FIRE ANT KILLER

claims for front or back panel

- Kills native and imported fire ants.
- Guaranteed to work or [your] Money back (see back panel)
- Kills the queen and [destroys] the [entire] colony.
- Easy to use.
- Unique, [delayed] action formula -or- bait allows ant to carry bait back to the nest where the entire colony is killed.
- Kills [fire] ant colonies within one week.
- Granules are easily carried back to the colony.
- Granules are tiny and blend-in with dirt and sand.
- Light brown coloring allows bait to blend-in with dirt and sand.
- Gets to the source of infestation.
- Does not repel [fire] ants.
- Destroys [Fire] Ant mounds.
- The granules attract worker [fire] ants who carry the bait back to the nest where the entire colony, including the queen, is killed.
- Concentrated formula
- Convenient, one-step process
- Prevents mounds from relocating
- Call the Combat® Labs [Information] Helpline at 1-800-426-6228 for more information.
- Destroys [10 to 20] (11.2 oz) -or- [30 to 60] (2.8) -or- [45 to 95] (3 lb) [Fire] Ant mounds
- Granules
- No Mixing
- Ready-to-Use
- Limits new mound formation

ACTIVE INGREDIENT: Hydroxymethylnon [Tetrahydro-5,5-dimethyl-2(1H)-pyrimidinone, (3-(4-(trifluoromethyl)phenyl)-1-(2-(4-(trifluoromethyl)phenyl)ethoxy)-2-propenylidene)hydrazono] 1.0%
 OTHER INGREDIENTS: 99.0%
 *Cas No. 67485-29-4

KEEP OUT OF REACH OF CHILDREN
CAUTION: See back panel for additional precautionary statements

Net Wt 11.2 oz (317.5 g) -or- _____

Now with COMBAT® Fire Ant Killer you can destroy [fire] ant mounds. COMBAT® Fire Ant Killer is a combination of (ant) food attractants -or- granules and a patented insecticide ingredient that is highly effective against [fire] ants. [The insecticide is specially formulated to allow time for worker ants which find the bait to carry it back to the queen and other ants before dying. If the queen isn't killed, the mound will be quickly repopulated or relocated and require repeat treatment. This product kills the queen, so it destroys the colony.]

- The granules attract worker [fire] ants who carry the bait back to the nest where the entire colony including the queen is killed.
- This unique, [delayed] action bait allows worker ants, looking for food and water, enough time to bring the granules back to their nest where the queen and the colony feeds on it and dies.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. [Contents of this box will treat 6 -or- _____ average size (approximately 28 inches in diameter) [fire] ant mounds.] Wear gloves when using the product and wash hands thoroughly after handling.

- For localized activity of [fire] ants [mounds, hills and trails], measure or sprinkle [2 to 5 level tablespoons (0.5 to 1.0 oz)] of Combat® Fire Ant Killer granules at the base of the ant mound or along ant trail. Do not use kitchen utensils for measuring. Do not put the granules directly in or on the mound. Be alert! Ants will relocate the mound. This will aggravate the ants and may cause them to relocate their mound. One container is sufficient to destroy [10 to 20] [fire] ant mounds. -or- (directions for tip and measure bottle) For localized activity of fire ants (mounds, hills and trails) turn the container upside-down to fill the dispensing chamber with Combat Fire Ant Killer granules. Sprinkle granules (approximately 2 to 5 level tablespoons per mound) around the base of the fire ant mound or along trail. Do not put the granules directly in or on the mound. Do not disturb the mound. This will aggravate the ants and may cause them to relocate their mound. One container will treat [10 to 20] (11.2 oz) -or- [30 to 60] (2 lb) -or- [45 to 95] (3 lb) fire ant mounds. Large mounds may require more.
- After application, you may see increased ant activity around Combat® Fire Ant Killer granules. Be alert! Spray or interfere with their feeding. The [fire] ants need time to take the granules back to the colony-or-hill-or-mound to kill the queen and entire colony.
- You should expect to see a significant reduction in [fire] ants within a week.
- If large colonies are present, a repeat treatment after one week may be necessary.
- For best results, apply Combat® Fire Ant Killer granules when ants are most active. This generally occurs during the early morning hours or at dusk. Avoid application during the heat of the day or if rain threatens.

PRECAUTIONARY STATEMENTS:

CAUTION: HAZARDS TO HUMANS AND DOMESTIC ANIMALS
 May be harmful if swallowed. Avoid contact with skin or eyes. Wash hands thoroughly after handling.
FIRST AID / STATEMENT OF PRACTICAL TREATMENT: If swallowed, drink one or two glasses of water. Call physician or poison control center at once. Do not induce vomiting or give anything by mouth to an unconscious person.
HAZARDS TO DOMESTIC ANIMALS: Pets may be attracted to this product. Keep pets away from treated areas for at least 24 hours after application.
ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of equipment washwaters.
STORAGE & DISPOSAL: Storage: Keep in original container. Store in cool, dry, secure place. [Prolonged exposure to air may turn product rancid.] Disposal: Do not use can -or- container. Discard in trash.
 Storage and disposal for oil-based product
 This product is formulated in an oil bait that functions as an attractant to ants. Prolonged exposure to air may turn oil rancid and reduce the attractiveness of the bait. Therefore, do not store any packets -or- containers which have been opened. Do not reuse empty packets -or- containers. Wrap packet -or- container and put in trash collection.
EFFECTIVENESS GUARANTEE: If this product fails to eliminate mound activity after 4 weeks, return the empty container for a full refund to [This package is sold by weight, not by volume. You can be assured of proper weight even though some settling of contents normally occurs during shipping and handling.]

This is how COMBAT® Fire Ant Killer granules work:

For questions or comments, please call [Call the Combat® Labs Information] Helpline at 1-800-426-6228 [for more information]

- Broadcast treatment: For general control of [fire] ants outdoors around your yard, sprinkle granules lightly in the yard. One package will treat [up to] a half acre -or- x square feet -or- yards.
 - For large, infested areas use a hand operated sprayer and broadcast Combat Fire Ant Killer granules at 2 to 4 ounces per 5,000 square feet (1 to 2 pounds per acre).
- Directions if sold in individual packets:**
- The amount of this product needed to treat an average size [fire] ant mound has been pre-measured into each single treatment packet. Using a pair of scissors, cut the packet along the dotted line and apply the entire contents of the packet uniformly around the base of the ant mound. Do not apply directly to the top of the mound and do not disturb the mound. (See illustration).
 - For best results, this product should be applied when ants are most active. This generally occurs during the early morning hours or at dusk. Avoid application during the heat of the day or if rain threatens.
 - Worker ants will find this product, carry it back to the mound, and pass it along to the queen and other ants before dying. Typically, the queen and a number of ants will be dead within a week and mound activity will gradually decline afterwards as no new ants are produced.
 - For particularly large ant mounds containing extreme numbers of ants, it may be necessary to apply a second packet to the mound. Refer to the illustration after treating the mound to see if you have enough product coverage.
 - Broadcast treatment: For general control of [fire] ants outdoors around your yard, sprinkle granules lightly in the yard. One package will treat [up to] a half acre -or- x square feet -or- yards.

Should you have any questions regarding this product, see stamped code on back -or- bottom of container, then call the Combat Labs Helpline for more information: 1-800-426-6228.
