Subject: Label Amendment – Adding states to supplemental label for dry bulb onions
Product Name: Starane Ultra
EPA Registration Number: 62719-577
Application Date: February 22, 2016
Decision Number: 515018

Dear Mr. Ouimette:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

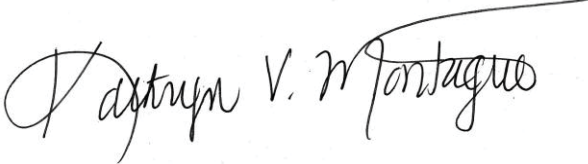

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance

Decision No. 515018

with FIFRA section 6. If you have any questions, please contact Emily Schmid by phone at 703-347-0189, or via email at schmid.emily@epa.gov.

Sincerely,

A handwritten signature in black ink that reads "Kathryn V. Montague". The signature is written in a cursive style with a long, sweeping horizontal line extending from the end of the name.

Starane[®] Ultra

EPA Reg. No. 62719-577

Control of Kochia, Volunteer Potatoes, and Other Susceptible Broadleaf Weeds in Dry Bulb Onions

This supplemental label expires April 1, 2020, and must not be used or distributed after this date.

(For Distribution and Use Only in the States of Colorado, Idaho, Michigan, Oregon, Texas, Utah,
Washington, and Wisconsin)

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Starane[®] Ultra herbicide before applying. Follow all applicable directions, restrictions, PPE requirements and precautions on the label affixed to the container for Starane Ultra.
- Use of Starane Ultra according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Starane Ultra.

WARNING

AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

Directions for Use

Starane[®] Ultra may be applied for postemergence control of kochia, volunteer potatoes, and other susceptible broadleaf weeds in dry bulb onions using ground or aerial application equipment. Refer to the product label for Starane Ultra for a complete list of weeds controlled. Follow all mixing and application instructions in the Product Information section of the product label for Starane Ultra.

Rate and Application Timing: Apply 0.35 pint Starane Ultra as a broadcast postemergence treatment. Volunteer potatoes, kochia, and other susceptible target weeds should be from 4 to 8 inches tall for optimum control.

Broadcast (over-the-top) application may be made to dry bulb onions from the 2 true leaf stage through the 6-leaf stage. Application to dry bulb onions beyond the 6-leaf stage should be made as a directed spray using drop nozzles (see crop injury warning below). Do not apply as a broadcast over-the-top spray after the 6-leaf stage of growth. Tank mix combinations with other herbicides registered for use in dry bulb onions may result in unacceptable crop injury. Adjuvants are not recommended with Starane Ultra applications in dry bulb onions.

Sequential Applications: To control heavy populations or successive flushes of kochia, volunteer potatoes, or other susceptible broadleaf weeds, two postemergence applications can be made on a 10- to 14-day re-treatment interval. Do not make more than two applications per season.

Crop Injury Warning: Crop injury such as but not limited to leaf twisting may occur with some onion cultivars when Starane Ultra is applied as a broadcast treatment, especially when applications are made to larger dry bulb onions. Do not use Starane Ultra if the risk of injury is unacceptable.

Specific Use Restrictions:

- Do not allow livestock to graze treated areas or harvest treated forage within 7 days of application.
- **Preharvest Interval (PHI):** Do not apply within 42 days of onion harvest.
- Do not make more than 2 applications per season.
- **Plant-Back Restriction:** Plant only labeled crops within 120 days of application.
- **Chemigation:** Do not apply through any type of irrigation system.
- Do not apply Starane Ultra when furrow irrigation is running. Manage treated fields to avoid water runoff for at least 6 hours after application.
