SUBJECT: Addition of Alternate Brand Name

Frontline® Plus for Cats: EPA Reg. No. 65331-4
Frontline Plus for Dogs: EPA Reg. No. 65331-5

Dear Mr. Gebken:

Merial hereby submits the following notification to add an alternate brand name to the above mentioned products. The alternate brand names will be Frontline Top Spot® for Cats (EPA Reg. No. 65331-4) and Frontline Top Spot for Dogs (EPA Reg. No. 65331-5). To that end please find attached:

- A completed application (EPA Form 8570-1) for each product
- 3 copies of labeling for each product

Please note that the labeling provided does not yet include all of the mitigation actions identified in the Agency's Pet Spot-On Mitigation Plan. Merial's submission of September 20, 2012 regarding specific points of the mitigation plan is still under review at the agency. Merial will update the labeling, as appropriate, once an agreement on these items has been reached.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

If you have any questions or require additional information, please contact me by telephone at 678-638-3138 or email at Karen.Mardis@Merial.com.

Some tips and other information

- To successfully control fleas and ticks, all dogs and cats must be treated with their own dose of FRONTLINE®.
- Apply according to label instructions, ensuring the product is applied to the skin, not on top of the fur and not near the collar. It may be helpful to remove the collar before application, so it doesn't absorb the product.
- Remember, your pet needs to be dry at the time FRONTLINE is applied and remain dry 24 hours after application.
- Verify pipette is empty after application (multiple squeezes may be necessary to apply the entire dose).
- Even indoor pets need flea and tick control because you or other pets in the household may bring fleas into the home. These fleas can lead to a flea infestation.

FLEAS: What you need to know

It can take up to 3 months to get rid of a serious flea infestation because of all of the flea life stages that existed BEFORE you started using FRONTLINE.
