Date of Issuance
MAY 31 2002

**NOTICE OF PESTICIDE
Reregistration**

Term of Issuance:
Unconditional Registration

Name of Pesticide Product:
Combat® Roach Gel

(under FIFRA, as amended)

Name and Address of
**Combat Insect Control Systems
P.O. Box 493
Pleasanton, CA 94566-0803**

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act. Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration eligibility Documents, EPA has reregistered the product listed above. This action is taken under the authority of section 4 (g)(2)(c) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Registration under this section does not eliminate the need for control reassessment of pesticides. EPA may require submission of data at anytime to maintain the registration of your product. with regards to labeling, you must make the labeling changes listed below:

Sincerely,

Ann Sibold
Acting Product Manager 10
Insecticide Branch
Registration Division (7505C)

COMBAT®

Roach Gel

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling

THIS IS HOW THE COMBAT® ROACH GEL WORKS:

- 1** Dispense -or- Apply gel near observed -or- suspected roach nesting areas.
- 2** Roaches eat the gel and die in the nest.
- 3** Other roaches eat them and die, creating The Domino Effect™ [which eliminates roaches and the eggs they carry].

FOR POSITION ONLY

GENERAL INFORMATION

optional text:

Tips for Best Results:

- Use many small placements, not a few large ones
- Use the entire tube at the same time
- Clean greasy or dirty surfaces before placement
- In more open areas, such as walls and floors, inside cabinets, and near food, also use Combat SuperBait Roach Baits for maximum roach control

end optional text

claims for front or back:

- EggStopping Gel
- This product can be applied behind appliances and into cracks and crevices, right into roach nesting areas where pregnant -or- egg-bearing roaches are hiding
- Complete control by targeting nests and eliminating eggs
- This product controls by targeting the nest and eggs
- Roach & Egg Control Gel
- Kills pregnant roaches where they live -or- hide
- Targeted roach [and egg] control
- For cracks and crevices
- Fo. hard to reach places
- Kills roaches and the eggs they carry
- Gets roaches where they enter your home
- Can be applied out of reach of children and pets
- Can be applied in hidden -or- small -or- hard to reach places so it's out of sight and your roach problem out of mind
- Kills existing roaches and stops new roaches from hatching
- Continued use keeps roaches under control
- Guaranteed to work or your money back
- Targets the nest and kills eggs

Large Cockroaches:

- Even kills roaches resistant to pyrethroids and organophosphates
- **New Improved Formula**
- **New! Improved Roach Control**
- **New! Better Roach Control**
- Kills roaches and the eggs they carry.
- Guaranteed to work or your money back.
- This product may be used as a spot or crack and crevice treatment for the indoor and outdoor control of cockroaches
- Pest population reduction will be apparent within a week or less

end of claims for front or back

Combat's patented action formula provides complete roach control by killing roaches and the eggs they carry. This gel can be injected -or- applied behind appliances and in cracks and crevices, right near the places where roaches make their nests or enter your home. Combat [also] allows you to place bait in many more locations in your home, which means more roaches find and eat the bait, and more roaches die.

Combat targets roach nesting areas -or- places where roaches enter your home.

Combat's patented action formula provides complete roach control by targeting roach nesting areas. This gel can be injected behind appliances and in cracks and crevices, right near nesting areas where egg-bearing -or- pregnant roaches are hiding. Combat also allows you to place bait in many more locations in your home, which means more roaches contact -or- find and eat the bait, and more roaches die.

Small Cockroaches:

- Kills Eggs
- Breaks the Roach Life Cycle
- Eggstopping Ingredient -or- Formula
- Prevents Egg Production
- Prevents Roach Reproduction
- Patented Action EGG Control
- Sterilizes female roaches
- As The Domino Effect™ spreads through the roach population, most roaches are killed, and still others lose their ability to produce eggs
- This product's patented action formula kills roaches and the eggs they carry
- As The Domino Effect™ spreads through the roach population, roaches that are affected either die or lose their ability to produce eggs
- [This product] offers -or- provides complete roach control
- [This product] offers -or- provides maximum roach control
- Controls roaches two ways: by killing adults and preventing reproduction in others
- [This product] attacks -or- disrupts the reproductive system -or- cycle of roaches
- Kills roaches and the eggs they carry 24 hours a day, 7 days a week
- Kills roaches and the eggs they carry while you sleep
- Kills roaches and eggs while you sleep
- Kills roaches and eggs 24 hours a day, 7 days a week
- Kills roaches and the eggs they carry without vapors or fumes
- Controls roaches by targeting the nest and the eggs they carry

Product is easy to use: Targets the nest. Combat gel can be injected -or- applied behind appliances and in cracks and crevices near roach nesting areas which are the source of roach problems.

Combat® Roach Gel may be used as a spot or crack and crevice treatment for the indoor and outdoor control of cockroaches

Product may stain textiles and clothing.

DIRECTIONS FOR USE CONTINUED:**GENERAL PRECAUTIONS AND RESTRICTIONS**

USE ONLY IN AREAS INACCESSIBLE TO CHILDREN AND PETS.

- Product may stain textiles and clothing.
- Do not apply gel to areas which have been recently sprayed with insecticide, and do not spray insecticide over gel as this may cause the bait to become repellent.
- Do not use sprays or foggers around gel since they can contaminate the gel and reduce effectiveness. Do not apply gel to areas that are routinely washed, such as counter tops, as gel will be removed or diluted and spread onto the surface.

- **For indoor Use:** Do not use this product in or on electrical equipment where a possibility of shock hazard exists.
- [Do not spray or smoke around gel bait.]
- Do not treat food/feed preparation surfaces.

APPLICATION INSTRUCTIONS

1. To apply gel: Remove cap from tip, touch tip to surface and depress plunger. Gel can be applied as spots or in a line along cracks or crevices. Recap tube after use.
2. Do not apply gel to areas which have been recently sprayed with insecticide, and do not spray insecticide over gel as this may cause the bait to become repellent.
- or-
2. For best results, make -or- place many spots or dabs of gel near areas of roach traffic and suspected nesting areas. Gel can be placed in cracks, crevices, corners and any out of the way place in the house, such as under and behind kitchen appliances, along baseboards, under sinks, in pantry, around pipes and water heater and in the garage and attic. Numerous small placements will provide faster control than fewer large spots. For thorough control, use entire tube at the same time.

3. Inspect placements and reapply as needed: The gel will remain attractive to roaches and keep working for up to 3 months. Inspect gel placements after 1 month and reapply when you can no longer see the gel. Reapply after 3 months. Clean up remaining gel with a damp cloth and throw it away.
- or-
3. The gel will remain attractive to roaches and keep working for 3 months. Inspect gel after one month and reapply if it is no longer visible. Refresh with a new application after 3 months. Gel cleans up with a damp paper towel. Discard towel after use.
4. A visual inspection of bait placements is recommended at one month after the initial treatment. Reapply when bait is no longer visibly present, according to the remaining level of infestation.

For indoor use: Do not place bait in locations that are routinely -or- frequently washed, as bait will be removed by washing. Do not treat food preparation surfaces.

For outdoor use: Place gel in areas where roaches may nest or breed near your house or garage. Apply gel to potential places where roaches may enter your home, such as eaves, sills, and expansion joints. Apply gel in protected areas whenever possible. Extreme heat or cold, direct sunlight and water may reduce [the residual] effectiveness.

You will notice fewer roaches within a week

-or-

Pest population reduction will be apparent within a week or less.

optional, additional text for Directions for Use:

Apply gel in 1 - 4 dime-sized ($\frac{1}{4}$ - $\frac{1}{2}$ g) spots or a 3" - 12" line -or- bead -or- strip per square yard. Keep exposed -or- applied gel away from open food and food contact surfaces.

Gel placements should be at or near observed roach gathering areas -or- harborages or aggregation areas, such as corners, areas of movement or cracks and crevices. Numerous smaller placements will provide faster control than few larger spots, especially for German cockroach control. Combat Roach Gel may be used as a spot or crack and crevice treatment for the indoor and outdoor control of cockroaches.

Do not treat food/feed preparation surfaces.

The lower application rate -or- level should be used for low to moderate infestations or retreatments and the higher rate -or- level for more severe infestations or where the population occurs in inaccessible areas, such as in walls.

end optional text

STORAGE AND DISPOSAL

STORAGE: Store in a cool, dry area, out of reach of children.

DISPOSAL: If empty: Do not reuse this container. Recap pre-filled plastic dispenser[s] -or- reservoir[s] -or- syringe[s] and place in trash. If partly filled: Recap pre-filled plastic dispenser[s] -or- reservoir[s] -or- syringe[s] and call your local solid waste agency or toll free number 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.
