OFFICE OF
PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

NOV - 5 2008

Ms. Barbara J. Kaminski
Dow AgroSciences, LLC
9330 Zionsville Road
Indianapolis, IN 46268

Dear Ms. Kaminski:

Subject: Sure Start Herbicide (Use on Herbicide Tolerant and Conventional Field and Silage
Corn)
EPA Registration No. 62719-570
Application Dated October 17, 2008

The labeling referred to above, submitted in connection with registration under the Federal
Insecticide, Fungicide, and Rodenticide Act as amended is acceptable. A stamped copy of
labeling is enclosed for our records.

Supplemental labeling must be incorporated into master labeling and copies of master labeling
submitted to the Agency for our files at your next printing or within 2 years from the date of
acceptance of supplemental labeling, whichever comes first. The Agency will consider a
convincing argument as to why a supplemental label should not appear on a master label on a
case by case basis.

Sincerely,

James A. Tompkins

SureStart™

EPA Reg. No. 62719-570

For Use On Herbicide Tolerant and Conventional Field and Silage Corn

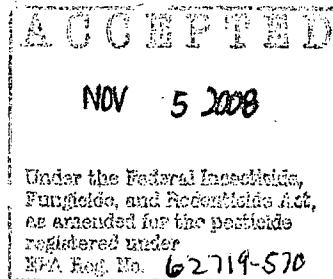

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of pesticide application.
- Read the label affixed to the container for SureStart™ herbicide before applying. Follow all applicable use directions and precautions on the EPA-registered label.
- Use of SureStart according to this supplemental labeling is subject to all restrictions and limitations imposed by the label affixed to the product container.

Directions for Use

Refer to product label for Directions for Use, General Use Precautions, Mixing and Application instructions.

SureStart™ herbicide is designed for use on herbicide tolerant field corn and silage corn such as Roundup Ready® or Liberty Link® field and silage corn. SureStart may also be used on conventional field and silage corn at specified use rates for early season foundation weed control. This will allow for optimal timing of a sequential postemergence corn herbicide.
