Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. Apply the specified amounts of this product uniformly to the foliage when air is calm, using ground equipment or aircraft. Apply as recommended for crops listed.

RECOMMENDATIONS

POTATO SEED PIECE TREATMENT: Damping off, seed rot fungi, brown eye disease, verticillium wilt – Apply at the rate of 1 1/4 ounces per bushel cut seed pieces (18 ounces to 100 pounds of cut seed pieces). Apply in convenient container or by duster attachment over belt. Coat each seed evenly with a light film of dust. Treat pieces within 6 hours after cutting. If planting is delayed, store treated seed pieces in open crates for two days before bagging. Do not use excess seed pieces for food or feed purposes.

This product is not for commercial seed treatment. Treat only the amount of seed that is to be planted. Treated seed that is not planted must be destroyed in accordance with Federal and State regulations.

SOIL AND GREENHOUSE BENCH TREATMENT: For damping-off and root rot diseases of seedling and transplants of roses, other shrubs, flowers and lawn seedbeds. Apply 2 1/4 pounds per 1,000 square feet (98 pounds per acre). Work into upper 3 or 4 inches of soil before planting.

Only the applicator is permitted to be in the greenhouse during application of CAPTAN. Open vents to greenhouse during application and for at least 1 hours after application.

ORNAMENTALS: ROSES – (black spot), **CARNATION** – (rust, leaf spot), **CHRYSANTHEMUM** – (flower blight) – Apply thoroughly prior to or at first sign of disease. Repeat applications at 7 to 10 day intervals. Shorten interval during periods of frequent rain and heavy dews.
