:** Following soybean harvest, apply to soybean stubble after October 15, when the sustained soil temperature at 4-inch depth is less than 50 degrees F, but before ground freezes. Use on medium and fine textured soils with greater than 2.5% organic matter. Only corn may be planted the following spring. Ground may be tilled before or after application. Do not exceed 2-inch incorporation depth if tilled after application. If a spring application is made, the total rate of the fall plus spring application must not exceed 3.5 pints per acre.
