UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

MAY 23 1995

Ms. J. Evelyn Lawson
Maxforce Insect Control Systems
P.O. Box 493
Pleaston, CA 94566-0803

Dear Ms. Lawson:

Subject: Amendment-Label & Confidential Statement of Formulas
(CSFs)
& Notification of Additional Suppliers
Maxforce Professional Insect Control Ant Killer Bait
Station
EPA Registration No. 64248-2
Your Submissions dated September 19, 1994
& January 19, 1995

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below:

On the Basic and Alternate CSFs A-1, dated 9/19/94 correct the upper and lower certified limits for hydramethlnon appearing in Columns 14(a) and 14(b) to read 1.05 and 0.95 % respectively.

A stamped copy of the label is enclosed.

Sincerely yours,

George T. LaRocca
Product Manager (13)
Insecticide-Rodenticide Branch
Registration Division (7505C)

MAXEFORCE

PROFESSIONAL INSECT CONTROL™ ANT KILLER BAIT STATION

CAUTION: KEEP OUT OF REACH OF CHILDREN
(See Cautions on Side Panel)

FOR USE IN COMMERCIAL, INDUSTRIAL AND RESIDENTIAL AREAS

Contains 24 Child-Resistant Bait Stations

ACTIVE INGREDIENT: Hydramethylnon [tetrahydro-5, 5- dimethyl-2(1*H*)-pyrimidinone (3-[4-(trifluoromethyl) phenyl]-1-[2-[4(trifluoromethyl)phenyl]ethenyl]-2-propenylidene) hydrazone]1.00%
INERT INGREDIENTS.....99.00%

TOTAL NET WT: 1.27 OZ.(36g)

MAXEFORCE

PROFESSIONAL INSECT CONTROL™ ANT KILLER BAIT STATIONS

PRECAUTIONARY STATEMENTS:
CAUTION: HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS.

May be harmful if swallowed

STATEMENT OF PRACTICAL TREATMENT: If swallowed, drink two glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention. In case of emergency, call day or night, 1-800-426-6228.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Do not remove baits from container. Wrap used containers and put in a garbage can

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

1. Simply place each bait station indoors or outdoors immediately next to any trails or close to areas where ants are numerous. Nests are usually located in dark, humid and warm areas close to a water and food source. For maximum effectiveness in ant control the bait station should be placed in or near wall voids, electrical outlets (if wiring permits), potted plants, waste-paper baskets, garbage cans and sinks. Bait stations can be placed in cabinets, next to food and dishes, near sensitive equipment or anywhere your ant problem occurs.
2. **INDOOR USE:** For normal infestations, you should use 3 MAXFORCE Ant Killer bait stations in an average size room. For heavier infestations, you will need additional bait stations in each room. If infestation persists beyond two weeks, relocate bait stations or use additional bait stations.
3. **OUTDOOR USE:** Bait stations should be placed near ant activity or anywhere ants may gain access to the structure. Application sites include air conditioning units, electrical conduits, vents, pipe chases, concrete slabs, skylights on roofs, around ant mounds, garbage cans, and trees; along walls, windowsills, sidewalks and driveways, on ground around structure.
4. The stickers provided in the box can be used to attach the bait stations to vertical surfaces if desired.
5. **Do not spray the bait stations. Avoid placing the bait stations on freshly sprayed surfaces.**
6. Increased ant activity may be seen near the bait stations immediately after placement for short periods but you can expect to see less activity within one week. After placement, ant trails may be observed between the bait stations and the nests. For best results, do not interfere with the ants or the stations during their use because ants must carry the bait back to destroy the queen and colony.
7. Replace all bait stations every 3 months for continuous control of ants.

MAXFORCE

PROFESSIONAL INSECT CONTROL ANT KILLER BAIT STATIONS

MAXFORCE® Ant Killer Bait Stations contain a patented bait formulation which kills Pharaoh ants and other common household ants (see side panel for species). When properly used, MAXFORCE Ant Killer bait will attract foraging worker ants. The ants will feed on the bait which contains Hydramethylnon, a delayed action stomach poison. Then, the worker ants will take some of this bait back to the nest where they will pass it on to destroy the queen and the entire colony. MAXFORCE Ant Killer will kill both adult and larval ant forms.

Do not use residual sprays with or near the MAXFORCE bait stations, as the worker ants must remain alive to carry the bait back to the queen and immature workers. Residual sprays may cause worker ants to spread out and form secondary colonies. MAXFORCE Ant Killer works because it is non-repellent and thus will not cause secondary colony formation.

MAXFORCE Ant Killer Bait Stations have no insecticide odor, are child-resistant and easy to use. They may be used for the control of ants wherever they are a problem (e.g. hospitals, nursing homes, residential establishments, warehousing and commercial establishments, food service, food manufacturing and food processing facilities, laboratories, computer and electronic equipment facilities, pet shops, zoos, buses, boats and trains).
