ACTIVE CARBON INDIA LTD. BACTERIOSTATIC WATER TREATMENT MEDIA

Type: IND 101 PRODUCT DESCRIPTION:

Type: IND 101 manufactured by Active Carbon India Ltd., is produced from a premium grade granular activated carbon product from coconut-shell char. This base material is proven to be an effective media to remove objectionable taste and odor.

The metallic Silver Impregnant associated with this carbon base is also known to be a bacteriostatic agent. Elemental Silver inhibits the growth of bacteria in the media. Many organic compounds that builds up slowly in the filter media provides a source of nutrients for the bacteria, which becomes potential breeding ground during the non-use periods of the filter. Metallic Silver acts as a bacteriostatic agent and inhibits the growth of bacteria, during the non-usage of the filter.

PRODUCT APPLICATION OF ACTIVE CARBON INDIA LTD.- TYPE: IND 101 :

Silver Impregnated carbon is designed solely as a treatment media for use in the fabrication of water filters for home, hospital, and also during travel. Filter manufacturers in the U.S.A. are responsible for supplying data to United States Environmental Protection Agency to support the registration of their final products.
