SUBJECT: Amendment to Add to Label  
Copper Green Wood Preservative  
EPA Registration No 66591-1  
Your Submission Dated June 6, 1995

Dear Mr. Woods:

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended is acceptable provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 4 when the Agency requires all registrants of similar products to submit such data.
2. Submit one (1) copy of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

James M. Stone  
Acting Product Manager (22)  
Fungicide-Herbicide Branch  
Registration Division (7507C)

Enclosure

## Coverage

Estimate 150 to 200 sq. ft. per gallon for brush coat or 5 to 10 gallons per 1000 board feet for dipping dimensional lumber.

## Recommended for

COPPER GREEN® is an easy to use wood preservative for above ground, ground contact and below ground uses: e.g. window sills, trellises, greenhouse benches, foundations, sills, plant boxes, fence posts, subflooring, lawn furniture and decks. For use wherever wood meets soil or water. Should not be applied to food or feed contact surfaces.

## RECOMMENDED FOR USE ON EXTERIOR WOOD ONLY.

Wood to be protected against subterranean termites should be treated before use in construction. Termites will not attack wood treated with COPPER GREEN® Wood Preservative.

## Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Wood to be treated should be dry and well seasoned before treatment with COPPER GREEN®. Lumber and wood products should be dip treated for at least 3 minutes per inch of thickness. If dipping is not possible, treat with several flowing coats by brush or spray. The more COPPER GREEN® the wood absorbs, the better it will be protected. Do not try to extend the coverage.

Fence posts and heavy timbers should be free from bark, dry and well seasoned. Posts should be immersed in COPPER GREEN® for 12-48 hours to give effective control for wood destroying pests.

Apply prior to use in construction. Ends or edges cut or bored after initial treatment should be brushed or sprayed with COPPER GREEN®. Do not install treated articles until thoroughly dry.

Use one coat on materials to be finished with paint or stain.

If no finish is to be used, apply two liberal coats within the hour. Thoroughly cover the ends. The more preservative absorbed into the wood, the longer and more effective the protection.

The copper fungicide gives a green cast to COPPER GREEN® Wood Preservative. This product is not intended for use as a stain. The green color will fade within a few months when exposed to sunlight. Oil or alkyd stains or paints can be applied over COPPER GREEN® Preservative after thorough drying (about 48 hours), but the green may bleed through lighter colors.

This product is supplied at proper application consistency and is to be applied without thinning or diluting under normal environmental and application conditions. Brushes and other application equipment may be cleaned with paint thinner (mineral spirits).

ACCEPTED  
with COMMENTS  
In EPA Letter Dated:

JUL 3 1995

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
Approved for the pesticide  
label under EPA Reg. No.

Contents 1 Gallon (3.79 Liters)  
This Product  
Will Turn Wood Green

## Precautionary Statements

Hazards to humans and domestic animals

## WARNING

### HARMFUL OR FATAL IF SWALLOWED

Causes eye and skin irritation. Harmful if absorbed through skin. Do not get in eyes or skin or on clothing. Avoid breathing vapor or spray mist. Wash thoroughly with soap and water after handling. Contaminated clothing should be removed and washed thoroughly before reusing. Use in a well ventilated area.

### Statement of Practical Treatment

- If in eyes: Immediately flush with a large quantity of water and get medical attention.
- If in skin: Wash thoroughly with plenty of soap and water. Get medical attention if irritation persists.
- If inhaled: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.
- If swallowed: Do not induce vomiting. CALL A PHYSICIAN IMMEDIATELY.

### Environmental Hazards

This product is toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate when disposing of equipment washwaters. Apply this product only as specified on the label.

### Physical or Chemical Hazards

Do not use, pour, spill or store near heat or open flame. Use only with adequate ventilation. Close container when not in use.

### Storage and Disposal

**Storage:** Store in a secure, well ventilated area, protected from extreme temperatures. If the product has been spilled or is leaking, remove the source of the spill or leak. Recover free liquid. Spread absorbent, then pick up and place in containers. Then, where applicable, wash area with detergent and water. Store product in the original container only. Do not contaminate water, food or feed by storage or disposal. Keep container closed when not in use.

**Pesticide Disposal:** Pesticide wastes are toxic. Improper disposal of excess pesticides, spray mixture, or rinsate is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

**Container Disposal:** Securely wrap original container in several layers of newspaper and discard in trash. Do not reuse container. Rinse thoroughly before discarding in trash.
