NUTRA-SPRAY® COPOPHOS

COMPOSITION

Active Ingredients: (% by weight)	
Basic Copper Sulfate	27.4%
Inert Ingredients:	
Phosphoric Acid (P ₂ O ₅ available)	10.8%
Zinc (expressed as metallic equivalent)	5.4%
Other	56.4%
Total	100.0%

(*Metallic Copper Equivalent 14.5%
Phosphoric acid derived from
metallic phosphates.
Zinc derived from phosphates)

KEEP OUT OF REACH OF CHILDREN

CAUTION

STATEMENT OF PRACTICAL TREATMENT
IF SWALLOWED: Drink promptly a large quantity of milk, egg whites or gelatin solution. If not available, drink large amounts of water. Avoid alcohol. Call a physician immediately.

IF IN EYES: Flush eyes with plenty of water for at least 15 minutes. Call a physician.

IF ON SKIN: Wash with plenty of water, for at least 15 minutes. Call a physician if irritation persists.

IF INHALED: and abnormal symptoms develop, see a physician.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS

AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Avoid breathing dust. Avoid contact with skin, eyes or clothing. In case of contact immediately flush eyes or skin with plenty of water. May cause skin sensitization in certain individuals. Keep away from domestic animals.

PERSONAL PROTECTIVE EQUIPMENT

Applicators and Other Handlers (other than mixers and loaders) Must Wear: A long-sleeved shirt & long pants; waterproof gloves; shoes plus socks.

Mixers and Loaders Must Wear: A long-sleeved shirt and long pants; waterproof gloves; shoes plus socks; protective eyewear.

Follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic organisms. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to fish and aquatic organisms in adjacent aquatic sites. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation system.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions on this label about personal protective equipment (PPE), and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- coveralls
- waterproof gloves
- shoes plus socks

NUTRA-SPRAY COPOPHOS is designed as a general fungicide for use on citrus in copper sensitive areas. Also recommended for use as a tree deficiency spray where the elements are the recognized deficiencies.

NOTE: In areas where there may be a severe smog, add 1 lb. of lime per 100 gallons of finished spray as an additional precaution.

USE DIRECTIONS

FUNGICIDE USES

Follow use directions below for specific crop applications. If conditions favor disease incidence, or evidence of disease is present, higher rates should be used.

FOR ALL CITRUS VARIETIES:

BROWN ROT: Use 3-5 lbs. COPOPHOS per 100 gallons of water. Spray skirts of trees from the ground up to 3-4 feet high in late fall as a preventative, or when disease first appears. Use up to 6 gallons of spray per tree. In addition, spray 2-4 gallons on the trunk and ground under the tree. Apply 15-50 lbs. COPOPHOS per acre. A second application may be advisable in unusually wet winters.

SEPTORIA: For septoria control apply in late fall as a preventative, or when disease first appears. Thoroughly wet all surfaces of the entire tree with 3-4 lbs. COPOPHOS per 100 gallons of water. Do not exceed 85 lbs. of COPOPHOS per

acre. May also be applied as a dust by air or ground duster at the rate of 20-50 lb. per acre.

MICRONUTRIENT USES

The following applications should be made when nutrient deficiency is detected or when cultural practices indicate that such applications are beneficial. Nutrient applications should be repeated if crops continue to show deficiencies 14 days after the initial treatment.

FOR MINOR ELEMENT SPRAY ON CITRUS, AVOCADOS, DECIDUOUS FRUIT AND NUT TREES AND ORNAMENTALS: Apply COPOPHOS at the rate of 8-30 lbs. per acre in 10-20 gallons of water by air, 15-100 gallons of water by concentrate sprayer. By conventional ground rig, use 2-7 lbs. per 100 gallons of water.

SPREADERS: A Spreader-Sticker is recommended with this product.

COMPATIBILITY:

NUTRA-SPRAY COPOPHOS when used without lime, is compatible with phosphate and chlorinated hydrocarbon insecticides and miticides.

ATTENTION: Maintain adequate agitation at all times. Do not use COPOPHOS in acidic spray solutions or with Leffingwell STABILIZED IRON or SOREBA-SPRAY products since injury from excessive soluble copper may result.

NOTE: This product contains zinc and should be used only as recommended. It may prove harmful to crops when misused.

STORAGE AND DISPOSAL

STORAGE: Store product in a secure place and keep product dry. Spilled product should be swept up, used if clean, or disposed of on site and for waste resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Store product only in original container. During storage, store pesticides separately to prevent cross-contamination of other pesticides, fertilizers, food and feed.

DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Do not reuse this container. Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or if allowed by State and local authorities, by burning. If burned, stay out of smoke.

NOTICE TO BUYER: Our recommendations for use of this product are based on tests believed to be reliable. The use of this product beyond the control of the manufacturer, no guarantee expressed or implied, is made as to the effects of such use or the results to be obtained if not used in accordance with printed directions and established safe practices and application of this product. Buyer must assume all risks of improper storage and application of this product or its improper use in combination with other materials. These risks include, but are not limited to, damage to the fruit or vegetable to which applied, the crop's physical appearance, and/or personal injury. Buyer accepts the product on these conditions. Anyone not accepting these conditions must return the product in its unopened container within 5 days following the receipt of the product. Seller will then promptly refund the purchase price.
