[GENERAL INFORMATION]

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling

[[THIS IS] [HOW] [THIS] COMBAT® [*Alternate Brand Name*] WORKS]

This product provides FAST CONTROL of [Carpenter] Ants in 3-5 days

This product is formulated to effectively control [Carpenter] Ants That's because this product contains Fipronil, a fast-acting active ingredient Its speed is still slow enough, however, for foraging ants to return to the colony and feed the bait to larvae and queen[s] so that the entire colony is killed through the Domino Effect™

[When exposed to higher temperatures (above 80°F) for extended periods of time, the gel will change color and lose effectiveness If the gel inside the tube is darker than the color bar below, do not apply]

[FOR CONSUMER USE ONLY]

[SPANISH INSTRUCTIONS INSIDE BOX]

APPLICATION INSTRUCTIONS

[This package [insert] should be in possession of applicator] Application rate is dependant on level of infestation and species to be controlled Bait should be applied as spots

Keep exposed gel away from open foods and food contact surfaces

1 Inspect for ants Place gel in areas of suspected ant activity, next to ant trails and near ant nests Avoid applying gel in direct sunlight Gel can be placed in cracks, crevices, corners, and areas such as under and behind kitchen appliances, along baseboards, under sinks, in pantry, around pipes and water heater and in the garage and attic

-or-

- 1 To apply gel [Remove cap from tip] [Break tip off], touch tip to surface and depress plunger Recap tube after use
- 2 Apply gel in spots in cracks and crevices For best results, [make] [place] many spots or dabs of gel where you see ants foraging and entering the structure
- 3 Do not apply gel to areas which have been recently sprayed with insecticide or contaminated with foggers, and do not spray insecticide over gel as this may cause the bait to become repellent
- 4 Inspect placements and reapply as needed

[Tips for Best Results

- Do not spray insecticides or smoke around gel bait
- Clean greasy or dirty surfaces before placement
- In more open areas, such as walls and floors, inside cabinets, and near food, also use Combat Quick Kill Formula 3 baits for maximum ant control
- Do not use strong cleaners around bait placements]

7099

Note **Bold, Italicized text is information for the reader and is not part of the label**
[Bracketed information is optional text]
Underlined or Highlighted text is new

[For indoor use Visually inspect for ants and place gel in areas where you see ants Do not place bait in locations that are [routinely] [frequently] washed, as bait will be removed by washing Do not treat food preparation surfaces Do not use this product in or on electrical equipment where a possibility of shock hazard exists]

[For outdoor use Place gel into or on adjacent to structures where you see ants, next to ant trails and suspected areas of ant activity]

[You will notice fewer ants in days] [Pest population reduction will be apparent within a week]

[Keep [exposed] [applied] gel away from open food and food contact surfaces Do not treat food/feed preparation surfaces]

[Gel placements should be near ant trails, next to ant nests or in areas of suspected ant activity]

[This product's gel may be used as a spot or crack and crevice treatment for the indoor and outdoor control of ants
