**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Use outdoors on or around patios, porches, etc. Keeps area free from mosquitoes for up to 4 hours in still air. Repels mosquitoes quick!

Remove Family Mosquito Repellent Stick [stick] from box. Ignite tip until it flames and invert to further ignite body of the stick. When this occurs, blow out flame. It will now burn without flame and create a smoke to repel mosquitoes. Place bottom of stick end into ground around area to be protected, or if ground is not accessible in/around area; into containers (such as garden pots) filled with sand or dirt.

Place Family Mosquito Repellent Sticks [sticks] every 10-12 feet. To extinguish, gently knock off glowing tip and extinguish tip into ground, dirt or sand.

**Note:** If cracks appear in body of stick, this is normal and in no way impedes its effectiveness.

**Storage and Disposal**

Do not contaminate water, food or feed by storage or disposal.

**Pesticide Storage:** Do not store near sources of heat or open flame. Store in original container in a cool, dry (preferably locked) area inaccessible to children or pets. **Pesticide/Container Disposal: If empty:** Non-refillable container; do not reuse or refill this container. Offer for recycling if available. **If partly filled or for unused sticks:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

{Per PR Notice 2007-4 the batch code/lot number will appear on the label or container.}
