Modesto, CA 95358

Subject: Amended Reregistration Label  
Product Name: Clearaid SCP  
EPA Registration Number: 63838-8  
Decision Number: 455710

Dear Mr. Harvey:

The Agency, in accordance with the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, has completed reviewing all of the information submitted with your application to support the reregistration of the above referenced product in connection with the Busan 77 RED, and has concluded that your submission is acceptable. The label referred to above, submitted in connection with registration under FIFRA, as amended, is acceptable.

NOTE: This product is **not** yet being reregistered under section 4(g) of FIFRA.

Please note that the record for this product currently contains the Confidential Statements of Formulation for the Basic dated May 29, 2012 and Alternate 1 dated July 1, 2009. Any previously dated CSFs are superseded.

A copy of your label stamped "Accepted" is enclosed. Products shipped after 12 months from the date of this amendment or the next printing of the label, whichever occurs first, must bear the new revised label. Your release for shipment of the product bearing the amended label constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6.

If you have any questions about this letter, please contact Terria Northern by phone at 703-347-0265, or via email at [northern.terria@epa.gov](mailto:northern.terria@epa.gov).

Sincerely,

A handwritten signature in red ink that reads "Jacquelin Hardy".

Product Manager (34)  
Regulatory Management Branch 2  
Antimicrobials Division (7510P)

# CLEARAID™ SCP

## ACTIVE INGREDIENT:

Poly [oxyethylene(dimethyliminio)ethylene(dimethyliminio)ethylene dichloride]..... 60.0%  
 OTHER INGREDIENTS..... 40.0%  
 TOTAL..... 100.0%

## KEEP OUT OF REACH OF CHILDREN

### CAUTION

FIRST AID	
<b>If in Eyes</b>	-Hold eye open and rinse slowly and gently with water for 15-20 minutes. -Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. -Call a poison control center or doctor for further treatment advice.
<b>If on Skin</b>	-Take off contaminated clothing. -Rinse skin immediately with plenty of water for 15-20 minutes. -Call a poison control center or doctor for further treatment advice.
<b>If Swallowed</b>	-Call poison control center or doctor immediately for treatment advice. -Have person sip a glass of water, if able to swallow. -Do not induce vomiting unless told to do so by the poison control center or doctor. -Do not give anything by mouth to an unconscious person.
<b>If Inhaled</b>	-Move person to fresh air. -If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible. -Call a poison control center or doctor for further treatment advice.
<b>HOTLINE NUMBER</b>	
Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.	

**IN CASE OF EMERGENCY ENDANGERING LIFE OR PROPERTY, CALL: 800-424-9300**

## PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

### CAUTION:

Harmful if swallowed. Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco and using the toilet. Remove and wash contaminated clothing before reuse.

All mixers, loaders, applicators and other handlers must wear long sleeved shirt and long pants, socks and shoes, chemical-resistant gloves, chemical-resistant apron and chemical-resistant eyewear.

**User Safety Requirements:** Follow manufacturer's instructions for cleaning/maintaining Personal Protective Equipment (PPE). If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have been drenched (except as required by directions for use) or heavily contaminated with this product's concentrate. Do not reuse them.

**User Safety Recommendations:** User should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. User should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. User should remove PPE immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish, aquatic invertebrates and clams. Do not discharge effluent containing this product into lakes, streams, ponds or estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharging. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

## STORAGE AND DISPOSAL

**DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.**  
**PESTICIDE STORAGE:** Do not stack more than four (4) drums high. Leaking or damaged drums must be placed in over-pack drums for disposal. In case of spills, absorb with sawdust or sand and dispose of in a sanitary landfill. Keep container closed when not in use.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not use this container to hold materials other than pesticides or dilute pesticides (rinstate). After emptying and cleaning, it may be allowable to temporarily hold rinstate or other pesticide-related materials in the container. Contact your state regulatory agency to determine allowable practices in your state. Clean container promptly after emptying. Offer for recycling if available. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinstate into application equipment or a mix tank or store rinstate for later use or disposal. Repeat this procedure two more times.

## DIRECTIONS FOR USE

**It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**

Clearaid SCP is used to control the growth of algae in swimming pools, heated swimming pools, exterior whirlpools, hot baths, and decorative fountains and ponds. It is used to control algae, bacteria, and fungi in recirculating commercial and industrial cooling water towers and as a preservative for aqueous metalworking fluids.

### COOLING WATER TOWERS

Prior to using Clearaid SCP in cooling water towers, clean and remove heavy algal growth, microbiological slime, and other deposits. Then make an initial slug addition of 0.9-2.2 fluid ounces of Clearaid SCP per 1000 gallons of water to provide 8-20 ppm Clearaid SCP, based on the total weight of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 0.2-2.2 fluid ounces of Clearaid SCP per 1000 gallons of water (2-20 ppm) every 2-5 days or as needed. The frequency of addition depends upon the relative amount of bleed-off and the severity of the microbiological problem. Slug additions must be made in the cooling water tower sump.

### INDUSTRIAL AIR WASHING SYSTEMS

Clearaid SCP is used to control bacteria in industrial air washing systems that maintain effective mist eliminating components. Prior to this product's use, clean or remove heavy growths of algae or other deposits. An initial slug dose of 3.33-5.55 fluid ounces of Clearaid SCP per 1000 gallons of water. Repeat initial dosage until control is evident. Subsequent slug additions of 2.25-5.55 fluid ounces of Clearaid SCP per 1000 gallons of water must be employed every 1-5 days, or as needed. The frequency of addition depends upon the relative amount of bleed-off and severity of the bacterial problem. Slug additions may be made to the sump or to the water collection trays of the air wash system.

### SWIMMING POOLS, HEATED SWIMMING POOLS, EXTERIOR WHIRLPOOLS, AND HOT BATHS

For maximum effectiveness of Clearaid SCP in swimming pools, heated swimming pools, exterior whirlpools, and hot baths, those with heavy growths of algae must be cleaned prior to using Clearaid SCP. For pools having just visible algae growth, add an initial dose of 11-17 fluid ounces of Clearaid SCP per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool, add initially 6-11 fluid ounces of Clearaid SCP per 10,000 gallons of water. To maintain pools free of visible algae growth, subsequent additions of 2-4 fluid ounces of Clearaid SCP per 10,000 gallons of water must be made every 5-7 days after the initial treatment.

Uniform distribution of Clearaid SCP throughout the water in the pool is necessary for maximum effectiveness. Clearaid SCP is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. Clearaid SCP can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Clearaid SCP with concentrated dry or liquid chlorine products.

### DECORATIVE/ORNAMENTAL WATER SYSTEMS

Clearaid SCP is used to control the growth of algae in fresh or recycled water features, ponds and lined reservoirs for non-potable uses. Clean systems containing heavy growths of algae or other deposits prior to treatment. Systems with just-visible algae growth require an initial dose of 1.0-2.0 fluid ounces of Clearaid SCP per 1000 gallons of water in the system. To treat a freshly cleaned and filled system, add 0.5-1.5 fluid ounces of Clearaid SCP per 1000 gallons of water. Maintenance dosages of 0.2-0.5 fluid ounces of Clearaid SCP per 1000 gallons of water must be added as needed every 5-7 days, or on a continuous basis for larger systems. Additions of Clearaid SCP must be made at a point to ensure uniform distribution throughout the system. Clearaid SCP may be used in systems treated with chlorine chemicals and may reduce the amount of those chemicals normally required, but do not mix Clearaid SCP with concentrated dry or liquid chlorine products.

### PAPER MANUFACTURE

**Pulp, Paper, and Paperboard Mills:** This product is only for use in non-food applications, such as Brown Paper mills, Sheet for Corrugated Board, Kraft Paper, newsprint and similar paper/paperboard not intended for food contact uses. Clearaid SCP will retard microbial growth that causes degradation of cooked starch used in paper manufacture. Clearaid SCP is added at a rate of 25-250 ppm based on the total weight of the starch and water. The treatment rate necessary to retard spoilage of the starch will vary with the extent of contamination of the make-up water and the length of storage.

### WATER BASED METALWORKING AND CUTTING FLUIDS

May be used for the inhibition of bacterial degradation of aqueous solutions or emulsions employed as lubricants or coolants in the machining and processing of metals. This product is acceptable to use with fluids based on amines, borates, phosphates, nitrates and similar formulas. Do not use with insoluble or straight oils or with fluids or products that contain anionic detergents/surfactants. For the preservation of aqueous cutting fluids or emulsions add this product at the rate of 0.01-0.1 % by volume to the volume of diluted cutting or metalworking fluid. It may be necessary to retreat the cutting fluid every 2-4 weeks. The treatment amount and frequency may be adjusted in each situation by using bacteriological testing procedures to confirm efficacy.
