21 JUN 1994

Mr. Eliot I. Harrison
 Canine Care Incorporated
 P.O. Box 11436
 Costa Mesa, CA 92627

Dear Mr. Harrison,

Subject: Amendment Application for Rate Reduction
 Terminator
 EPA Registration Number 66674-1
 Terminator Plus
 EPA Registration Number 66674-2
 Submissions Dated August 23, 1993

BEST AVAILABLE COPY

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below. One (1) copy of the respective finished labeling must be submitted prior to releasing the products for shipment. A stamped copy of each of the respective product labels is enclosed for your records.

The Agency has made the determination that the application rate for these two products may be reduced to 26 mg/sq.in. without additional efficacy data. Delete the "1/4" designation from the application rate declaration. If it is your intent to decrease the application rate further, you must either generate the necessary data and submit this for review, or you may cite a "substantially similar or identical" pesticide product(s) bearing the rate of application equal to that which you intend to use, and submit the necessary **Certification with Respect to Citation of Data** form along with the Application for Pesticide Amendment.

1. Revise the proposed label to declare 26 mg/sq.in. or an equivalent. Based upon our calculations, the equivalent would be approximately 1 pound product per 100 square feet.

2. Make the following revisions in the text of the respective product labels for products 66764-1 and 66764-2:

a. Delete the term "copious" from the **STATEMENT OF PRACTICAL TREATMENT**, and substitute a more commonly recognized term such as "large amounts".

b. Move the " **DIRECTIONS FOR USE** It is a Violation of Federal Law to use this product in a manner inconsistent with its labeling" such that it appears directly above the paragraph which begins "Terminator may be used....".

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

7, 21

c. The **STORAGE AND DISPOSAL** section must be revised accordingly to meet the Agency requirements for containers up to 30 pounds net weight. Refer to the attached sheet for appropriate statements.

Sincerely,

Mr. Robert S. Brennis
Acting Product Manager 10
Insecticide-Rodenticide Branch
Registration Division

Terminator may be used in homes, restaurants, and other food and food handling establishments, markets, schools, warehouses, factories, offices, hotels, motels, hospitals, nursing homes, garages, grocery stores, apartment buildings, new construction, industrial plants, theaters, ships, boats, trains, trucks, yachts, camps, mobile homes, buses, zoos, kennels, military bases, libraries, utilities and sewers.

DOMESTIC (HOMEOWNER USE) FLEAS

Use Restrictions: Apply only when children and pets do not have access to treatment areas. Avoid contamination of feed and foodstuffs.

Application Directions for Flea Control: Apply directly on carpets where pets frequently traffic or sleep at the rate of 1/4 - 1 lb. per 100 square feet. Work powder deep into fibers and mat. Any powder visible after application must be brushed into carpet fibers or vacuumed. Allow powder to remain for a period of three weeks to achieve maximum flea control in carpets. Reapply if necessary.

**DOMESTIC (HOMEOWNER USE)
COCKROACHES, ANTS AND SILVERFISH**

Use Restrictions: Apply only in areas inaccessible to children and pets. Avoid contamination of feed and foodstuffs.

Application Directions for Cockroaches, Ant and Silverfish Control: Apply liberally, scattering under and behind refrigerator, stove, sink, dishwasher, washing machine and dryer, tubs; into openings around drains, water pipes and electrical conduits, and in cracks and crevices along baseboards and corners of cabinets, cupboards, and closets. Remove all lower drawers in kitchen and bathroom cabinets, bedroom dressers and chests of drawers, then scatter liberally in drawer wells. Any powder visible after application must be brushed into cracks and crevices or removed. Reapply as necessary.

TERMINATOR

Effectively Controls Fleas on Carpets and Furniture and Cockroaches, Ants and Silverfish in Cracks and Crevices and on Hard Surfaces and Fomes Annosus

ACTIVE INGREDIENT:

Sodium Tetraborate Decahydrate 100%
(Boric oxide equivalent ... 37.50%)

CAUTION

KEEP OUT OF REACH OF CHILDREN

STATEMENT OF PRACTICAL TREATMENT

If in Eyes: Flush with copious amounts of water. Get medical attention.
If on Skin: Rinse with water.
If Swallowed: Drink large amounts of water. Get medical attention.
If Inhaled: Remove to fresh air.

See Side Panel for
Additional Precautionary Statements

Will Not Damage Furniture

NON-DOMESTIC USE (NONEDIBLE PRODUCT AREAS ONLY)

Use Restrictions: Apply only in areas inaccessible to children and pets. Do not use in edible product areas of food handling establishments, restaurants, or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

Directions for Applying in New and Existing Construction to Control Cockroaches: When treating large areas, such as wall voids, soffit and subcabinet voids in new and existing construction, dust liberally using dusting application equipment.

Directions for Applying in Sewers and Manhole Cavities: Apply this product at a rate not to exceed 12 oz. per 190 sq. ft. using portable blowers or air pressure tanks.

Directions for Applying as a Mop Solution to Control Cockroaches:

Mixing and Application Directions: Add 1 cup of powder to each gallon of rinse water. Apply to floor areas only. Make only enough for each application. Supplemental treatment only.

Reapply as necessary. Any powder visible after application must be brushed into cracks and crevices or removed. Avoid contamination of fecal and foodstuffs.

FOOD HANDLING ESTABLISHMENTS

Places other than private residences in which food or feed is held, processed, prepared, or served.

1. FOOD AREAS (INCLUDING SOME SERVING AREAS)

Includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage and enclosed processing systems (mills, driers, edible oils, syrups). Also includes some SERVING AREAS.

FOOD SERVING AREAS

SERVING AREAS are facilities where food is served, such as dining rooms, but not where food is prepared or held. These areas are considered FOOD AREAS when food is exposed and the facility is in operation.

FOR FOMES ANNOSUS CONTROL

Sprinkle terminator "salt shaker" style on the freshly cut stump surface. Complete coverage, including exposed side areas and any splinters, is necessary. Also, level rather than sloping stump surfaces is preferred, especially in areas of high rainfall. Apply enough Terminator to lightly cover stump surface. At proper rates of application one pound of granular Terminator will adequately cover 50 square feet of stump surface.

Follow application directions in this section. If food is not exposed and facility is not in operation, follow application directions under NONFOOD SERVING AREAS below.

Use Restrictions: FOOD AREA application is limited to CRACK AND CREVICE TREATMENT ONLY. Applications to other areas are not permitted.

Application Directions: Apply in small amounts directly into cracks and crevices using a bulbous duster or other suitable equipment capable of applying insecticides directly into cracks and crevices, in points between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases, conduits, motor housing and electrical switch boxes where cockroaches hide.

Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

2. NONFOOD AREAS (INCLUDING SOME SERVING AREAS)

Includes garbage rooms, lavatories, floor drains (to sewer), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling). Also includes some SERVING AREAS.

SERVING AREAS are facilities where food is served, such as dining rooms, but not where food is prepared or held. These areas are considered NONFOOD AREAS when food is not exposed and the facility is not in operation.

Follow application directions in this section. If food is exposed and the facility is in operation, follow application directions under FOOD SERVING AREAS.

Application Directions: Apply as a spot treatment to selective surfaces such as baseboards, under elements of constructions into cracks and crevices. Avoid treating surfaces likely to be contacted by food.

OTHER NONFOOD AREAS

Application Directions: Apply to baseboards areas, around water pipes, surfaces behind and beneath sinks, lockers, tables, pallets and similar areas where insects hide or through which they may enter.
