DRAFT LABEL

Stabilized  
1-in. Tablets

An organic chlorinating  
concentrate  
for swimming pools.

ACCEPTED  
with COMMENTS  
in EPA Letter Dated:

MAR 5 1990

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act as  
amended for the pesticide  
registered under Reg. No.

63084-1

ACTIVE INGREDIENT:

Trichloro-s-triazinetrione\* ..... 98.4%

INERT INGREDIENTS: ..... 1.6%

TOTAL ..... 100.0%

\* Each tablet weighs 0.5 Oz. and contains 90%  
available chlorine.

KEEP OUT OF REACH OF CHILDREN

DANGER

STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED, Drink Promptly a large quantity of water Avoid  
Alcohol. Call physician immediately.

IF ON CLOTHING, Remove and wash contaminated clothing before reuse.

IF IN EYES, Flush with plenty of water. Get medical attention.

IF ON SKIN, Wash with plenty of soap and water. If irritation  
persists, seek medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the  
use of gastric lavage.

NET WT. 50 LBS.

Challenger Mfg., Inc.

EPA Reg. No.: 63084-

EPA Est. No.: 63084-IL-001

Under the Fungicide, Insecticide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 63084-1 (Back Panel)

**STABILIZED CHLORINATING TABLETS** - Slow dissolving tablets to provide continuous chlorination to control bacteria and algae.

**DIRECTION FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Initially pre-condition your pool water with STABILIZER. Follow directions on the label of that product.

**RECOMMENDED DOSAGE:** For each 15,000 gals. of pool water, place 10 tablets (5 oz. by wt.) in the skimmer basket. Allow 8 to 12 hrs. for chlorine residual to equalize. Initial treatment will last from 2 to 4 days depending on water temperature and flow rate through the skimmer. Chlorine residual should be maintained between 1.5 and 2.0 ppm as determined by a suitable test kit. If daily testing indicates the chlorine level to be low, increase the number of tablets in the skimmer basket. If daily testing indicates the chlorine level to be higher than 2.0 ppm, reduce the number of tablets accordingly. Once every two weeks a shock dose of 5 ppm chlorine should be made to prevent the development of resistant species of algae. STABILIZED CHLORINATING TABLETS are not recommended for this purpose. STABILIZED CHLORINATING GRANULES used at the rate of 1/2 lb. per each 1000 gallons of water will satisfy this requirement when used in conjunction with STABILIZED CHLORINATING TABLETS. Keep pH of water between 7.2 and 7.6 as determined by a suitable test kit.

**STORAGE AND DISPOSAL:** Do not contaminate water, food or feed by storage or disposal. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Keep product dry in a tightly closed container when not in use. Store in a cool, dry, ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.

**PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS:**  
**DANGER:** Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not

(Back Panel Cont.)

discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS - STRONG OXIDIZING AGENT:** Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, dirt, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

**TRICHLORO-S-TRIAZINETRIONE  
OXIDIZER UN 2468**

**ACCEPTED**  
with **COMMENTS**
