UNITED STATES ENVIRONMENTAL PROTECTION AGENCY WASHINGTON, D.C. 20460

OFFICE OF PREVENTION, PESTICIDES AND TOXIC SUBSTANCES

Mr. Bill Washburn Regulatory Manager Arysta LifeScience North America, LLC 15401 Weston Parkway, Suite 150 Cary, NC 27513

FEB 1 2 2009

Subject: Label Notification for Pesticide Registration Notices 2007-4 and 98-10 Acephate 90 SP EPA Reg. No. 66330-356

Application Dated January 26, 2009

Dear Mr. Washburn:

The Agency is in receipt of your subject Application for Pesticide Notification under Pesticide Registration Notices (PRN) 2007-4 and 98-10 for the subject products.

The Registration Division (RD) has conducted a review of this request for applicability under PRN-2007-4 and PRN 98-10 and finds that the label changes requested fall within the scope of these PR Notices. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on <u>nonrefillable</u> containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

Sincerely,

may to may

Marilyn A. Mautz Biologist Insecticide-Rodenticide Branch Registration Division (7504P)

Note to File EPA Reg. No. 66330-356

Subject: Notification of 1/26/09 for PR Notice 2007-4

The subject product is contained in a water soluble container; i.e. the unopened package containing the pesticide is placed into the spray tank. Thus, only the outer container is addressed in the container disposal statements and no cleaning of residues is necessary for the outer container.

Marilyn Mautz jmm

Ms. Venus Eagle Document Processing Desk (NOTIF) Office of Pesticide Programs – 7504P U.S. Environmental Protection Agency One Potomac Yard, Room S-4900 2777 South Crystal Drive Arlington, VA 22202

Subject: ACEPHATE 90SP EPA Reg. No. 66330-356

Notification of Label Change per PR Notice 2007-4 and PR Notice 98-10

Dear Ms. Eagle:

Please find the following enclosed:

- Application for Pesticide Registration (Other) dated 01/26/09.
- One highlighted copy of subject label, showing all changes.
- One clean copy of the subject label.

Notification of label change per PR Notice 2007-4. This notification is consistent with guidance in PR Notice 2007-4 and the requirements of EPA's regulations at 40 CFR §§ 156.10, 156.140. 156.144, 156.146, and 156.156. No other changes have been made to the labeling or the Confidential Statement of Formula for this product. I understand that it is a violation of 18 USC Sec 1001 to willfully make any false statement to EPA. I further understand that if the amendment is not statement is not statement with the requirements of 40 CFR §§ 156.10, 156.144, 156.146, and 456.153, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Also in this submission, we are using PR Notice 98-10 to update the name of the company, emergency telephone numbers and warranty. Arysta LifeScience North America Corporation was, changed to Arysta LifeScience North America, LLC.

Should you have any questions or comments, please do not hesitate to contact me at 901-432-5118 or by e-mail at <u>bill.washburn@arystalifescience.com</u>

Sincerely,

Woshley

Bill Washburn Regulatory Manager

ACEPHATE 90SP

INSECTICIDE in Water Soluble Packets

FEB 1 2 2009

NOTIFICATION

Active Ingredient	By Wt.
Acephate (O,S-Dimethyl acetylphosphoramidothioate)	
Other Ingredients	10%
Total	

THIS PRODUCT MAY NOT BE REFORMULATED, REPACKAGED OR RELABELED

KEEP OUT OF REACH OF CHILDREN

CAUTION

	FIRST AID						
	Acephate is an organophosphate, cholinesterase inhibitor.						
IF SWALLOWED	Call a poison control center or doctor immediately for treatment advice.						
4	Have person sip a glass of water if able to swallow.						
	Do not induce vomiting unless told to do so by the poison control center or						
	doctor.						
Do not give anything by mouth to an unconscious person.							
IF IN EYES	Hold eye open and rinse slowly and gently with water for 15-20 minutes.						
•	• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing						
	eye.						
	Call a poison control center or doctor for treatment advice.						
IF ON SKIN OR	Take off contaminated clothing.						
CLOTHING	Rinse skin immediately with plenty of water for 15-20 minutes.						
	Call a poison control center or doctor for treatment advice.						
IF INHALED	Move person to fresh air.						
	• If person is not breathing, call 911 or an ambulance, then give artilicial						
	respiration preferably by mouth to-mouth if possible						
	 Call a poison control center or doctor fro further treatment advice; 						
	NOTE TO PHYSICIAN						
Acephate is a cholines	terase inhibitor. If signs of cholinesterase inhibition appear, atropinesis antidotal 2-						
	d in conjunction with atropine but should not be used alone.						
	HOT LINE NUMBER						
Have the product con	tainer or label with you when calling a poison control center or doctor, or going for						
treatment.							
EMERGENCY NUMB	ERS:						
FOR 24- HOUR EMEI	RGENY MEDICAL ASSISTANCE CALL: 1-866-303-6952						
	ERGENCY: Spill, leak, fire, exposure, or accident call CHEMTREC 1-800-424-3300

Manufactured For: Arysta LifeScience North America, LLC 15401 Weston Parkway, Suite 150 Cary, NC 27513

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are barrier laminate, butyl rubber, nitrile rubber and viton. If you want more options, follow the instructions for category F on an EPA chemical-resistance category selection chart.

Mixers, loaders, applicators and other handlers using engineering controls must wear:

- Long-sleeved shirt and long pants
- Socks and shoes
- Chemical-resistant gloves for all mixers and loaders and for applicators using hand-held application equipment

In addition, applicators using low pressure hand wand application equipment must wear:

 A NIOSH-approved dust mist filtering respirator with MSHA/NIOSH approval number prefix TC-21C or a NIOSH-approved respirator with any N, R, P or HE filter.

See engineering controls for additional requirements.

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENGINEERING CONTROLS

Water-soluble packets when used correctly qualify as a closed mixing/loading system under the Worker Protection Standard for Agricultural Pesticides [40 CFR 170.240(d)(4)]. Mixers and loaders using watersoluble packets must:

- wear the personal protective equipment required above for mixers/loaders, and
- be provided and must have immediately available and must use in an emergency, such as a broken package, spill, or equipment breakdown the following PPE:
- Coveralls
- Chemical-resistant footwear
- A NIOSH-approved dust mist filtering respirator with MSHA/NIOSH approval number prefix TC-21C or a NIOSH-approved respirator with any N, R, P or HE filter.

Pilots must use an enclosed cockpit in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(6)].

The use of human flaggers is prohibited.

USER SAFETY RECOMMENDATIONS

Users should:

- 1. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- 2. Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- 3. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to birds.

For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

Exposed treated seed may be hazardous to birds and other wildlife. Dispose of all excess treated seed and seed packaging by burial away from bodies of water.

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

STORAGE: Keep pesticide in original container. Do not put concentrate or dilute into food or drink containers. Store in cool, dry place. Protect from excessive heat. Do not contaminate food or foodstuffs. Do not store or transport near feed or food. For help with any spill, leak, fire or exposure involving this material, call Chemtrec 1-800-424-9300.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Open dumping is prohibited.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available, or dispose of outer bag in a sanitary landfill or by incineration if allowed by state and local authorities.

CHEMIGATION PROHIBITION

Do not apply this product through any type of irrigation system, except on Cranberries.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS, AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

GENERAL USE RESTRICTIONS

Not for indoor residential use. For greenhouse use, use is limited to commercial greenhouses for use on tobacco) floatbed application, ornamental, floral, and foliage plants.

For use on turf, use limited to sod farms and golf courses. Aerial application to turf is prohibited.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

For any requirements specific to your State or tribe, consult the Agency responsible for pesticide regulation.

Do not apply with low pressure handwand except when used on ornamental trees, shrubs and floral plants grown for non-agricultural or non-commercial use.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

1. Coveralls

2. Chemical-resistant gloves made of any waterproof material and

3. Shoes plus socks

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, or greenhouses. Do not enter or allow others to enter until sprays have dried.

DIRECTIONS

This package contains water soluble packets of Acephate 90SP. Do not handle the packets with wet gloves or allow the packets to become wet prior to addition to the spray tank. If only one packet is used, close and reseal outer container to protect remaining packets.

To prepare spray solution, drop the unopened packet of Acephate 90SP into a spray tank containing at least one-half the desired total quantity of water. Continue to add water with the agitator running until the desired spray volume is reached. Depending on the water temperature and degree of agitation the packet should completely dissolve in approximately 5 minutes.

SPRAY DRIFT MANAGEMENT

A variety of factors including weather conditions, (e.g., wind direction, wind speed, temperature, relative humidity) and method of application (e.g., ground, aerial, airblast, chemigation) can influence pesticide drift. The applicator and grower must evaluate all factors and make appropriate adjustments when applying this product.

- All aerial, ground and air-assisted/airblast application equipment must be properly maintained and calibrated using water as carrier. Do not apply this product as an ultra low volume (ULV) spray other than as specified on this label, or in any carrier other than water.
- Use the largest droplet size consistent with good pest control. Small droplets are more prone to spray
 drift and can be minimized by appropriate nozzle selection, by orienting nozzles away from the air stream
 as much as possible, and by avoiding excessive spray boom pressure.
- Do not apply at wind speeds greater than 10 mph at the application site.
- Apply as close to target plants as practical to obtain a good spray pattern for adequate coverage.
- For aerial applications, do not apply at heights greater than 10 feet (consistent with flight safety).
- For airblast applications, direct spray above foliage and turn off outward pointing nozzles at row ends and outer rows.
- For aerial applications, the spray boom should be mounted on the aircraft so as to minimize drift caused by wing tip vortices. The minimum practical boom length should be used and must not exceed 75% of wing span or rotor diameter.
- For ground applications, do not apply at heights greater than 4 feet.

Aerial applications to turf are prohibited.

COTTON

PHI (pre-harvest interval) denotes number of days to harvest.

GENERAL USE PRECAUTIONS:

- Do not use treated seed for food or feed purposes for oil.
- Do not feed treated forage or gin trash to livestock.
- Do not allow animals to graze on treated areas.
- Do not apply more than 4.0 lbs a.i. per acre per crop cycle. This includes all methods of application.
- The maximum single aerial application rate for use in California and Arizona is 1.0 lb a.i. per acre. For all remaining areas, the maximum single application rate is 0.75 lb a.i. per acre.

RESISTANCE-MANAGEMENT

Pests Controlled

ACEPHATE

90SP

Cotton pest control programs, especially those for control of silverleaf whitefly populations, should employ a properly designed resistance-management strategy. Such resistance-management strategies include mixture or rotation of alternative classes of chemistry including organophosphates, carbamates, pyrethroids or insect growth regulators. Consult your state or area agricultural extension service for local resistance management strategies and advice on alternative insecticides. ະຈັບ

COTTON TANK MIXES WITH PYRETHROIDS

Synthetic pyrethroids should be used within the guidelines of state and/or regional resistance management programs and recommendations.

Always read and follow all label directions when using any pesticide alone or in tank mix combinations: Observe all restrictions and precautions which appear on all product labels. The most restrictive labeling applies when using a tank mix.

RESISTANCE MANAGEMENT

Cotton pest control programs, especially those for control of silverleaf whitefly populations, should employ a properly designed resistance-management strategy. Such resistance-management strategies include mixture or rotation of alternative classes of chemistry including organophosphates, carbamates, pyrethroids or insect growth regulators. Consult your state or area agricultural extension service for local resistance management strategies and advice on alternative insecticides.

	Armyworms (except Beet), Bean Leaf Beetle, Cabbage . Looper, Green Cloverworm, Mexican Bean Beetle, Soybean Aphid, Three- cornered Alfalfa Hopper, Velvetbean Caterpillar	0.83 – 1.1 lbs.	Do not graze or cut vines for hay or forage. Do not apply more than 1.5 lbs. a.i./Acre of Acephate 90SP per season. Always read and follow all label directions, restrictions, and precautions when using any pesticide alone or in tank mix combinations. The most restrictive labeling applies when using a tank mix.	lbs.a.i./acre: 7 days	

TOBACCO TOBACCO TRANSPLANT WATER APPLICATION (Use Prohibited in CA)

CROP	INSECTS	AMOUNT ACEPHA TE 90SP PER ACRE	FURTHER USE INSTRUCTIONS
Tobacco	Flea Beetle, Green Peach Aphid, Tobacco Aphid, Cutworms, Tobacco Thrips	0.83 lb	Provides control of early season flea beetles, green reach aphids, tobacco aphids, and cutworms for approximately 3 to 4 weeks after transplanting. For later season control of these insects, apply e to liar, spray of ACEPHATE 90SP. Apply in a minimum of 100 gals. of water per acre.

RESTRICTIONS

Make transplant-water applications using mechanical transplant equipment only. Using such equipment, the insecticide/water mixture is mechanically applied directly into the soil along with the transplanted plants.

Do not apply more than 4 lbs a.i. per acre per season. This includes all methods of application.

TOBACCO FOLIAR APPLICATION

(Use Prohibited in CA)

PHI (pre-harvest interval) denotes number of days to harvest.

CROP	INSECTS	AMOUNT ACEPHATE 90SP PER ACRE	FURTHER USE INSTRUCTIONS,
Tobacco	Cutworm, Flea beetle, Green Peach Aphid, Tobacco Aphid	0.83 lb	Apply to foliage at the rate of 3 gals. Of diluted product per every 1,000 sq. ft. of bed. Prepare diluted product by adding 1 lb. Acephate 90SP in 130. 7 gallons of water. Apply evenly to ensure thorough coverage. NOTE: Floatbed water should be disposed of in the transplanted field through the transplant water or through foliar spray. Apply spray at a minimum of 7 days if necessary to maintain control.

•		
	Do not apply more than 4 lbs a.i. per acre per	
	season. This includes all methods of application.	

	PHI (pre-l	narvest interval) d	enotes number of days to harvest.		_
CROP	INSECTS	AMOUNT ACEPHATE 90SP PER ACRE	FURTHER USE INSTRUCTIONS	Minimum Spray Interval (days)	PHI
Cranberries	Cranberry Blossom Worm, Gypsy Moth, False Armyworm, Fireworms, Spanworms, Sparganothis	1.11 lbs	 Application should be made using sufficient water to achieve thorough coverage (ground) or in a minimum of 2 gal of water/A (aerial). Application should not be made from start of bloom until all berries have set. When applied via irrigation system, only sprinkler type irrigation equipment can be used. Apply in water by air, ground or with sprinklers. NOTE: Limit to one application per growing season. Do not apply more than 1.0 lb a.i. (1.11 lbs. product) per acre per crop cycle. 	N/A	90

CRANBERRIES

SPRINKLER IRRIGATION APPLICATION TO CRANBERRIES

Apply to cranberries only by sprinkler irrigation systems. Do not apply by chemigation to any other crop, or this crop using any other type of irrigation system.

For overhead chemigation, apply only when wind speed is 10 mph or less.

This product may only be applied through sprinkler irrigation systems including center pivot, lateral move, end tow, side (wheel) roll, travelers, big gun, solid set, or hand move. Do not apply this product through any other type of irrigation system.

Crop injury, lack of effectiveness, or illegal pesticide residues in the crop may result from non-uniform distribution of treated water.

If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts.

Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the label-prescribed safety devices for public water supplies are in place.

A person knowledgeable of the chemigation system and responsible for its operation shall shut the system down and make necessary adjustments should the need arise.

The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.

The pesticide injection pipeline must contain a functional, normally closed solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.

The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.

System must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

Do not apply when wind speed favors drift beyond the area intended for treatment.

Solid Set Systems: Apply specified dosage for the entire length of the irrigation period or for a 30 to 60 minute period at the end of a regular irrigation set or as a 30 to 60 minute injection as a separate application not associated with a regular irrigation. Allow time for all lines to flush the pesticide through all nozzles before; turning off irrigation water. To ensure the lines are flushed and free of remaining pesticide, a dye indicator may be injected into the line to mark the end of the application period. See NOTE.

Center Pivot Systems: Inject the specified dosage per acre continuously for one complete revolution of the system. See NOTE.

NOTE: Constant agitation must be maintained in the chemical supply tank during the entire period of insecticide application. Inject the product with a positive displacement pump into the main line ahead of a right angle turn to ensure adequate mixing.

Application of more than label recommended quantities of irrigation water per acre may result in decreased product performance by removing the chemical from the zone of effectiveness.

					Do not apply more often than 3 times in a growing season 2, Note: Phytotoxicity has occurred on the following Crabappie varieties: Hopa, 2 Ichonoski, Malusflorihunda, Pink Perfection, Red Wine and Snow Cloud. Do not apply by a low pressure handwand.
Crepe Myrtle	Aphids	1 lb. (16 oz.) per 16 gallons of	As aphids begin to appear.	N/A	Make a paint-on sivery to the trunk in a band 6-12 inches above the ground by mixing the specified amount of ACEPHATE 90SP.
		water		· · · · ·	Remove the loose bark from the trunk areas to be treated. Completely paint a band around each trunk to a width twice its diameter. Application should be made to trunks within a zone 6 to 12 inches above the ground and below the point where branching begins. For multi-trunk plants be certain to treat all trunks. For either single or multi-trunk plants, application should be made as low as possible within the recommended treatment zone.

28/35

COMMERCIAL TURFGRASS (Golf Course Turf Only)

DO NOT ALLOW LIVESTOCK TO GRAZE TREATED AREAS. DO NOT FEED TREATED GRASS TO LIVESTOCK.

Use limited to golf courses.

Aerial applications to turf are prohibited.

NOT FOR USE ON RESIDENTIAL LAWNS

PLANTS	INSECTS	AMOUNT ACEPHATE 90SP PER 1,000 SQ FT	TIME OF APPLICATION	RECOMMENDED APPLICATION
Turfgrass	Fall Armyworm, Yellow Striped Armyworm, Southern Armyworm Cutworm	0.4 to 1.0 oz (1.11 to 2.71 lbs per acre) 1.0 to 1.6 oz (2.71 to 4.44 lbs per acre)	As the insects appear. A repeat application at 2 week intervals may be necessary.	Apply the specified amount of ACEPHATE 90SP per 1,000 sq ft. Use a minimum of 5 gals water per 7,000 sq ft to obtain good coverage.
	Chinch bugs	1.0 to 1.6 oz (2.71 to 4.44 lbs per acre)	Apply as needed for adult population knockdown (10 to 14 days)	Apply the specified amount of ACEPHATE 90SP per 1,000 sq ft.
	Sod Webworm (Crambus spp)	0.4 to 0.8 oz (1.11 to 2.22 lbs per acre)	As sod webworms begin to appear. Use the higher amount when quick knockdown is needed or with heavy infestations. Repeat application may be necessary. Do not repeat at more than 1 week intervals.	Apply the specified amount of ACEPHATE 90SP per 1,000 sq ft. Use 1 to 15 gals water per 1,000 sq ft to obtain good coverage.
	Leafhopper	0.8 oz (2.22 lbs per acre)	As the leafhoppers begin to appear. A repeat application at 1 week intervals may be necessary.	Apply the specified amount of ACEPHATE 90SP per 1,000 sq ft. Use 1 to 15 gals water per 1,000 sq ft to obtain good coverage.

PLA	ANTS	INSECTS	AMOUNT ACEPHATE 90SP PER 1,000 SQ FT	TIME OF APPLICATION	RECOMMENDED APPLICATION
(golf	hondra course only)	Cutworm, Flea Beetle, Southern Armyworm, Yellow Striped Armyworm	0.8 to 1.6 oz (2.2 to 4.44 lbs per acre)	As the insects appear. Repeat at 2 week intervals as necessary.	Apply the specified amount of ACEPHATE 90SP per 1,000 sq ft Use a minimum of 15 gals water per 1,000 sq ft to obtain good coverage.

OUTDOOR WASP AND PERIMETER SPRAY

Not for use on residential turf.

The use of low pressure handwand equipment for perimeter or wasp treatments is prohibited.

LOCATION	INSECTS	AMOUNT ACEPHA TE 90SP PER GALLON	TIME OF APPLICATION	RECOMMENDED APPLICATICN
Outdoor wasp and perimeter area	Wasps	1.6 oz (0.10 lb)	Treat early or late in the day, as wasps are generally less active during these times.	Apply the specified amount of ACEPHATE 903P, per each yallon of water used. Apply as a spot treatment to the nest, nest and entrance, and surrounding oreas where the wasps alight?
	Cockroaches, Ants (excluding fire, harvester, carpenter and pharaoh ants), Pillbugs, Earwigs (Perimeter treatment)	1.6 oz (0.10 lb)	As the insects appear	Apply specified amount of ACEPHATE 90SP per each gallon of water used. Apply to a band of soil 6 to 10 feet adjacent to the structure and to a height of 2 to 3 feet on the foundation where pests may be active or may find entrance. Also apply as a residual spray or with a paint brush to surfaces of buildings, window frames, shutters, entry-ways, screens, eaves, patios, garages, carports, around garbage areas and other areas where these pests congregate.

PLANTS	INSECTS	AMOUNT ACEPHATE 90SP PER 100 GALS	TIME OF APPLICATION	RECOMMENDED APPLICATION
Daisies, Dahlias, Easter Lily, Gladioli, Gyposophila, Pachysandra, Peony, Roses, Sedum, Statice, Strawflower, Yarrow, Zinnia	Aphids, Thrips, Lygus,	0.55 lb (8.7 oz) Single application rate not to exceed 0.75 lb.a.i./A for cut flowers and 1.0 lb a.i./A for all other plants	As insects begin to appear. Repeat applications may be necessary.	Apply the specified amount of ACEPHATE 90SP in 100 gals water with a hydraulic sprayer as a full coverage spray. Multiple applications may cause slight tip burn or marginal leaf necrosis on some varieties. Test on a few plants to determine varietal susceptibility.
Roses, Boston Ivy	Japanese Beetle	1.11 lbs (17.7 oz) Single application rate not to exceed 0.75 lb.a.i./A for cut flowers and 1.0 lb a.i./A for all other plants	As the Japanese Beetles begin to appear. Repeat applications at 2 week intervals may be necessary.	

OUTDOOR FLORAL CROPS AND GROUND COVERS

COMMERCIAL GREENHOUSE FLORAL AND FOLIAGE PLANT CROPS

Do not apply more than 0.83 lbs. a.i. (13.3 oz. product) per acre per 100 gallons of water (not to exceed 0.75 lb a.i. (0.83 lbs product) per acre for cut flowers and 0.83 lbs. a.i. (13.3 oz. product) per acre for all other ornamentals).

Do not apply under conditions involving possible drift to food, forage or other plantings that might be damaged or the crops thereof rendered unfit for sale, use or consumption.

PLANTS	INSECTS	AMOUNT ACEPHATE 90SP PER 100 GALS	TIME OF APPLICATION	RECOMMENDED APPLICATION
Roses	Leafrollers	0.55 to 0.83 lb (8.7 to 13.3 oz)	As leafrollers begin to appear. Use the higher amount when the large larvae are present.	Apply the specified amount of ACEPHATE 90SP in 100 gals water with a hydraulic sprayer as a full coverage spray.

PR Notice 2007-4

33/35

PLANTS	INSECTS	AMOUNT ACEPHATE 90SP PER 100 GALS	TIME OF APPLICATION	RECOMMENDED APPLICATION
Foliage Plants, Orchids, Anthuriums, Cacti, Poinsettia	Aphids	0.28 lb (4.3 oz)	As aphids begin to appear.	Apply the specified amount of ACEPHATE 90SP in 100 gals water with a hydraulic sprayer as a full coverage spray. The addition of a wetting agent may be required on difficult to wet foliage.
	Mealybugs, Thrips, Whiteflies	0.55 lb (8.7 oz)	As the insects begin to appear. A repeat application, at a 2 week interval, may be necessary for control of mealybugs and whiteflies.	Note: Phytotoxicity has occurred on the following foliage plants: Bletchum gibbum, Cissus antarctica, Ficus triangularis, Fittonia verschaffeltii, Maranta leuconeura kerchoveana, , , Pachystachya lutea,
	Scales (crawlers)	0.55 lb (8.7 oz)	As crawlers begin to appear. Repeat applications, at a 2 week or more interval, may be necessary where there is continuous crawler production.	Pachystarnys icrea, Plectranthus australis, Polypodium aureus, Polystichum, Pteris ensiformis, Tolmiea manziesii. Before treating laige plantings spray only a few plants and cherve 2 weeks for varietal phytotoxicity. Applications of ACEPHATE 90SP on Poinsettias after bract formation may result in phytotoxicity on certain varieties.
	Sweet Potato Whiteflies, (except CA and NY)	0.28 lb (4.3 oz) plus 10 2/3 fl oz (0.2 lb ai) TAME 2.4 EC Spray	Apply when insects first appear. If a population is well established, make one application of the tank mix and follow 5 to 7 days later with TAME alone at 16 fl oz/100 gals. See TAME label for instructions.	For sweet potato whitefly control, apply the specified amounts of ACEPHATE 90SP plus TAME 2.4 EC Spray as a tank mix at a volume necessary to obtain good coverage. Follow the TAME label for specific instructions on the alternation of TAME plus ACEPHATE and TAME alone and the rotation instructions to avoid potential resistance.
