PRECAUTIONARY STATEMENTS

CAUTION

HAZARDS TO HUMAN AND DOMESTIC ANIMALS

Harmful if swallowed. May be absorbed through skin. May cause eye irritation. Do not breathe vapor. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and warm water after use. Avoid contamination of feed or foodstuffs. When spraying rooms, rugs and carpets, remove pets, birds, plants and cover (and turn off) aquariums before spraying. Do not remain in enclosed areas after use. This product is not for use on humans. Do not allow children or pets to contact treated areas until surfaces are dry.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to any body of water. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters.

PHYSICAL OR CHEMICAL HAZARDS

Caution! Container under pressure. Operates with propane-butane propellant. Highly inflammable. Protect from direct sunlight, heat or open flame. Keep away from sources of combustion. Exposure to temperature above 130° F (54°C) may cause bursting. Do not spray close to naked flames or incandescent bodies. Do not smoke during application. Do not puncture or incinerate container, even after use.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Introduction:

MCSI METHOPRENE BASED RESIDUAL FLEA KILLER AEROSOL contains Insect Growth Regulator (IGR), and insecticide combination for indoor control of FLEAS and TICKS ensuring 6 months residual effect. The aerosol gives protection against both adult and larva fleas. Methoprene, the (IGR), works specifically on pre-adult fleas, preventing them from maturing into biting adults. Pyrethrins and permethrin, which efficacy is enhanced by special synergist, kill adult ticks fleas and other insects very quickly and effectively. MCSI METHOPRENE BASED RESIDUAL FLEA KILLER AEROSOL is especially developed for surface treatment. Do not spray pets!

Application:

Cover or remove food, dishes and food-containers. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. Cover

(and unplug) aquariums and remove birds and other pets before treatment. Vacuum thoroughly before spraying. A test application should be made to upholstery or drapery fabrics in an inconspicuous place before use.

Shake well before using. The container should be held about 30 cm (one foot) from the surface to be treated. Spray uniformly the entire floor and the walls up to 1 m (≈ 3 feet) height. Apply uniformly with sweeping motion. Give special attention to cracks and crevices. Also treat carpets, rugs, tiles, furniture, under furniture cushions, pet bedding and places where pets like to rest. Only complete coverage will provide complete flea elimination, but avoid thorough wetting the area that needs treating. Avoid contact with treated surfaces until dry.

For best results, use MCSI METHOPRENE BASED RESIDUAL FLEA KILLER AEROSOL prior to the flea season and repeat treatment after half a year. In case the spray is washed off, repeat treatment.

Flea control on pets is important in prevention of introduction of adult fleas indoors. When using this product and fleas are problems on pets, the pets should be treated with an effective registered flea control product to prevent the introduction of adult fleas indoors.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store in a cool, dry place, away from heat, sparks and open flame. Keep container closed and well away from reach of children and animals.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Do not reuse empty container. Wrap container and put in trash. Do not puncture or incinerate.

WARRANTY AND CONDITIONS OF SALE

Seller makes no warranty, express or implied, concerning the use and handling of this product other than indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling are contrary to label instructions.
