PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

Causes eye and skin irritation. Harmful if absorbed through skin. Avoid contact with skin. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants, and hat. May be fatal if swallowed or inhaled. Do not breathe dust. While spraying, wear a mask or respirator jointly approved by the Mine Safety and Health Administration and the National Institute of Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

STATEMENT OF PRACTICAL TREATMENT:

EYE CONTACT: Flush eye with sufficient amounts of water for at least fifteen minutes. If irritation persists, consult a physician.

SKIN CONTACT: Wash with soap and water to remove powder.

IF SWALLOWED: Consult a physician.

IF INHALED: Expose to fresh air. If respiratory distress persists, consult a physician.

ENVIRONMENTAL HAZARD:

This pesticide is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during coating removal to enter water. Dispose of coating debris in an approved landfill.

NET CONTENTS: 20 pounds

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with the labeling.

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No.

FLAMECOAT® AF-100 is an effective antifoulant product against attachment of barnacles and other aquatic life when applied to boat hulls and used in salt or fresh water.

66514-1

Only **FLAMECOAT®** application equipment should be used to install AF-100 by operators trained by Plastic **FLAMECOAT®** Systems Representatives. This product is intended for both commercial and non-commercial use.

1. **FLAMECOAT® AF-100** should be flamesprayed over **FLAMECOAT®** thermoplastic coatings: PF111 for steel or aluminum surfaces, and PF113 for fiberglass surfaces. Follow all **FLAMECOAT®** specifications for proper base preparation.
2. **FLAMECOAT® AF-100** is applied at a continuous coverage of approximately 15 grams per square foot to a **FLAMECOAT®** surface preheated to 220°F, minimum. AF-100 is applied in a single coat process, resulting in a continuous, uniform coating.
3. Once the coating has cooled, it may be placed in the water immediately. Water may be used to accelerate the cooling process.
4. Any worn areas may be repaired by preheating the polymer substrate and reapplying AF-100 until the surface is continuous.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Store in original, sealed container.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide or removed coating is a violation of Federal Law. If waste cannot be disposed of as regulated by local, state, or federal guidelines, contact your state pesticide or environmental control agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Return empty container to Plastic **FLAMECOAT®** Systems or dispose of by procedures approved by local, state, or federal authorities.
