COMBAT®
ROACH KILLING
SYSTEM

For Large Roaches
Waterbugs & Palmetto Bugs

COMBAT®

ROACH KILLING SYSTEM

OR YOUR MONEY BACK

- New! Greater Roach Control
- Even Kills roaches resistant to pyrethroids and organophosphates.
- New Improved Formula
- New! Better Roach Control
- New! Improved Roach Control
- COMBAT's new offers greater because it also that are resist insecticides n pyrethroids, organophosph carbamates.

For Large Roaches

Waterbugs & Palmetto Bugs

CONTAINS _____ CHILD-RESISTANT BAIT STATIONS

ACTIVE INGREDIENT: Hydramethylnon,
tetrahydro-5,5-dimethyl-2(1H)-pyrimidinone-
3-(4-(trifluoromethyl)phenyl) - 1- (2-(4-
(trifluoromethyl)phenyl)ethenyl)-2-
propenylidene)hydrazone2.0%
INERT INGREDIENTS: 98.0%

CAUTION: DO NOT ALLOW CHILDREN OR PETS TO PLAY WITH THE BAIT STATIONS

For Small Roaches

- Kills Eggs
- Breaks the Roach Life Cycle
- EggStopping Ingredient (or Formula)
- Prevents Egg Production
- Prevents Roach Reproduction
- Prevents Egg Hatching
- Inhibits Egg Production
- Inhibits Roach Reproduction
- Inhibits Egg Hatching
- Reproduction Inhibiting Ingredient (or Formula)
- Egg Inhibiting Ingredient (or Formula)
- Patented Action EGG Control
- Sterilizes female roaches
- Creates females that are unable to produce eggs.
- As The Domino Effect™ spreads through the roach population, most roaches are killed, and still others lose their ability to produce eggs.
- This product's patented action formula kills roaches and eggs.
- As The Domino Effect™ spreads through the roach population, roaches that are affected either die or lose their ability to produce eggs.
- This product offers (or provides) complete roach control.
- This product offers (or provides) ma roach control.
- This product offers (or provides) ma egg control.
- This product causes pregnant (or egg) roaches to lose their eggs, and prevent production of new eggs in the population.
- Controls roaches two ways, by killing preventing reproduction in others.
- This product attacks (or disrupts) the system (or cycle) of roaches.
- Depending on the amount of poison product works by either killing or sterilizing roaches.
- Kills roaches and the eggs they carry day, 7 days a week.
- Kills roaches and the eggs they carry you sleep.
- Kills roaches and eggs while you sleep.
- Kills roaches and eggs 24 hours a day 7 days a week.
- Destroys (or Kills) the egg machine

For Large Roaches
Waterbugs & Palmetto Bugs

COMBAT®
ROACH KILLING
SYSTEM

COMBAT®
ROACH KILLING
SYSTEM

COMBAT® bait stations contain a totally unique insecticide ingredient to kill roaches. Laboratory and home use tests prove COMBAT® provides 3 months of effective control.

This product is specially designed for large roaches, waterbugs & palmetto bugs. Select the right COMBAT® Roach Killing System for your roach problem by using the pictures below to identify which type of pest you have.

Large, 1" to 1-1/2" Cockroach. Habits: Primarily live and breed outdoors and enter homes in search of food. Bait station placement near potential points of entry is key.

Small, 1/2" Cockroach. Habits: Primarily live and breed in moist areas like kitchens and bathrooms. More bait stations are required for effective control.

If you have seen both types of cockroach in your home, it is strongly suggested that you purchase both sizes of COMBAT® Roach Killing System for effective roach control.

COMBAT
LABS

[For questions or comments, please call] [C]all the Combat® Labs [Information] Helpline at 1-800-426-6228 [for more information].

- THREE MONTHS OF EFFECTIVE CONTROL - EASY TO USE - NOTHING TO ACTIVATE - NO VAPOR, FUMES OR ODOR

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

1. Break COMBAT® bait stations apart from plastic frame. Use all 8 bait stations at the same time for thorough control.

-or-

1. Open pouch and separate the bait stations from plastic frame. Do not remove or puncture the label on bait station.

2. Place bait stations wherever roaches are seen—near doors and windows at least 10 bait stations in the kitchen and 2 in each bathroom (under refrigerator and appliances, inside cabinets and drawers). (Refer to diagram for other placement locations). Do not use sprays or foggers around baits; they can contaminate bait stations and reduce effectiveness.

-or-

2. For best results, use all 8 [or 12] bait stations at one time.

3. Baits work best on horizontal surfaces touching corners and walls. Use enclosed stickers for vertical surfaces.

-or-

3. Place at least 6 [or 10] bait stations in the kitchen and 1 [or 2] in each bathroom (food storage and water sources are the most common roach areas). Specific placement areas include under appliances and sinks, on floor along baseboards, near pet food storage and inside cabinets and drawers.

4. Replace all bait stations after 3 months of use, sooner if infestation is heavy. Use enclosed replacement minder.

-or-

4. Place baits wherever you see roaches; severe roach problems may require 2 boxes or more. The more bait stations placed out, the more roaches find the bait. This means faster and more effective control of your roach problem.

5. Bait stations work best when touching walls or corners. Use enclosed stickers when placing them upside down. It is not necessary to use stickers on all baits.

6. Replace all _____ bait stations every 3 months, or sooner if they return, because roaches have probably eaten all of the bait.

STORAGE AND DISPOSAL: STORAGE: Store in cool, dry area. DISPOSAL: Wrap used bait stations and put in trash.

EFFECTIVENESS GUARANTEE: COMBAT® stands behind this insect killing system with a full Satisfaction Guarantee. Should you have any questions regarding COMBAT®, please call 1-800-426-6228.

THIS IS HOW THE COMBAT® ROACH KILLING SYSTEM WORKS

- 1 Roaches enter bait station.
- 2 Roaches leave bait station after eating bait inside.
- 3 Behind your walls, ROACHES share bait with more roaches who also die.

(MOST IMPORTANT)

-or- (OTHER)

LOCATIONS: Kitchen, bathroom, bedroom,

dining room and

laundry room,

other points of

entry (garage,

basement, attic, &

outside doors).

Normal infestation

requires 1 box (8

bait stations).

Heavy infestation

may require 2 boxes

[or more] (16 bait

stations).
