SONORA 4SC

FOR TOTAL VEGETATION CONTROL OF WEEDS IN NONCROP AREAS

Bare ground weed control around buildings, storage areas, fences, pumps, machinery, fuel tanks, recreational areas, roadways, guard rails, airports, military installations, highway medians, pipelines, railroads, lumberyards, industrial sites, rights-of-way, and similar areas. 1 gallon treats up to 20.000 sg. ft.

ACTIVE INGREDIENT:	% BY WT.
Prometon: 2,4-bis(isopropylamino)-6-methoxy-s-triazine	
OTHER INGREDIENTS:	
	TOTAL 100.0%

ACCEPTED KEEP OUT OF REACH OF CHILDREN CAUTION

FEB 2 0 2013

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under Manufactured for: Makhteshim Agan of North America, Inc. 3120 Highwoods Blvd, Suite 100 Raleigh, NC 27604

EPA Est. No.

NET CONTENTS: ____ GALLON(S)

	FIRST AID
IF SWALLOWED:	 Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF IN EYES:	 Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF ON SKIN OR CLOTHING:	 Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF INHALED:	 Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wear long-sleeved shirt and long pants, shoes and socks.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are made of any waterproof material. If you want more options, follow the instructions for category C on an EPA chemical-resistance category selection chart.

All mixers, loaders, and other handlers must wear:

- Long-sleeved shirt and long pants, and
- Shoes plus socks.

Users should:

In addition, mixers and loaders supporting motorized ground equipment and handlers cleaning up spill or equipment must wear chemical resistant gloves, such as any waterproof material

USER SAFETY REQUIREMENTS

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Discard clothing and other absorbent material that have been drenched or heavily contaminated with the product's concentrate. Do not reuse them.

USER SAFETY RECOMMENDATIONS

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing

ENVIRONMENTAL HAZARDS

This pesticide may adversely affect non-target plants. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate. Apply this product only as specified on this label.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Applications around a cistern or well may result in contamination of drinking water or groundwater.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

- Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protective handlers may be in the area during application.
- Do not enter or allow entry until sprays have dried.
- Weeds greater than4 inches must be mowed, removed, or hoed into the soil prior to application.
- Do not use this product on or near desirable plants, including within the dripline of the roots of desirable trees and shrubs, since injury to desirable plants and other vegetation may result.
- Do not use this product to sloped areas where desirable vegetation or nearby water bodies may be located downhill of the application area, since injury to desirable plants and other vegetation may result.

PRODUCT INFORMATION

Sonora 4SC is a nonselective herbicide that can be applied in water before or after plant growth begins. Although Sonora 4SC has considerable activity through foliar contact, much of its activity is through roots; therefore, its effectiveness is dependent on rainfall to move it into the root zone. Very dry soil conditions and lack of sufficient rainfall may result in poor weed control.

Important: Use only in areas where complete control of all vegetation is desired such as industrial sites, railroad and utility rights-of-ways, lumberyards, petroleum tank farms, around farm buildings, along fence lines, etc. When applied to the soil, this product usually inhibits plant growth for a year or more.

Following many years of continuous use of this product and chemically related products, biotypes of some of the weeds listed on this label have been reported which cannot be effectively controlled by this and related herbicides. Where this is known or suspected, we recommend the use of this product in combination with other

registered herbicides which are not triazines. Consult with your State Agricultural Extension Service for specific recommendations.

Sonora 4SC is generally non-corrosive to equipment but may cause swelling or more rapid deterioration of hoses and fittings containing natural rubber.

When an adjuvant is to be used with this product, Makhteshim Agan of North America, Inc. suggests the use of a Chemical Producers and Distributors Association certified adjuvant.

This product will not provide herbicidal action in the treated area unless application is immediately followed by watering the area with at least ¼ " of water or application of the product just prior to a rain event sufficient to penetrate the root system of the target vegetation.

RESTRICTIONS:

- Use of Sonora SC is limited to 1 application per year
- Do not apply this product in a residential setting

SPRAY DRIFT MANAGEMENT

A variety of factors including weather conditions (e.g. wind direction, wind speed, temperature, relative humidity) and method of application (e.g., groundboom sprayer) can influence pesticide drift. The applicator must evaluate all factors and make appropriate adjustments when applying this product.

Droplet Size:

Use only medium or coarser spray nozzles according to ASABE (S572) definition for standard nozzles.

Wind Speed:

Do not apply at wind speeds greater than 10 mph.

INDUSTRIAL SITES AND NONCROP AREAS

Sonora 4SC can be applied before or up to 3 months after weed emergence. Application rates vary from 2.0 – 4.5 gals. of Sonora 4SC per acre depending on climatic conditions, soil type, the weeds present, and the stage of growth of the weeds. In the following use rates, the higher rates are intended for use on heavier soils where weed growth is heavy and where rainfall is expected to be relatively high. The higher rates should also be used where longer residual control is desired in regions with a long growing season.

Although Sonora 4SC has considerable activity through foliar contact, much of its activity is through roots; therefore, its effectiveness is dependent on rainfall to move it into the root zone. Very dry soil conditions and lack of sufficient rainfall may result in poor weed control.

For best results, apply Sonora 4SC before weeds emerge or when weeds are young and actively growing.

For control of annual and susceptible perennial weeds and grasses (including but not limited to downy bromegrass, oatgrass, goosegrass, quackgrass, puncturevine, goldenrod, and plantain): Broadcast 2.0 - 3.1 gals. Sonora 4SC in 50 - 100 gals, of water per acre.

For control of hard-to-kill perennial weeds and grasses (including but not limited to johnsongrass, bindweed, and wild carrot): Broadcast 3.75 – 4.5 gals. of Sonora 4SC in 50 - 100 gals. of water per acre.

Using properly calibrated equipment, mix the directed amount of Sonora 4SC in the spray tank in the appropriate amount of water with the agitator running. If desirable, a spray pattern indicator may be added at the directed label rate. Apply uniformly to the area to be treated.

When applying Sonora 4SC to a small area with backpack or pump-up sprayers with capacities of 1 - 3 gals. calibrate the sprayer so that 1 gal. of water covers 500 sq. ft. Then mix 4 – 7 fl. oz. of Sonora 4SC with water to obtain a total volume of 1 gal. and apply uniformly over a 500 sq. ft. area. For hard-to-kill perennial weeds and grasses, use the higher rate. Although Sonora 4SC has considerable activity through foliar contact, much of its activity is through roots; therefore, its effectiveness is dependent on reaching the root zone.

In arid areas where deep-rooted perennials are a problem, best results can be obtained by making the application from midsummer through late fall or prior to the rainy season.

PRECAUTIONS WHEN USED ON INDUSTRIAL SITES AND NONCROP AREAS:

- Do not use this product on or near desirable plants, including within the dripline of roots of desirable trees and shrubs, since injury to desirable plants and other vegetation may result.
- Do not use this product to sloped areas where desirable vegetation or nearby water bodies may be located downhill of the application area, since injury to desirable plants and other vegetation may result.
- Do not use on land to be cropped.
- Do not use for weed control in greenhouses.
- Do not enter or allow entry until sprays have dried
- Weeds greater than 4 inches must be mowed, removed, or hoed into the soil prior to application

ASPHALT PAVEMENT

Sonora 4SC may be used to extend the useful life of asphalt pavement by preventing weeds from emerging through it. Sonora 4SC must be applied to the ground before laying asphalt.

Sonora 4SC should be used only where the area to be treated has been prepared according to good construction practices. If rhizomes, tubers, or other vegetative parts are present in the site, they should be removed by scalping with a grader blade. Re-compaction of the site following disking or plowing will allow good penetration of Sonora 4SC and will help to ensure proper asphalt curing and good weed control.

Sonora 4SC will not completely control woody vegetation such as small trees, brush, or woody vines. Roots of such species should be grubbed and removed from the site before application.

Sonora 4SC should be applied to the ground before laying rapid, medium, or slow curing asphalt coatings such as those used on parking lots, highway shoulders and median strips, roadways, and other industrial sites. Sonora 4SC should be applied just before laying of the asphalt coating to prevent possible lateral movement of the herbicide by rainfall or other mechanical means. Sprayers should be equipped to provide continuous agitation of the spray mixture during application to ensure application of a uniform spray emulsion.

Apply Sonora 4SC uniformly at the rate of 3.75 – 4 gals./acre (11.0 – 11.75 fl. oz./1000 sq. ft.) in a minimum of 100 gals. of water per acre to ensure thorough and uniform wetting of the soil surface. Use the lower rate to control annual and susceptible perennial weeds and grasses (including but not limited to downy bromegrass, oatgrass, goosegrass, quackgrass, puncturevine, goldenrod, plantain, dallisgrass, King Ranch bluestem, and knotroot bristlegrass). Use the higher rate to control hard-to-kill perennial weeds and grasses (including but not limited to johnsongrass, bermudagrass, bindweed, wild carrot, and other deep-rooted perennials).

In arid areas where deep-rooted perennials are a problem, best results can be obtained by making the application from midsummer through late fall or prior to the rainy season.

PRECAUTIONS WHEN USED UNDER ASPHALT:

- Do not mix Sonora 4SC with asphalt.
- Do not use Sonora 4SC under asphalt coatings less than 2 inches thick.
- Do not apply Sonora 4SC to soil saturated with water. The condition of the soil should be favorable for penetration or proper asphalt curing may be affected.
- Do not use this product on or near desirable plants, including within the dripline of roots of desirable trees and shrubs, since injury to desirable plants and other vegetation may result.
- Do not use this product to sloped areas where desirable vegetation or nearby water bodies may be located downhill of the application area, since injury to desirable plants and other vegetation may result.
- Do not use on land to be cropped.
- Do not use for weed control in greenhouses.
- Do not enter or allow entry until sprays have dried
- Use of Sonora 4 SC is limited to one application per year

RAILROAD AND UTILITY RIGHTS-OF-WAYS

Sonora 4SC can be applied to railroad and utility rights-of-ways before or up to 3 months after weed emergence. Application rates vary from 2.0 – 4.5 gals. of Sonora 4SC per acre depending on climatic conditions, soil type, the

weeds present, and the stage of growth of the weeds. In the following directions, the higher rates are intended for use on heavier soils where weed growth is heavy and where rainfall is expected to be relatively high. The higher rates should also be used where longer residual control is desired in regions with a long growing season.

Although Sonora 4SC has considerable activity through foliar contact, much of its activity is through roots; therefore, its effectiveness is dependent on rainfall to move it into the root zone. Very dry soil conditions and lack of sufficient rainfall may result in poor weed control.

For best results, apply Sonora 4SC before weeds emerge or when weeds are young and actively growing.

For control of annual and susceptible perennial weeds and grasses (including but not limited to downy bromegrass, oatgrass, goosegrass, quackgrass, puncturevine, goldenrod, and plantain). Broadcast 2.0 - 3.1 gals. Sonora 4SC in 50 - 100 gals. of water per acre.

For control of hard-to-kill perennial weeds and grasses (including but not limited to johnsongrass, bindweed, and wild carrot): Broadcast 3.75 – 4.5 gals. of Sonora 4SC in 50 - 100 gals. of water per acre.

Using properly calibrated equipment, mix the directed amount of Sonora 4SC in the spray tank in the appropriate amount of water with the agitator running. If desirable, a spray pattern indicator may be added at the directed label rate. Apply uniformly to the area to be treated.

In arid areas where deep-rooted perennials are a problem, best results can be obtained by making the application from midsummer through late fall or prior to the rainy season.

PRECAUTIONS WHEN USED ON RAILROAD AND UTILITY RIGHTS-OF-WAYS:

- Do not use this product on or near desirable plants, including within the dripline of roots of desirable trees and shrubs, since injury to desirable plants and other vegetation may result.
- Do not use this product to sloped areas where desirable vegetation or nearby water bodies may be located downhill of the application area, since injury to desirable plants and other vegetation may result.
- Do not use on land to be cropped.
- Do not enter or allow entry until sprays have dried
- Use of Sonora 4 SC is limited to one application per year

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store at temperatures above 32°F.

PESTICIDE DISPOSAL: Wastes resulting from use of this product must be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING:

Nonrefillable Container (five gallons or less): Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank for 10 seconds after the flow begins to drip. Fill the or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

Nonrefillable Container (greater than five gallons): Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ½ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times.

Refillable Container: Refillable container. Refill this container with prometon only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about

10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times. For final disposal, offer for recycling or reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

LIMITATION OF WARRANTY AND LIABILITY

Read the entire directions for use, conditions of warranties and limitations of liability before using this product. If terms are not acceptable, return the unopened product container at once.

By using this product, user or buyer accepts the following CONDITIONS, DISCLAIMER OF WARRANTIES and LIMITATIONS OF LIABILITY.

CONDITIONS: The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Makhteshim Agan of North America, Inc. All such risks shall be assumed by the user or buyer.

DISCLAIMER OF WARRANTIES: To the extent consistent with applicable law, Makhteshim Agan of North America, Inc. makes no other warranties, express or implied, of merchantability or of fitness for a particular purpose or otherwise, that extend beyond the statements made on this label. No agent of Makhteshim Agan of North America, Inc. is authorized to make any warranties beyond those contained herein or to modify the warranties contained herein. To the extent consistent with applicable law, Makhteshim Agan of North America, Inc. disclaims any liability whatsoever for special, incidental or consequential damages resulting from the use or handling of this product.

LIMITATIONS OF LIABILITY: To the extent consistent with applicable law, the exclusive remedy of the user or buyer for any and all losses, injuries or damages resulting from the use or handling of this product, whether in contract, warranty, tort, negligence, strict liability or otherwise, shall not exceed the purchase price paid or at Makhteshim Agan of North America, Inc.'s election, the replacement of product.
