## PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

### DANGER

**CORROSIVE. CAUSES IRREVERSIBLE EYE DAMAGE. MAY BE FATAL IF SWALLOWED. HARMFUL IF INHALED OR ABSORBED THROUGH SKIN. CAUSES SKIN BURNS. PROLONGED OR FREQUENTLY REPEATED SKIN CONTACT MAY CAUSE ALLERGIC REACTIONS IN SOME INDIVIDUALS.**

#### PERSONAL PROTECTIVE EQUIPMENT

Applicators and other handlers must wear:

- Coveralls worn over long sleeved shirt and long pants
- Chemical resistant footwear plus socks
- Goggles (required) with or without face shield
- Chemical resistant gloves (such as barrier laminate, neoprene rubber, nitrile rubber, or PVC)
- Chemical resistant apron (for mixing/loading)
- Particle mask covering nose and mouth

**APPLICATION RESTRICTIONS:** Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

**ENGINEERING CONTROLS:** When handlers are using closed or metering systems the handler requirements may be reduced or modified to long-sleeved shirt, long pants, shoes and socks.

**USER SAFETY REQUIREMENTS:** Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

**USER SAFETY INSTRUCTIONS:** Users must wash hands before eating, drinking, chewing gum, using tobacco, or using toilet. User must remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users must remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

#### ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic organisms. Do not contaminate water by cleaning of equipment or disposal of waste. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

#### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.  
**PESTICIDE STORAGE:** To maintain product quality, store at temperatures below 100°F (38°C). Keep container tightly closed when not in use. Do not remove product from container except for immediate use. Do not store with foods, feeds, drugs, or clothing.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use, according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER HANDLING:** Nonrefillable container. Do not use this container to hold materials other than pesticides or dilute pesticides (rinsate). Clean container promptly after emptying. Offer for recycling if available or puncture and dispose in a sanitary landfill. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store for later use or disposal. Repeat this procedure two more times. Contact your state regulatory agency to determine allowable practices in your state.

#### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

#### DIRECTIONS FOR USE IN ENHANCED AND SECONDARY OIL & GAS RECOVERY and WATER FLOODING SYSTEMS:

Add this product at any point in the system where uniform mixing can occur. Being a slow release granular biocide, it is important to add the product with equipment capable of feeding this product flow proportionally to the total flow of fluid being injected into the formation.

**CONTINUOUS DOSING METHOD:** For controlling slime-forming, sulfide and acid-producing bacteria, yeasts, and fungi in oil and gas field water, polymer or micellar floods or other oil and gas field water systems, add 10-80 ppm of this product (4-32 pounds) per 1,000 barrels of water depending on the severity of the contamination.

**INTERMITTENT OR SLUG DOSE METHOD:** When the system is noticeably fouled, add 40-200 ppm of this product (15-75 pounds) per each 1,000 barrels of water intermittently for 4-8 hours per day and from 2-4 times per week, or as needed depending on the severity of the contamination. Adjust the amount of this product used as the microbiological condition improves.

**NOTE:** For control of bacteria, yeast, and fungi in aqueous solutions specific to hydraulic flooding or fracturing (frac) operations, add 15-80 ppm of this product (5.5-32 pounds) per 1,000 barrels of water. Add anywhere upstream or directly to the chemical feed hopper containing the slickwater additives, biopolymer gel and proppant prior to injection into the formation. Uniform addition to the downhole fluid mixture will insure consistent results.

*\*The active ingredients will slowly be released over a period of ~4-7 days under most conditions. Therefore the ppm's given above are based on the total actives released over this time frame.*
