**PRECAUTIONARY STATEMENTS:**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION:** Harmful if absorbed through skin. Avoid contact with eyes, skin or clothing. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

**FIRST AID:**

**IF ON SKIN:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. Questions? 1-800-426-6228.

**HAZARDS TO DOMESTIC ANIMALS:** Pets may be attracted to this product. Keep pets away from treated areas for at least 24 hours after application.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of equipment washwaters.

**ACCEPTED**

## — OVERVIEW —

**COMBAT®**  
FIRE ANT KILLER

### DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with the label.

### GENERAL INFORMATION

#### claims for front or back:

- Kills native and imported fire ants
- Guaranteed to work or [your] money back (see back panel)
- Kills the queen and [destroys] the [entire] colony
- Easy to use
- Unique, [delayed] action formula -or- bait allows ant to carry bait back to the nest where the entire colony is killed
- Kills [fire] ant colonies within one week
- Granules are easily carried back to the colony
- Gets to the source of infestation
- Destroys [fire] ant mounds
- The granules attract worker [fire] ants who carry the bait back to the nest where the entire colony, including the queen, is killed
- Concentrated formula
- Convenient, one-step process
- Prevents mounds from relocating
- Call the Combat® Labs [Information] Helpline at 1-800-426-6228 for more information
- Destroys [fire] ant mounds 10 to 20 **(11.2 oz)** -or- Destroys [fire] ant mounds 30 to 60 **(2 lb)** -or- Destroys [fire] ant mounds 45 to 95 **(3 lb)**
- Granules
- No mixing
- Ready-to-use
- Limits new mound formation

#### end of claims for front or back:

Now with COMBAT® Fire Ant Killer you can destroy [fire] ant mounds. COMBAT® Fire Ant Killer is a combination of (ant) food attractants -or- granules and a patented insecticide ingredient that is highly effective against [fire] ants. [The insecticide is specially formulated to allow time for worker ants which find the bait to carry it back to the queen and other ants before dying. If the queen isn't killed, the mound will be quickly repopulated or relocated and require repeat treatment. This product kills the queen, so it destroys the colony.]

- The granules attract worker [fire] ants who carry the bait back to the nest where the entire colony, including the queen, is killed.
- This unique, [delayed] action bait allows worker ants, looking for food and water, enough time to bring the granules back to their nest where the queen and the colony feed on it and die.

**EFFECTIVENESS GUARANTEE:** If this product fails to eliminate mound activity after 4 weeks, return the empty container for a full refund to

[This package is sold by weight, not by volume. You can be assured of proper weight even though some settling of contents normally occurs during shipping and handling.]

**COMBAT®** For questions or comments, please c/ [Call the Combat® Labs [Information] Helpline at 1-800-426-6228 [for more information]. 

This is how COMBAT® Fire Ant Killer granules work:

### GENERAL PRECAUTIONS AND RESTRICTIONS

Wear gloves when using the product and wash hands thoroughly after handling.

EPA Reg. No. 64240-01 Combat Fire Ant Killer 3 of 4

### APPLICATION INSTRUCTIONS

[Contents of this box will treat 6 -or- \_\_\_ average size (approximately 28 inches in diameter) (fire) ant mounds.]

- For localized activity of (fire) ants (mounds, hills and trails), measure or sprinkle (2 to 5 level tablespoons (0.5 to 1.0 oz)) of Combat® Fire Ant Killer granules at the base of the ant mound or along ant trail. Do not use kitchen utensils for measuring. Do not put the granules directly in or on the mound. **Do not disturb the mound.** This will aggravate the ants and may cause them to relocate their mound. One container is sufficient to destroy 10 to 20 **(11.2 oz)** (fire) ant mounds -or- 30 to 60 **(2 lb)** (fire) ant mounds -or- 45 to 95 **(3 lb)** (fire) ant mounds.  
 -or-  
*(directions for tip and measure bottle)* For localized activity of fire ants (mounds, hills and trails) turn the container upside-down to fill the dispensing chamber with Combat Fire Ant Killer granules. Sprinkle granules (approximately 2 to 5 level tablespoons per mound) around the base of the fire ant mound or along trail. Do not put the granules directly in or on the mound. Do not disturb the mound. This will aggravate the ants and may cause them to relocate their mound. Destroys (fire) ant mounds 10 to 20 **(11.2 oz)** -or- Destroys (fire) ant mounds 30 to 60 **(2 lb)** -or- Destroys (fire) ant mounds 45 to 95 **(3 lb)**.
  - After application, you may see increased ant activity around Combat® Fire Ant Killer granules. **Do not spray or interfere with their feeding.** The (fire) ants need time to take the granules back to the colony -or- hill -or- mound to kill the queen and entire colony.
  - You should expect to see a significant reduction in (fire) ants within a week.
  - If large colonies are present, a repeat treatment after one week may be necessary.
  - For best results, apply Combat® Fire Ant Killer granules when ants are most active. This generally occurs during the early morning hours or at dusk. Avoid application during the heat of the day or if rain threatens.
  - Broadcast treatment: For general control of (fire) ants outdoors around your yard, sprinkle granules lightly in the yard. One package will treat (up to) a half acre -or- x square feet -or- yards.
  - For large, infested areas use a hand operated spreader and broadcast Combat Fire Ant Killer granules at 2 to 4 ozs per 5,000 square feet (1 to 2 lbs per acre).
- Directions if sold in individual packets:**
- The amount of this product needed to treat an average size (fire) ant mound has been pre-measured into each single treatment packet. Using a pair of scissors, cut the packet along the dotted line and apply the entire contents of the packet uniformly around the base of the ant mound. Do not apply directly to the top of the mound and do not disturb the mound. (See illustration.)
  - For best results, this product should be applied when ants are most active. This generally occurs during the early morning hours or at dusk. Avoid application during the heat of the day or if rain threatens.
  - Worker ants will find this product, carry it back to the mound, and pass it along to the queen and other ants before dying. Typically, the queen and a number of ants will be dead within a week and mound activity will gradually decline afterwards as no new ants are produced.
  - For particularly large ant mounds containing extreme numbers of ants, it may be necessary to apply a second packet to the mound. Refer to the illustration after treating the mound to see if you have enough product coverage.
  - Broadcast treatment: For general control of (fire) ants outdoors around your yard, sprinkle granules lightly in the yard. One package will treat (up to) a half acre -or- x square feet -or- yards.
- Should you have any questions regarding this product, see stamped code on back -or- bottom of container, then call the Combat® Labs Helpline for more information: 1-800-426-6228.

### STORAGE AND DISPOSAL

**STORAGE & DISPOSAL:** Storage: Keep in original container. Store in cool, dry, secure place. (Prolonged exposure to air may turn product rancid.) Disposal: ***If empty: Do not reuse this container. Place in trash if partly filled: Call your local solid waste agency or toll free number 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.***

***Storage and disposal for oil-based product:***

This product is formulated in an oil bait that functions as an attractant to ants. Prolonged exposure to air may turn oil rancid and reduce the attractiveness of the bait. Therefore, do not store any packets -or- containers which have been opened. Do not reuse empty packets -or- containers. Wrap packet -or- container and put in trash collection.
