#### ENVIRONMENTAL HAZARDS

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes.

#### DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with it's labeling. FICSAN PLUGS are recommended for killing trees in forests, parks, fence rows, in highway and railroad right-of ways, and industrial and residential sites.

Do not apply this product in a way that will contact workers or other persons, ether directly or through drift. Only protected handlers may be in the area during application. For any

requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

#### AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE). The requirements in this box apply to uses of this product that are covered by the Worker Protection Standard.

FICSAN PLUGS may be used for killing trees in areas where surface water is present or in intertidal areas, however do not apply to trees that may later be standing in water above the point of injection.

FICSAN PLUGS will kill the fallowing species: Ash, Oak, Aspen (quaking), Sourwood, Dogwood, Sumac, Willow, Elm, Sweet Gum, Hawthorn. Trees will die if injected with FICSAN PLUGS. Inject the plugs only with FIC tools. For effective results, the plugs must be applied such that the contents of the active ingredient is in direct contact with the tree's phloem tissue (the first living tissue under the bark)

For trees with 2.5 inches or less diameter at breast height (DBH), inject one FICSAN PLUG per tree. For trees greater than 2.5 inches DBH, inject one FICSAN PLUG every 6-8 Inches, evenly around the circumference of the tree at breast height.

The contents of the FICSAN PLUG moves throughout the tree from the point of injection to all roots and shoots. Effects appear gradually (normally within 2 to 4 months during the vegetative growth stage of the treated trees) beginning with wilting, fallowed
