Captan Moly Soybean Seed Protectant (2X) is a formulation specifically designed for treatment of soybean seed on the farm at planting time. When used at the recommended rate, it will result in increased deposit of chemical on the seed with all types of planters, including air planters, plateless planters and plate planters, except the International Harvester Cyclo Planter.

Captan Moly Soybean Seed Protectant (2X) protects sound and/or mechanically injured seed against seed and soil-borne diseases which may cause seed rot and seedling blight at planting time. It also provides molybdenum which is essential to the nitrogen-fixing nodule bacteria.

Designed to protect seed at planting time, Captan Moly Soybean Seed Protectant (2X) enables the farmer to avoid the additional handling of commercial seed treatment with associated injury to the seed.

Soybeans are most likely to benefit from treatment with this product when planted in acidic soils (soils needing liming), heavily leached soils, or soils high in iron content.

## DIRECTIONS: MEASURING CUP ENCLOSED

Fill cup to indicated mark [2 oz.]. This will treat one bushel of soybean seed.

SOYBEANS: Use as a planter box treatment at the rate of 39 oz./100 lbs. seed (2 oz./bushel). When seed is planted at the rate of one bushel per acre, this will provide the needed ½ oz. of sodium molybdate per acre.

To achieve adequate coverage fill planter box only half full of seed, add half the required amount of Captan Moly Soybean Seed Protectant (2X) and mix thoroughly with a stick. Then put remainder of seed in the planter box and add the rest of the required amount of product, again mixing thoroughly. Better results are obtained by premixing seed with Captan Moly Soybean Seed Protectant (2X) in a suitable container, then pouring treated seed into planter box.

Do not feed treated seed to animals. Do not use treated seed for human consumption. Do not feed forage grown from treated seed. Seeds treated with Captan Moly Soybean Seed Protectant (2X) sold or shipped as feed or foodstuffs may be considered adulterated under state and Federal laws. Treated seed must be labeled as follows: "TREATED SEED. DO NOT USE FOR FOOD, FEED OR OIL".

#### STORAGE AND DISPOSAL

**PROHIBITIONS:** Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Open dumping is prohibited.

STORAGE: Keep pesticide in original container. Store in a cool, dry place. Protect from excessive heat. Do not store or transport near feed or food. For help with any spill, leak, fire or exposure involving this material, call day or night 1-800-424-9300.

**PESTICIDE DISPOSAL:** This pesticide is acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:** Triple rinse (or equivalent). Do not reuse container. Offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.
