Stabilized Chlorinating Granules

7M 35 80

Under the Federal Insecticite, Pungleide, and Robertside Act as amended, for the posticide registered under DPA Reg. No. 63084-4

ACTIVE INGREDIENT:

00.49

Sodium dichlorc-s-triazine+rione* 98.4%

INERT INGREDIENTS: 1.6%

* Provides 62% available chlorine.

KEEP OUT OF REACH OF CHILDREN

DANGER

STATEMENT OF FRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED, Prink Promptly a large quantity of water. Avoid Alcohol. Call physician immediately.

IF ON CLOTHING, Remove and wash contaminated clothing before reuse.

IF IN EYES, Flush with plenty of water. Get medical attention.

IF ON SKIN, Wash with plenty of soap and water. If irritation persists, seek medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

NET WT. 25 LBS.

Challenger Mfg., Inc. 1233 Naperville Drive Romeoville, IL 60441

EPA Reg. No.: 63084-

EPA Est. No.: 63084-IL-001

Under the femoral incorrection, Provided, and Rederited & Act as amended, for the postleide registered under EPA Reg. No.

(Back Panel)

DIRECTION FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

RECOMMENDED DOSAGE: Initially the pool should be treated with repeated dosages of 1 to 1 1/2 oz. of STABILIZED CHLORINATING GRANULES for each 10,000 gallons of pool water to satisfy the chlorine demand of the water. 1 oz. of STABILIZED CHLORINATING GRANULES per 10,000 gallons of water will apply approximately 0.5 ppm available chlorine. To maintain a desired level of 1.5 to 2.0 ppm of chlorine residual, add 1 to 1 1/2 oz. of STABILIZED CHLORINATING GRANULES for each 10,000 gallons of water daily or as needed. Once every two weeks a shock dose of 5 ppm of chlorine should be made to prevent development of resistant species of algae. Keep pH of water between 7.2 and 7.6. Use a test kit for chlorine and pH control.

STABILIZED CHLORINATING GRANULES is a fast dissolving stabilized chlorine germicide and algaecide.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Keep container tightly closed. Store in a dry place. Do not allow water to get into container. In case of fire, if possible isolate container in open air or well ventilated area. Flood with large volume of water. In case of contamination or decomposition, do not reseal container. Triple rinse the container before disposal. Puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC AXINALS: DANGER: Highly corrosive. Causes skin and eye damage. Irritating to nose and throat. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing dust or fumes. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

(Back Panel Cont.)

PHYSICAL AND CHEMICAL HAZARDS - STRONG OXIDIZING AGENT: WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRRITATING AND HAZARDOUS CHLORINE-CONTAINING GASES. DECOMPOSES AT 460° to 480°F WITH LIBERATION OF HARMFUL GASES. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, dirt, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.
