Because the bait is not packaged in child resistant packaging, revise Precautionary statements and the First Aid statements in accordance with the attached Tox review.

To prevent misuse, statements regarding placement of bait stations must be qualified as follows: "wherever you see roaches in the following places:", "wherever roaches have been found in the following places:", "wherever roaches have been seen in your home in the following places:", "wherever you see or have seen roaches or signs of roaches or where roaches are found in the following places:" "where you have seen roaches in the following places".

The cited product provided a calendar to in the statements to replace bait stations every 3/6 months. Similarly, revise the label to provide a calendar in the directions to replace bait stations every 3/6 months.

The following comparative claims are acceptable only if revised to compare specifically to Combat products:

25% more free

50% more free

25% 50% more baits

More Baits – Better value

Value pack – More baits.

Claims that the product is new or the design is new are limited to six months after registration or first release of the product from the warehouse, whichever is later.

Because an increase in net weight of the package as sold at retail could trigger child resistant packaging requirements, any increase in net weight in the product as sold or distributed at retail must be submitted as an amendment.

The confidential statement of formula dated 7 March 2008 is acceptable.

Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.
