Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Biopesticides and Pollution Prevention Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is unconditionally registered in accordance with FIFRA sec. 3 (c) (5). Once a pesticide is registered, however, it is not regarded as permanently acceptable.

Registration does not eliminate the need for continual reassessment of pesticides. If EPA determines at any time, that additional data are required to maintain in effect an existing registration, the Agency will require submission of such data under section 3(c) (2) (B) of FIFRA.

1. Make the following label changes:

- a. Add the phrase "EPA Registration Number 63823-35". to your label before you release the product for shipment.
- b. Change the caption "Inert Ingredient" to read "Other Ingredient".

2. Submit five copies of the final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6 (e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

DIRECTIONS FOR USE:

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

The **STICK-UP Roach Trap** has a house-like shape and comes with an attractant which lures the cockroach inside the trap where they are caught by a special adhesive surface. Once trapped, the cockroach will not escape due to the strong adhesive. Under opened condition, the adhesive remains sticky for approximately one month.

The **STICK-UP Roach Trap** can be used both as a monitoring device and as a control treatment when used at sufficiently high densities. **FOR MONITORING:** Place traps at a density of 1-2 per 100 sq. ft. **FOR COCKROACH CONTROL:** Place traps at a density of 3-5 per 100 sq. ft.

Instructions:

- Peel off the paper covering the sticky surface.
- Remove the attractant tablet from the foil and place it in the center of the adhesive-coated surface. In the event of contact with skin or clothing, the adhesive can be removed with household cleaners.
- Close the trap to form a "mini-house" shape.
- Do not place traps in areas accessible to children or pets.
- Place the traps in any dark or humid area where cockroaches and other crawling insects are usually found (near plumbing; under and behind sinks; in corners and cracks; behind refrigerators, stoves, dishwashers, etc.; in bathrooms; around laundry machines; in refuse storage areas; etc.). Avoid direct sunlight.
- Do not allow children or pets to play with traps.
- When trap is filled with cockroaches, fold it up, wrap in newspaper, and discard in trash.
- Place out new traps as described above.

STORAGE AND DISPOSAL

STORAGE: Store in tightly-sealed container in cool, dry place and out of reach of children.

CONTAINER DISPOSAL: Wrap container in newspaper and discard in trash.
