DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner that is inconsistent with its labeling.

This product may be used in fresh or salt water, and is intended for use on the bottom of boats and ships.

Directions for mixing: Mix contents of container. Stir until thoroughly mixed before using. Use immediately.

Preparation of Surface: The surface to be painted should be dry, clean and oil free. It should be properly prepared by solvent cleaning and/or sanding before any primers or paints are applied. Follow the recommended systems below. Bare metal surfaces should be primed prior to application. When sanding old antifouling paint, use a face mask to prevent inhalation of sanding dust.

Application and Temperature: Apply by brush, roller, or spray. The work should be done under good drying conditions in the temperature range of 50 to 90°F. Three coats are recommended for best antifouling protection.

Thinner: Thinning not recommended.

Drying Times: Let the first coat dry for four hours before applying second coat. After application of the second and third coats allow at least ten hours drying time before launching. Under adverse drying conditions let the boat dry overnight to be sure that all of the solvent has evaporated from the paint film.
