LARGE ROACH BAIT F.03

Fipronil kills insects by blocking the gaba regulated chlorine channel.

-or-

Fipronil kills insects by blocking the gaba regulated chlorine channel based on in-vitro binding data in rat brain preparations and insect electrophysiology studies.

MAXFORCE Large Roach Bait F.03 contains Fipronil, [a [new] active ingredient] which kills roaches by ingestion or contact. In the process of ingestion or contact, Fipronil (the active ingredient) acts by blocking the GABA (Alpha Amino Butyric Acid) receptor chloride channel. Once chloride ions cannot pass through the channel, depolarization ensues resulting in continued release of excitatory transmitters and hyperexcitation of the neuron.
