FEB: 1 1 2013

OFFICE OF CHEMICAL SAFETY AND POLLUTION PREVENTION

Ms. Kimberlee Young Sashco, Inc. c/o RegWest Company, LLC 8203 West 20<sup>th</sup> Street, Suite A Greeley, CO 80634-4696

Dear Ms. Young:

The Agency is in receipt of your application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated January 30, 2013 for the product Core®. The Registration Division (RD) has conducted a review of the request for its applicability under PRN 98-10 and finds that the action(s) requested fall within the scope of PRN 98-10. The Confidential Statement of Formulas (CSF) and/or label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions, please contact Melody Banks on 703 305-5413 or via e-mal at banks.melody@epa.gov.

Sincerely, k Suarez

Product Manager 13 Insecticide Branch Registration Division (7504P)

## **Label Revision Notification**

January 30, 2013

Mr. Mark Suarez, Product Manager 13 Document Processing Desk - *NOTIF* Office of Pesticide Programs – *7504P* **U.S. Environmental Protection Agency** One Potomac Yard (South Building), Room S-4900 2777 South Crystal Drive Arlington, VA 22202

Dear Mr. Suarez:

Subject: Sashco, Inc. Core<sup>®</sup> EPA Reg. No. 64820-1

On behalf of **Sashco, Inc.**, RegWest Company, LLC is submitting the attached documents in support of a label revision notification. RegWest will act as sole agent in this endeavor.

Attached are the following documents:

- 1. Application for Pesticide: Notification
- 2. One Reference Label (illustrating the label revisions)
- 3. Since Labels (incorporating the revisions)

4. **Market labels** (25 pounds size)

The primary purpose of this label revision notification is to replace the company logo with the current version. There are other minor revisions that are illustrated on the **Reference Label** (please refer to the **Reference Label** for an illustration of all revisions).

Please contact me at 970.353.0611 or kim@regwest.com if you have any questions or comments concerning this submission.

Regards, RegWest Company, LLC

Kimberlee Young (formerly: Kim Davis), Consultant/Agent

## PRECAUTIONARY STATEMENTS

## Hazards to Humans & Domestic Animals

**CAUTION:** Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Thoroughly wash with soap and water after handling.

## Personal Protective Equipment (PPE)

Mixers/loaders, applicators and other handlers must wear: Long-sleeved shirt and long pants, shoes plus socks, protective eyewear, chemical resistant gloves (such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride or viton) and a respirator with an organic vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-14G) or a NIOSH approved respirator with an organic vapor (OV) cartridge or canister with any N, R, P or HE prefilter.

#### User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions exist for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

## User Safety Recommendations

Users should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Users should remove clothing immediately if pesticide gets inside. Then thoroughly wash and put on clean clothing. Users should remove personal protective equipment immediately after handling this product. Wash the outside of gloves before removing. As soon as possible thoroughly wash.

## (Non-residential Environmental Hazards Directions:)

#### **Environmental Hazards**

This pesticide is toxic to fish and wildlife. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

#### {Residential Environmental Hazards Directions:}

#### **Environmental Hazards**

This pesticide is toxic to fish and wildlife. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain do not blow or wash pesticide away from the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems.

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Simply mix Core™ with water to control fungal decay and: Anobiid Beetles (Anobiidae), Carpenter Ants (Camponotus), Dampwood Termites (Zootermopsis), Drywood Termites (Kalotermes, Incisitermes), Longhorn Beetles (Cerambycidae), Old House Borers (Cerambycidae), Powder Post Beetles (Lyctidae) and Subtervarian Termites (Reticulitermes, Coptotermes).

## Product Information

#### Where to Use

Use Core on all above-ground wood surfaces, including dimension logs, timbers, lumber, siding, etc. Wood Subject to direct contact with moisture must be coated with a good water-repelling finish, such as Capture/Cascade or High Sierra Log & Deck Stain, after treating with Core.

64820-1 Reference Label: Page 3 of 5 06/13/2011 SAL + 01/30/2013 Notification XXXXX = Additions; XXXXX ≈ Deletions

. . . . . . .

## Preparation

Core is mixed at the rate of 1 pound to 1 gallon of water and requires only mild stirring prior to application. (One pound of Core equals one loosely packed quart.) Wood must be **bare**; free of dirt, wax and surface finishes. Remove all previous coatings with high-pressure water, sandblasting or corncob blasting. Surface mold or mildew, or the stains they cause, should be removed prior to applying Core. This may be done by applying a 1:1 blend of water and household bleach, allow 30-60 minutes to soak, rinse and repeat. [For more aggressive and brighter cleaning, use Sashco's CPR Log Cleaner & Brightener and follow manufacturer's instructions. Best results will be obtained if the wood, after cleaning, is sprayed with clean water several times just prior to applying Core. This helps build up the moisture level in the outer shell of the wood and will help Core's penetration.] Allow wood to dry until just slightly damp before applying Core. Do not apply to frozen wood. Apply Core only when temperature is above 40°F.

## Application Instructions Methods of Application

Core may be applied by brushing, spraying, dipping, kerf-flooding or hole-flooding. Full immersion dipping yields the deepest and most complete protection, especially with large logs. Kerf-flooding, accompanied with brushing or spraying, yields nearly the same level of protection as dipping. Brushing or spraying can completely penetrate dimension lumber and can provide excellent "shell" protection for timbers and logs to a depth of  $\frac{3}{4}$ " – which is adequate for most applications. Note: Diffusion of Core into the wood begins immediately and requires several weeks for completion.

#### Application

All application methods described below will yield a minimum retention level of 0.24 pounds per cubic foot boric acid equivalent (BAE) in the outer <sup>3</sup>/<sub>4</sub>" of the wood.

**Brushing or Spraying\*:** Apply Core at the rate of 1 mixed gallon per 150 ft.<sup>2</sup> of wood surface. Apply a second coat 4 to 24 hours later. Thoroughly soak cut ends. With "shell" protection in large logs or timbers, all pre-existing insect larvae may not be killed. Upon maturing they may emerge from the wood. Further insect infestations, however, will be prevented.

**Kerf-Flooding and Spraying/Brushing\*:** Logs 9" in diameter and larger are often kerfed to control unwanted checking. When kerfing a log in the shape of a trough (with a 3/8" wide chain saw to a depth of 3"), just pour Core solution in the kerf. Fill the kerf at the rate of 15-20 linear feet per gallon. Let soak. It will take 1-2 days for the logs to absorb all the liquid. Protection may also be gained by pouring powdered Core into the kerf (0.2 to 0.3 pounds per linear foot). Pour water into the kerf to dissolve and carry the Core into the wood. Brush or spray the exterior of the logs after either of these methods (as described above). Hole-flooding is similar to kerf-flooding. Note: Be sure the kerf or holes do not affect the strength of the log.

**Dipping:** Dip logs or lumber in Core for 6-10 minutes, depending on log diameter. Let excess liquid drain back into tank, dip again 24 hours later. Cover wood with a tarp or place in a shed for at least 48 hours prior to coating with a good exterior finish such as Capture/Cascade or High Sierra Log & Deck Stain.

\*Note: Runoff from vertical walls may be contained by using plastic sheeting to form an accumulation basin. The trapped liquid may then be recycled and will be prevented from injuring nearby foliage.

#### After Applying Core

Core treated wood must be protected from direct contact with moisture or the active ingredient may leach out. It is best to wait at least 48 hours after applying Core to coat the wood with a water-repelling finish such as Capture/Cascade or High Sierra Log & Deck Stain.

Use soap and water to clean skin, equipment and clothing.

64820-1 Reference Label: Page 4 of 5 06/13/2011 SAL + 01/30/2013 Notification XXXXX = Additions; XXXXX = Deletions

## Storage and Disposal

Do not contaminate water, food or feed by storage and disposal.

**Pesticide Storage:** Store in a dry place. Do not store where children or animals may gain access. Store above 20°F. **Pesticide Disposal:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **Container Disposal: Bags:** Non-refillable container; do not reuse or refill this container. Completely empty bag into application equipment, then offer for recycling, if available; otherwise, discard in trash. **Pails:** Non-refillable container; do not reuse or refill this container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling, or reconditioning, if available; or puncture and dispose in a sanitary landfill.

{Per PR Notice 2007-4 the batch code/lot number will appear on the label or container.}

#### Notice

Because of many varying conditions affecting use and application, manufacturer warns buyer that these conditions may impair or vary the results or effects of the use of this product. Therefore, complete prevention of decay or insect infestation is not guaranteed. To the extent consistent with applicable law, neither the manufacturer or the seller shall be liable in respect to any injury or damage suffered by reason of use of this product for a purpose not indicated by the label or when used contrary to the directions or instructions hereon or with respect to breach of any warranty not expressly specified herein.
