

Coverage

Estimate 150 to 300 sq. ft. per gallon for brush coat or 5 to 10 Gallons per 1000 board feet for dipping dimensional lumber.

Recommended for

Green's Clear Wood Preservative is a colorless, easy to use wood preservative for above ground, ground contact and below ground uses; e.g. foundations, sills, planter boxes, fence posts, subflooring, docks, boats, lawn furniture and decks. For use whenever wood meets soil or water, and a clear finish is desired. Should not be applied to food or feed contact surfaces.

In addition to preventing fungal rot and decay, and insect attack on natural wood surfaces, this preservative controls the warping, swelling, shrinking and end charring caused by changes in moisture content of lumber and other wood products.

Wood to be protected against subterranean termites should be treated before use in construction. Termites will not attack wood treated with Green's Clear Wood Preservative.

FOR EXTERNAL USE ONLY. Application of this product may produce a strong, lingering, unpleasant odor.

Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Wood to be treated should be dry and well seasoned before treatment with Green's Clear Wood Preservative. Lumber and wood products should be dip treated for at least 3 minutes per inch of thickness. If dipping is not possible, treat with several flowing coats by brush. The more Green's Clear Wood Preservative the wood absorbs, the better it will be protected. Do not try to extend the coverage.

Fence posts and heavy timbers should be free from bark, dry and well seasoned and should be immersed in Green's Clear Wood Preservative for 12-48 hours to give effective control for wood destroying pests.

Apply prior to use in construction. Ends or edges cut or bored after initial treatment should be brushed with Green's Clear Wood Preservative. Do not install treated articles until thoroughly dry.

Use one coat on materials to be finished with paint. Oil or alkyd paints can be applied over Green's Clear Wood Preservative after thorough drying (about 48 hours).

If no finish is to be used, apply two liberal coats within the hour. Thoroughly cover the ends. The more preservative absorbed into the wood, the longer and more effective the protection.

This product is not intended for use as a stain or finish. Green's Clear Wood Preservative may accelerate the natural graying process in some woods.

This product is supplied at proper application consistency and is to be applied without thinning or diluting under normal environmental and application conditions. Brushes and other application equipment may be cleaned with paint thinner (mineral spirits).

In case of medical questions, emergencies or Accidents involving this product, call INFOTRAC at (800) 535-5053

Green's Clear Wood Preservative

Use Wherever Wood Meets Water and Soil Prevents Deterioration Caused by:

- Termites ■ Fungus
- Rot ■ Decay

Colorless • Heavy Duty • Water Repellent Controls Warping & Swelling • Seals Wood Kills Termites and Wood Eating Insects

WARNING: Keep Out of Reach of Children

See Side Panel for Additional Precautionary Statement

Active ingredient	23.6%
*Zinc Naphthenate	76.4%
Inert ingredients	100.0%

COMBUSTIBLE: Contains Petroleum Distillates
*Zinc as metal, 5%
Max. V.O.C. = 250 grams per liter

PRECAUTIONARY STATEMENTS

Hazard to humans and domestic animals
WARNING: HARMFUL OR FATAL IF SWALLOWED
Causes eye and skin irritation. Harmful if absorbed through skin. Do not breath vapors or mist during brush, roll, spray and dip application. Do not get into eyes or skin or on clothing. When spraying for continued or prolonged use of this product or for frequent use of this product, wear an NIOSH/MHSA-approved mist/ Vapor respirator. Wash thoroughly with soap and water after handling. Contaminated clothing should be removed and washed thoroughly before reusing. Use in a well-ventilated area.

Statement of Practical Treatment

- If in eyes: Immediately flush with a large quantity of water and get medical attention.
- If in skin: Wash thoroughly with plenty of soap and water. Get medical attention if irritation persists.
- If inhaled: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

-If swallowed: Do not induce vomiting. CALL A PHYSICIAN IMMEDIATELY.

Environmental Hazards

This product is toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate when disposing of equipment washwaters. Apply this product only as specified on the label.

Physical or Chemical Hazards

Do not use, pour, spill or store near heat or open flame. Use only with adequate ventilation. Close container when not in use.

Storage and Disposal

Storage: Store in a secure, well ventilated area, protected from extreme temperatures. If the product has been applied or is leaking, remove the source of the spill or leak. Recover free liquid. Spread absorbent, then pick up and place in container. Then, where applicable, wash area with detergent and water. Store product in the original container only. Do not contaminate water, food or feed by storage or disposal. Keep container closed when not in use.

Pesticide Disposal: Pesticide wastes are toxic. Improper disposal of excess pesticides, spray mixture, or rinsals is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.
Container Disposal: Securely wrap original container in several layers of newspaper and discard in trash. Do not reuse container. Rinse thoroughly before discarding in trash.
