WASHINGTON, D.C. 20460

October 30, 2025

Timothy Joseph
Agent for Jesmond Holding AG
Landis International, Inc.
P.O Box 5126
3185 Madison Highway
Valdosta, GA 31603

Subject: Label Amendment - Registration Review Mitigation for Prallethrin and Phenothrin
Product Name: Bio Kill Brand Micro-Fast RTU
EPA Registration Number: 64321-15
Application Date: January 25, 2021
Case Number: 475663 & 481845

Dear Timothy Joseph:

The Agency, in accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, has completed reviewing all the information submitted with your application to support the Registration Review of the above referenced product in connection with the Prallethrin and Phenothrin Interim Decisions, and has concluded that your submission is acceptable. The label referred to above, submitted in connection with registration under FIFRA, as amended, is acceptable.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling and must be used at your next label printing. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 12 months from the date of this letter. After 12 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

If you have any questions about this letter, please contact Lauren Weissenborn via email at weissenborn.lauren@epa.gov.

Sincerely,

A handwritten signature in blue ink that reads "Cathryn Britton". The signature is fluid and cursive, with the first and last names being clearly legible.

{MASTER LABEL}

BIO KILL® BRAND MICRO-FAST RTU

{When labeled/distributed to kill head lice, the following to be featured on front label panel} NOT FOR USE ON HUMANS OR ANIMALS

{Optional Marketing Statement(s) - may appear on front or other label panels}

[Use in, on and around buildings and structures for the control of listed pest.]
[For Indoor and Outdoor Use]
[Use in and around residential buildings, on ornamental trees and shrubs, and recreational areas.]
[Use as a perimeter treatment around the home to kill [protect against] listed insects [pests].]
[Kills ants (excluding carpenter, harvester, and pharaoh ants) fire ants, and other listed pests.]
[Kills By Contact – Keeps On Killing house flies, mosquitoes and cockroaches [roaches] indoors up to 8 weeks!]**]
[[Fast] [Knockdown and killing effect of {at least one or all of the following pests to be featured with this claim} head lice*, dust mites, house flies, German cockroaches, mosquitoes and fleas] by direct spray!]
[Kills By Contact] [– reveals a residual killing efficacy** indoors for up to 8 weeks [2 months] [56 days] after treatment for house flies, mosquitoes and cockroaches [roaches]
[Kills ants (excluding carpenter, harvester and pharaoh ants), fire ants, clothes moths, cockroaches** (American and German), dust mites, houseflies**, mosquitoes**, silverfish, spiders** (excluding black widow spiders) [including brown recluse and funnel-web spiders].]
[Kills ants (excluding carpenter, harvester and pharaoh ants), fire ants, clothes moths, cockroaches (American and German), dust mites, fleas, head lice*, houseflies, mosquitoes, silverfish, spiders excluding black widow, hobo and sac spiders), and other listed insects.]

[Apply as a direct contact spray to kill spiders (excluding black widow, hobo and sac spiders), house flies, mosquitoes, cockroaches [roaches], fleas, fire ants, head lice* and ticks]
[Kills [Contols] house flies, mosquitoes and cockroaches [roaches] indoors on non-porous surfaces for up to 12 weeks]
[Kills [Controls] fire ants indoors on non-porous surfaces for up to 8 weeks]
[[Very] Fast knockdown and killing of head lice*]

[32 fl. oz. covers [treats] 200 sq. ft.]
[24 fl. oz. covers [treats] 150 sq. ft.]

*not for use on humans
** on non-porous surfaces

Active Ingredients:

d-Phenothrin (CAS #26002-80-2).....0.10%
Prallethrin (CAS #23031-36-9).....0.01%

Other Ingredients:99.89%

Total:100.00%

(Contains 0.008 lb. d-Phenothrin and 0.0008 lb. Prallethrin per gallon)

KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS

Environmental Hazards

This product is extremely toxic to fish and other aquatic organisms. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are foraging the treatment area.

{Alternate Physical & Chemical Hazards for Bag-On-Valve packaging.}

[PHYSICAL & CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.]

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING.

For both indoor and outdoor use.

32 fl. oz. covers approximately 200 sq. ft. of treatment area.

[{optional – based on packaging size:} 24 fl. oz. covers approximately 150 sq. ft. of treatment area.]

INDOOR USE

RESTRICTIONS: Do not enter or allow others to enter the treated area until the sprays have dried. Do not allow people or pets to enter treated area until vapors, mists and aerosols have dispersed, and the treated area has been thoroughly ventilated. Wait two (2) hours after application, then open windows, vents and doors for two (2) hours. If an odor is still detected, additional ventilation is required. Remove pets, birds and cover fish aquariums before spraying. In the home, cover all food processing surfaces and utensils during treatment or thoroughly wash utensils before use. Cover exposed food and remove utensils in serving areas.

Application is prohibited directly to sewers or drains, or to any area like a gutter when drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.

- [
- Do not allow to enter indoor or outdoor drains.
 - *No permita la entrada a desagües internos o externos.*
-]

32 fl. oz. covers approximately 200 sq. ft. of treatment area.

[{optional – based on packaging size;} 24 fl. oz. covers approximately 150 sq. ft. of treatment area.]

KILLS FLYING INSECTS including Asian lady beetles, fruitflies, non-biting (fungus) gnats, and small flying moths. Close all doors and windows. Holding spray nozzle about 3 feet from interior walls, fabrics or furniture, spray Bio Kill® brand Micro-Fast RTU into the air with a sweeping motion until the room is thoroughly misted. Vacate room, close door and keep closed for 2 hours. Ventilate room prior to re-entry.

For residual control, apply as a direct spray to screens, areas around doors and windows and other non-porous surfaces where the above listed pests gain entrance to the house.

For houseflies, mosquitoes and Asian lady beetles apply as a direct spray to visible insects.

KILLS CRAWLING INSECTS including ants (excluding carpenter, harvester, and pharaoh ants), fire ants, carpet beetles, clothes moths, cockroaches (American & German), crickets, dust mites, firebrats, fleas, head lice*, pillbugs, silverfish, sowbugs, and spiders (excluding black widow, hobo and sac spiders) and ticks.

*not for use on humans

Apply as a direct contact spray to kill fleas, head lice*, spiders (excluding black widow, hobo and sac spiders) and ticks, hitting as many insects as possible, and to insect (excluding fire ants) hiding places: baseboards and floor boards; undersides of carpets; under and behind cabinets, bookcases, shelves and other storage areas; refrigerators, stoves, and in moist areas around sinks, and pipes. When applying near stoves or water heaters, turn off pilot light prior to spraying.

For Ants (excluding carpenter, fire, harvester, and pharaoh ants), spray visible ant trails and hills around doors and openings where listed ants crawl.

For indoor applications, **Bio Kill® brand Micro-Fast RTU** can be applied at [4 weeks] [30-day][1 month] intervals if necessary. Applied as directed, BioKill Micro-Fast RTU provides **8 weeks** indoor control of fire ants and 12 weeks indoor control of cockroaches [roaches] when applied to non-porous surfaces.

Applied as directed, to non-porous surfaces. **Bio Kill® brand Micro-Fast RTU** provides 8 weeks residual indoor control of *ants (excluding carpenter, harvester, and pharaoh ants), fire ants, cockroaches (American & German), moths, and silverfish.).*

Also kills *boxelder bugs, carpet beetles, cigarette beetles, clover mites, confused flour beetles, crickets, earwigs, firebrats, fleas, head lice**, *lesser grain borers, millipedes, red flour beetles, rice weevils, saw-toothed grain beetles, sowbugs, litter beetles (adults/immature stages such as Darkling, Hide, and Carrion), pillbugs, spiders* (excluding black widow, hobo and sac spiders), *spider mites (Two-spotted, Spruce), and ticks*

For Surface or Spot Applications: Hold sprayer nozzle approximately 12 inches from surface to be treated. Apply directly to insects when possible. Spot treatments must not exceed two square feet in size (e.g., 2 ft x 1 ft or 4 ft x 0.5 ft.)

For Crack & Crevice Applications: Adjust sprayer nozzle to deliver a pin stream; place nozzle tip into cracks, crevices, holes and other small openings. Treat surfaces to ensure thorough coverage but avoid runoff. To treat insects harbored in voids and cracks-and-crevices applications must be made in such a manner to limit dripping and avoid runoff onto untreated structural surfaces and plants.

Ants (excluding carpenter, fire, harvester, and pharaoh ants): **Apply as a crack and crevice or spot treatment** to ant trails around doors and windows where listed ants may be found. Locate and treat nests. Where listed ants are trailing inside, apply as a residual treatment to active areas: baseboards, corners, around pipes, in and behind cabinets, behind and under refrigerators, sinks, furnaces and stoves, cracks and crevices.

Cockroaches (American & German), Silverfish, Spiders (excluding black widow, hobo and sac spiders): **Apply as a crack and crevice or spot treatment using** a coarse, low pressure spray to baseboards, corners, storage areas, closets, around water pipes, doors and windows, attics, and eaves, cabinets, behind and under refrigerators, sinks, furnaces and stoves, the underside of shelves and drawers, contacting as many pests as possible. Pay particular attention to cracks and crevices.

Crickets, Earwigs and Firebrats: **Apply as a crack and crevice or spot treatment using** a coarse, low pressure spray to baseboards, corners, storage areas, closets, around water pipes, doors and windows, attics, and eaves, cabinets, behind and under refrigerators, sinks, furnaces and stoves, the underside of shelves, and drawers. Pay particular attention to cracks and crevices; also see **Outdoor Surfaces Use**.

Pantry Pests (Carpet Beetle, Cigarette beetle, Confused flour beetle, Lesser grain borer, Red flour beetle, Rice weevil, and Saw-toothed grain beetle): **Apply as a crack and crevice or spot treatment** to cupboards, shelving, and storage areas. Remove all utensils, uncovered foodstuffs (or any having original package opened), and shelf paper before making application. Allow treated surfaces to dry and cover shelves with clean paper before replacing utensils, foodstuff, or other items. Any foodstuff accidentally contaminated with treatment solution should be destroyed.

Boxelder Bugs, Millipedes, Pillbugs, and Sowbugs: **Apply as a spot or crack and crevice spray** around doors and windows where these pests may be found or where they may enter premises. Treat baseboards and storage areas. Apply outdoor barrier treatments to prevent infestation as described below; also see **Outdoor Surfaces Use**.

Head Lice: NOT FOR USE ON HUMANS. To kill *head lice*, – Apply as a direct spray, contacting as many head lice as possible. Treat only those garments and parts of bedding, including mattresses and furniture that cannot be either laundered or dry cleaned. Spray in an inconspicuous area to test for possible staining or discoloration. Inspect again after drying,

then proceed to spray entire area to be treated. Spray from a distance of 8 to 10 inches. Allow all treated articles to dry thoroughly before use. .

House Flies, Mosquitoes: Apply as a residual surface spray directly to non-porous surfaces including walls, ceilings, window screens, and resting areas. May be used inside residential buildings, as well as in garages and storage sheds.

Pet Kennels & Bedding

Fleas & Ticks: NOT FOR USE ON PETS. Apply as a direct spray, contacting as many fleas and ticks as possible. Make interior and exterior perimeter applications in and around the pet housing structures. Normal cleaning of the structure must also be done along with applications of **Bio Kill® brand Micro-Fast RTU** to effectively kill fleas, ticks and other crawling and flying insect pests listed on this label.

Bio Kill® brand Micro-Fast RTU may be used in unoccupied areas of pet housing structures. Apply to floors, vertical, and overhead surfaces where crawling or flying insect pests are or may be present. Pay attention to areas where insect pests hide or congregate. [Exterior applications to south facing walls and foundation perimeters can help prevent interior infestations of [Asian lady beetles] [, boxelder bugs] [, millipedes] [, sowbugs] [, pillbugs] [, earwigs] [firebrats] [, and silverfish].]

OUTDOOR USE

RESTRICTIONS:

All outdoor spray applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:

- 1) Application to pervious surfaces such as soil, lawn, turf, and other vegetation;
- 2) Perimeter band treatments of 7 feet wide or less from the base of a man-made structure to pervious surfaces (e.g., soil, mulch or lawn);
- 3) Applications to underside of eaves, soffits, doors, or windows permanently protected from rainfall by a covering, overhand, awning, or other structure;
- 4) Applications around potential exterior pest entry points into man-made structures such as doorways and windows, when limited to a band not to exceed one inch;
- 5) Applications to vertical surfaces (such as the side of a man-made structure) directly above impervious surfaces (e.g., driveways, sidewalks, etc.), up to 2 feet above ground level;
- 6) Applications to vertical surfaces directly above pervious surfaces, such as soil, lawn, turf, mulch or other vegetation) only if the pervious surface does not drain into ditches, storm drains, gutters, or surface waters.

Do not make applications during rain. Avoid making applications when rainfall is expected before the product has sufficient time to dry (minimum 4 hours). Rainfall within 24 hours after application may cause unintended runoff of pesticide application. Do not apply when windspeed is greater than 15 mph.

Spot treatments must not exceed two square feet in size (e.g., 2 ft x 1 ft or 4 ft x 0.5 ft.)

For crack and crevice treatments, treat surfaces to ensure thorough coverage but avoid runoff. To treat insects harbored in voids and cracks-and-crevices applications must be made in such a manner to limit dripping and avoid runoff onto untreated structural surfaces and plants.

For soil or foliar applications, do not apply within 25 feet of lakes, reservoirs, rivers, permanent streams, marshes or natural ponds, estuaries and commercial fish farm ponds. Do not spray the product into fish pools, ponds, streams, or lakes. Do not allow the product to enter any drain during or after application. Do not apply directly to impervious horizontal surfaces such as sidewalks, driveways, and patios except as a spot or crack-and-crevice treatment. Do not apply or irrigate to the point of runoff.

[32 fl. oz. covers approximately 200 sq. ft. of treatment area.]

[24 fl. oz. covers approximately 150 sq. ft. of treatment area.]

Outdoor Surfaces Use

Applied as directed, **Bio Kill® brand Micro-Fast RTU** provides 8 weeks residual control of **moths, and silverfish**. Also kills *crickets, millipedes, sowbugs, pillbugs*.

Apply at 4 to 8 weeks [1 to 2 months] intervals if retreatment is necessary with a lawn and garden sprayer as a residual surface treatment to kill moths, silverfish, crickets, millipedes, sowbugs and pillbugs infesting ornamental plants next to foundations of buildings and to surfaces of buildings, porches, screens, window frames, eaves, patios, garages, and refuse dumps where these insect pests are active. Do not use on edible crops.

Apply as a direct contact spray to kill fire ants, cockroaches (American & German), houseflies, mosquitoes, spiders (excluding black widow, hobo and sac spiders), fleas and ticks.

Perimeter Treatments

Apply a continual band of insecticide contacting as many insects as possible around building foundations and around windows, doors, entrances, eaves, and vents to reduce the potential for entry by crawling pests. Before applications, remove debris and leaf litter from next to the foundation, cut back vegetation and branches that touch the foundation, and move or rake back rocks, deep mulch, or other potential pest harborage next to the foundation. Apply the band up to 7 ft. wide around the structure and upwards along the foundation to 2 ft., and around windows, doors, and roof overhangs. Apply as a coarse spray to thoroughly and uniformly wet the foundation and/or band area so that the insecticide will reach the soil or thatch level where pests may be active.

OUTDOOR ORNAMENTALS

Bio Kill® brand Micro-Fast RTU may be used for applications to maintain outdoor areas where ornamentals are grown: residential lawns and landscaped areas (including trees, shrubs, flowers, evergreens, foliage plants, and groundcovers).

IMPORTANT: Time application to flowering plants during periods when pollinating insects are not present, such as early morning or late evening.

[32 fl. oz. covers approximately 200 sq. ft. of treatment area.]

[24 fl. oz. covers approximately 150 sq. ft. of treatment area.]

Bio Kill® brand Micro-Fast RTU is for use in residential landscaped areas including trees, shrubs, flowers, evergreens, foliage plants and groundcovers. Kills *aphids, armyworms, azalea caterpillars, bagworms, black vine weevils (adults), boxelder bugs, brown softscales, budworms, California oakworms, California redscales (crawlers), cankerworms, caterpillars, crickets, cutworms, Eastern tent caterpillars, Elm leaf beetles, European sawflies, fall*

webworms, flea beetles, forest tent caterpillars, gypsy moth larvae, Japanese beetles (adults), June beetles, lace bugs, leaf-feeding caterpillars, leafhoppers, leafminers (adults), leaf rollers, leaf skeletonizers, mealybugs, non-biting midges, Oleander moth larvae, pillbugs, pine sawflies, pine shoot beetles, pineneedle scales (crawlers), pinetip moths, plant bugs, potato beetles, root weevils, scale insects (crawlers), spittlebugs, striped beetles, striped oakworms, thrips, tip moths, Tussock moth larvae, webworms and whiteflies.

Apply at 4 to 8 weeks [1 to 2 months] intervals if retreatment is necessary with a lawn and garden sprayer as a residual surface treatment to kill the above listed pests. Application to ornamentals should be started prior to the establishment of high insect pest populations. Good spray coverage is necessary to provide the most effective level of control.

Scale: Thoroughly cover the plant with **Bio Kill® brand Micro-Fast RTU** spray, including trunks, stems, twigs, and foliage for control of scale insects (crawler stage).

Bagworm: Apply **Bio Kill® brand Micro-Fast RTU** when bagworm larvae begin to hatch. Spray directly on the larvae. Application is the most effective when the larvae are young.

NOTE: While phytotoxicity testing has been carried out on a wide range of ornamental plants under various environmental conditions, and no phytotoxicity has been observed, certain cultivars may be sensitive to the final spray solution. It is advised to prespray a selection of ornamental plants and observe them for 7 – 10 days prior to treating large areas if local use experience is unavailable.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container, out of reach of children and pets.

Pesticide Disposal: *If partly filled* – Do not pour or dispose down-the-drain or sewer. Call your local solid waste agency for local disposal options..

Container Handling: *If empty* -- Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available.

To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning this use of this product other than indicated on the label. To the extent consistent with applicable law, buyer assumes all risk of use and/or handling of this product when such use and/or handling is contrary to label instructions.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For residential use including: kitchens, living rooms, dining rooms, pantries and other areas where food is stored, prepared and served.

For indoor use only.

SHAKE WELL BEFORE USE.

[[Where To Use [Apply]: [1] Along baseboards & floors. [2] In cabinets & drawers. [3] Behind & under appliances. [4] Around sinks & plumbing. [5] Target insects directly. {with Illustration}]]

General Surface, Spot or Crack & Crevice Treatment:

[Gently rotate top to unlock or lock.] {as appropriate to packaging; e.g. bag-on-valve aerosol}

Remove all food from treatment area. Remove or cover all dishes, utensils, shelf paper and food processing appliances, or wash before use.

Apply where pests reside, especially along baseboards, floors, around sinks, windows and doors, in hidden areas in pantries, cabinets, drawers, behind and under refrigerators, stoves, shelves, furniture and similar places.

Hold sprayer nozzle approximately 12 inches from surface to be treated.

[Hold can at any angle and spray from a distance of 12 inches.] {as appropriate to packaging; e.g. bag-on-valve aerosol}

When pests are driven out, spray directly.

Allow spray to dry prior to replacement of shelf paper, food, utensils and appliances.

[32 fl. oz. covers [treats] 200 sq. ft.]

[24 fl. oz. covers [treats] 150 sq. ft.]

INDOOR USE RESTRICTIONS:

Do not enter or allow others to enter the treated area it has been thoroughly ventilated and spray has dried. Remove pets, birds and cover fish aquariums before spraying.

Application is prohibited directly to sewers or drains, or to any area such as gutters when drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.

- Do not allow to enter indoor or outdoor drains.
- *No permita la entrada a desagües internos o externos.*
- Follow proper disposal procedures on this label
- *Siga las indicaciones del etiquetado para el desecho apropiado del producto.*

[Gently rotate top to unlock or lock.] {as appropriate to packaging; e.g. bag-on-valve aerosol}

FLYING INSECTS:

Kills [Asian lady beetles], [fruit flies], [non-biting (fungus) gnats], [small flying moths], [House Flies] [and] [Mosquitoes].

Apply as a residual surface spray directly to non-porous surfaces including walls, ceilings, window screens, areas around doors and windows, and resting areas. May be used inside residential buildings, as well as in garages and storage sheds.

For houseflies, mosquitoes and Asian lady beetles apply as a direct spray to visible insects.

CRAWLING INSECTS:

Kills ants (excluding carpenter, harvester, and pharaoh ants),[including] [acrobat ants], [Allegheny mound ants], [Argentine ants], [big headed ants], [black turf ants], [citronella ants], [cornfield ants], [crazy ants], [field ants], [ghost ants], [honey ants], [lawn ants], [little black ants], [nuisance ants], [odorous house ants], [pavement ants], [pyramid ants], [Southern ants], [thief ants], [white-footed ants], [fire ants], [carpet beetles], [clothes moths], [cockroaches], [roaches] [crickets], [dust mites], [firebrats], [fleas], [head lice*], [pillbugs], [silverfish], [sowbugs], [spiders (excluding black widow, hobo and sac spiders)], [and] [ticks] Also kills [boxelder bugs], [carpet beetles], [cigarette beetles], [clover mites], [confused flour beetles], [crickets], [earwigs], [firebrats], [lesser grain borers], [millipedes], [red flour beetles], [rice weevils], [saw-toothed grain beetles], [sowbugs], [litter beetles (adults/immature stages such as Darkling, Hide, and Carrion)], [pillbugs], [and] [spider mites (Two-spotted, Spruce)].

(*not for use on humans)

Apply as a direct contact spray to kill fleas, head lice*, spiders (excluding black widow, hobo and sac spiders) and ticks, hitting as many insects as possible, and to insect (excluding fire ants) hiding places such as baseboards and floor boards; undersides of carpets; under and behind cabinets, bookcases, shelves and other storage areas; refrigerators, stoves, and in moist areas around sinks, and pipes. When applying near stoves or water heaters, turn off pilot light prior to spraying.

(*not for use on humans)

For Surface or Spot Applications: Hold sprayer nozzle approximately 12 inches from surface to be treated. Apply directly to insects when possible. Spot treatments must not exceed two square feet in size (e.g., 2 ft x 1 ft or 4 ft x 0.5 ft.)

For Crack & Crevice Applications: Adjust sprayer nozzle to deliver a pin stream; place nozzle tip into cracks, crevices, holes and other small openings. Treat surfaces to ensure thorough coverage but avoid runoff. To treat insects harbored in voids and cracks-and-crevices applications must be made in such a manner to limit dripping and avoid runoff onto untreated structural surfaces and plants.

Ants (excluding carpenter, fire, harvester, and pharaoh ants), [acrobat ants], [Allegheny mound ants], [Argentine ants], [big headed ants], [black turf ants], [citronella ants], [cornfield ants], [crazy ants], [field ants], [ghost ants], [honey ants], [lawn ants], [little black ants], [nuisance ants], [odorous house ants], [pavement ants], [pyramid ants], [Southern ants], [thief ants], [white-footed ants]:

Apply as a crack and crevice or spot treatment to ant trails around doors and windows where listed ants may be found. Locate and treat nests. Where listed ants are trailing inside, apply as a residual treatment to active areas: baseboards, corners, around pipes, in and behind cabinets, behind and under refrigerators, sinks, furnaces and stoves, cracks and crevices.

[For indoor applications, (brand name) can be applied at [4 weeks] [30-day] [1 month] intervals if necessary.] [Applied as directed to non-porous surfaces, (brand name) provides 8 weeks indoor control of ants (excluding carpenter, harvester, and pharaoh ants), fire ants, moths, and silverfish).]

Cockroaches (American & German), Crickets, Earwigs, Firebrats, Silverfish, Spiders (excluding black widow, hobo and sac spiders):

Apply as a crack and crevice or spot treatment using a coarse, low pressure spray to baseboards, corners, storage areas, closets, around water pipes, doors and windows, attics, and eaves, cabinets, behind and under refrigerators, sinks, furnaces and stoves, the underside of shelves and drawers, contacting as many pests as possible. Pay particular attention to cracks and crevices.

Pantry Pests (Bean weevil, Carpet Beetle, Cigarette beetle, Confused flour beetle, Drugstore beetle, Flour beetle, Indian meal moth, Granary weevil, Lesser grain borer, Maize weevil, Meal moth, Merchant grain beetle, Red flour beetle, Rice weevil, and Saw-toothed grain beetle, Spider beetle):

Apply as a crack and crevice or spot treatment to cupboards, shelving, and storage areas. Remove all utensils, uncovered foodstuffs (or any having original package opened), and shelf paper before making application. Allow treated surfaces to dry and cover shelves with clean paper before replacing utensils, foodstuff, or other items. Any foodstuff accidentally contaminated with treatment solution should be destroyed.

Boxelder Bugs, Millipedes, Pillbugs, and Sowbugs:

Apply as a spot or crack and crevice spray around doors and windows where these pests may be found or where they may enter premises. Treat baseboards and storage areas.

Head Lice:

NOT FOR USE ON HUMANS. Apply as a direct spray, contacting as many head lice as possible. Treat only those garments and parts of bedding, including mattresses and furniture that cannot be either laundered or dry cleaned. Spray in an inconspicuous area to test for possible staining or discoloration. Inspect again after drying, then proceed to spray entire area to be treated. Spray from a distance of 8 to 10 inches. Allow all treated articles to dry thoroughly before use.

Fleas & Ticks:

NOT FOR USE ON PETS. Apply as a direct spray, contacting as many fleas and ticks as possible. Make interior and exterior perimeter applications in and around the pet housing structures. Normal cleaning of the structure must also be done along with applications of [brand name] to effectively kill fleas, ticks and other crawling and flying insect pests listed on this label.

Pet Kennels & Bedding

[Brand Name] may be used in unoccupied areas of pet housing structures. Apply to floors, vertical, and overhead surfaces where crawling or flying insect pests are or may be present. Pay attention to areas where insect pests hide or congregate.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container, out of reach of children and pets.

Pesticide Disposal: *If partly filled* – Do not pour or dispose down-the-drain or sewer. Call your local solid waste agency for local disposal options.

Container Handling: *If empty* -- Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available.

To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning this use of this product other than indicated on the label. To the extent consistent with applicable law, buyer assumes all risk of use and/or handling of this product when such use and/or handling is contrary to label instructions.
